BROWN & GOLD

OFFICIAL ANNUAL
PUBLICATION *of the*
UNIVERSITY *of* MANITOBA
STUDENTS' UNION

1932

Thirteenth Volume

ONCE again a University Annual passes from our hands to those of our friends and fellow students. This volume, in accordance with the advanced and progressive ideas of the Board of Editors, contains many distinctive and perhaps drastic changes over previous annual publications, and whether these pictorial or typographical innovations appeal to you or not, we trust that you will bear in mind the fact that our desire to please and to satisfy has been most sincere.

This volume of Brown and Gold is the 13th publication, commenced on a Friday, and in a Leap Year. Surely you will largely overlook the faults and mistakes that we have committed when you realize that we have had to work under conditions fraught with such dire omens.

However, as Emerson once said, "A man is relieved and gay when he has put his heart into his work and done his best," and should this volume meet with anything like universal approval, we shall feel more than repaid.

**SAMUEL
WILLIS
PROWSE**

BA., M.D.,

1869 - 1931

*To whom this
Volume of the
Brown and Gold
is respectfully
dedicated*

UNIVERSITY is not a thing of bricks and mortar, lordly buildings and spacious campus. Without men these are less than nothing. And the late Dean Prowse was a man. He came from that home of men, the Maritime Provinces, where he received his medical education, both undergraduate and post-graduate. Coming West in 1898, he became associated with the Manitoba Medical College in 1900, but it was on his return from overseas in 1917 that he began the work that was to have such far-reaching consequences for the Medical School and the University.

In that year, while still in France, Dr. Prowse was appointed Dean of the Medical College. At that time the school was a private institution with limited accommodation, equipment and staff. Few of those now connected with the College realize the time and energy devoted by the new dean to the task of raising the school to a position equal to that of the best on the continent. Largely as a

result of these labors the Medical College in a few years possessed an assured revenue, an adequate library, a suitable staff and a university standing. The climax of his efforts came in 1923, when the college received a class "A" rating.

But those knowing Dr. Prowse think not so much of his achievements as of the man himself. There was something of the antique and classical about him. Cast in the Roman mould, like Brutus or Cato, a man with an old world courtesy, absolute straight forwardness, and high nobility of character. He never spared himself; even when mortally ill his greatest interest and abiding passion was the welfare of the school which he had helped so mightily to build. Of himself he never seemed to give a thought.

*And thus he bore without abuse
The grand old name of gentleman.*

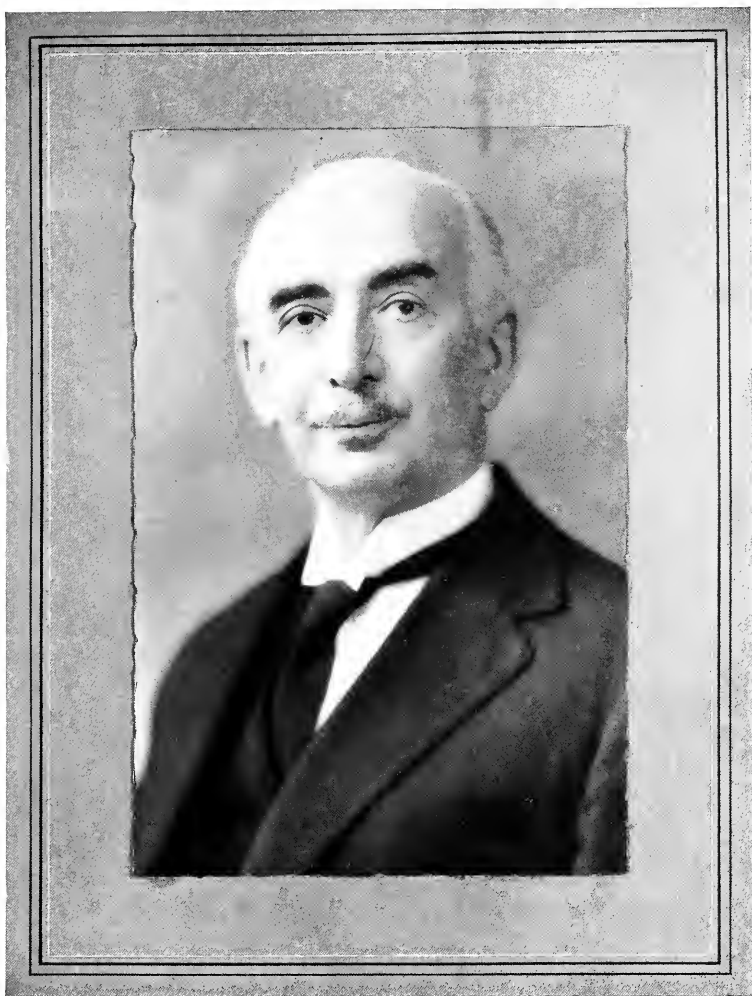

WILLIAM BOYD.

From "The Tradition of the Teacher."

TODAY some of us have seemed to be falling off a little in the faith of the fathers in education. One sometimes hears the statement that "there are too many students in the High Schools and Universities" and that "only a very small percentage of pupils can be expected to benefit from a High School course," that "by the order of the universe there is a certain predetermined percentage of the population that will profit by education. These should be sought out and educated, if need be, at the public expense. The others are needed for manual labor and should be directed towards their destined occupations by the shortest route," and the talk turns on heredity, army tests, intelligence tests and anything else by which they can establish the doctrine of "a favored few." Plato expresses it thus: "You are doubtless all brethren, as many as inhabit the city, but the God who created you mixed gold in the composition of such of you as are qualified to rule, which gives them the highest value, while in others he made silver an ingredient, assigning iron and copper to the cultivators of the soil and other workmen." Only a myth, of course, but not quite so mad and harmless as it sounds. That myth has served to bolster up slavery as natural in the ancient world, and serfdom at a later date, and an elaborate class system in many of the countries of Europe today. It is always invoked by anyone who wishes to cover with the divine sanction his own personal and deep-seated objection to doing his own work for himself and his decided preference for having the largest and least attractive portion of it performed by others. The teacher's reply is always: "I do not believe in the myth of Plato. I have seen so many natures which seemed to be iron and brass transmuted into gold by the alchemy of education, that it would be presumptuous and wrong for me to say that a large percentage of pupils of school age will not and cannot derive profit for themselves and the state from education." It may be that it is predetermined that some will never see Heaven, but that does not affect the duty of the minister, or that certain patients will not recover, but that does not alter the situation for the doctor.

In our vocation, the vocation of seeking to make the world a little better than we found it, it is our business to oppose even what seems to be fate itself, in the interests of those who are in our charge. Usually it turns out to be something else masquerading as fate. This, as I understand it, is the best tradition of the teacher.

A GOOD poem must have a beginning, a middle and an end; a good organization a purpose, a machinery, and a personnel. The U.M.S.U. would claim to be a good organization.

What then, is its Purpose?

The purpose of the University of Manitoba Students' Union is to make one articulate whole the variegated student body, varied in location, tradition, outlook and racial descent—of that University which ranks third in size in Canada, which boasts the names of Allen, Buller, and Lodge, to mention no others; and which is achieving among universities an individuality worthy of earnest cultivation. This end it is the purpose of the U.M.S.U. to achieve by developing in the student mind a realization of the student possessing a definite status in society, with definite privileges, and corresponding definite responsibilities.

What is the Machinery?

The machinery of the U.M.S.U. is the council which controls all U.M.S.U. finance, and by means of its sub-committees and publications carries on those activities, social and intellectual, which on the one hand prevent the student from becoming a book-worm, and on the other hand from being a social butterfly or a beefy athlete. The loyalty which lubricates it is the loyalty of its members.

What, finally, is its Personnel?

Those whose pictures are to be found in the U.M.S.U. section of this volume are only the official personnel of the U.M.S.U. The true personnel of the U.M.S.U. is the faculty student body, and in it the individual student. The University of Manitoba Students' Union is not a detached and self-centred executive, it is the student body, it is an idea of unity based on the common basis of student fellowship incarnate in the student body, and active for the student good.

THE year of 1931-32 has been a decidedly interesting one for the activities of the U.M.S.U. The council was faced with straitened finances on the one hand and on the other with the natural reluctance of any sub-committee to curtail its customary program. That Council successfully balanced this conflicting state of affairs is indicative not only of good economy but also of good fortune.

In athletics the heavy labor of President Reycraft has been rewarded with an excellent record. In every way the directorate and the athletes are to be congratulated. Women's athletics have been hampered only by want of competition.

Mr. Freedman has had phenomenal success with the Debating Union, not the least features being the importance of the topics, the appearance of public men at the debates, and the emergence of new debaters.

The Glee Club had a triumph, and to that pleasure of the producer and executive no word of commendation here could add.

The collapse of the Dramatic Society production perhaps demonstrates that the time has come to replace the large single play with more shorter, less pretentious productions.

The Manitoban continued its progress, kept the student body alertly thinking, and opened new lines of development. Mr. Cohen and staff are to be congratulated.

Mr. Sharpe maintained the former standard of the Social Committee.

This publication tells its own tale.

It has been a good year, an interesting year; a year of which the U.M.S.U. may be proud:

Cheerily, my masters!

THIS year the U.M.S.U. Womens' Committee again made excellent showing as far as its activities were concerned.

The women's track team started off the season with a marvelous victory over both the University of Saskatchewan and the University of Alberta, in the Inter-College Track Meet, with a score of 55 to 12. A great number of records were broken both in the track and field events, and the girls are certainly to be congratulated.

This year the Women's Committee also managed to have an inter-faculty tennis tournament, and we hope that in the very near future we will be able to send a team to compete with the Western Universities.

The University of Manitoba girls' basketball team have shown considerable progress, both in

the city league and in their game with the University of Alberta.

A curling team was also entered in the Manitoba bonspiel.

Again this year the girls' hockey team have proven successful in all its games. Instead of travelling to Saskatchewan and Alberta, the team played a number of games with teams in the city and also went to Dauphin where it played the Collegiate team, winning with a score of 4-2. Besides this it has played a number of games with the T. Eaton Co. team, Prof. Howe's Northern Lights, and at the end of the season a novelty game with the Varsity juniors.

Besides these U.M.S.U. events, inter-faculty schedules were run off in hockey, basketball and curling—Science winning the hockey, Aggies the junior basketball.

THE past year has been the most successful for a number of years, both financially and in athletic achievements.

In inter-collegiate competition, track, rugby and basketball were divided among Saskatchewan, U.B.C. and Manitoba. The track meet was exceedingly close, ending with all three Universities within a single event of each other. The rugby team was one of the best that has represented the University for a number of years, and after making a clean sweep of the prairies, lost in a heart-breaking game at Vancouver by a single point. The Varsity juniors were our only hockey team this year and although not winning the championship were in the running till the end.

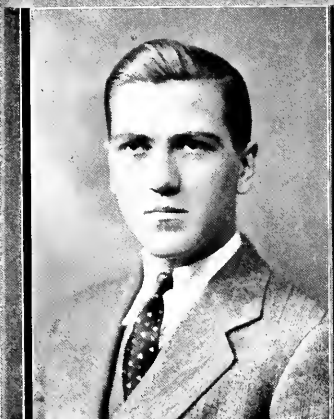

The only inter-collegiate title to come to Manitoba this year was won by the basketball team. The

junior team playing in the city league has already won the city junior title at the time of writing.

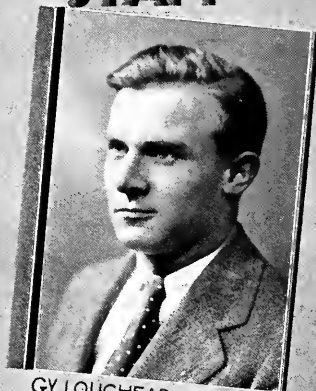

The financial side has far surpassed any year in the history of the University. Rugby, which has always been a losing sport, this year paid for itself, which gives the directorate hope that the turning point has come and that in future years it will help finance our other activities. The Student Tickets were used again and judging from the crowds at rugby and hockey, proved popular.

In looking forward to the coming year, prospects look bright. Although some of our teams will lose heavily through graduation, the success of our junior teams assures us of material to fill their places.

THE policy of this year's Brown and Gold staff has been that of strict economy. Faced with depleted advertising and circulation revenues, it has been financially impossible for us to make improvements over previous volumes by means of increased expenditure. Thus we have earnestly striven to make the book more attractive and possibly more readable by effecting a change in its typographical arrangement as a whole. These innovations may or may not meet with the whole-hearted approval of our readers, yet with all due modesty we feel that student activities at Manitoba, be they intellectual, athletic or social, have all been given adequate representation.

Considerable credit is due the various faculty editors, whose assistance in the compiling and

editing of this publication has been invaluable, perhaps never before have they been so conscientious and painstaking. Special mention should be made of Rhodes of Engineering, Cumming of Agriculture, and Barrett of Medicine; the capable manner in which they have co-operated at all times has been most gratifying. Loughhead and Bildfell of the Business and Circulation departments are also to be congratulated on their efforts.

Scattered hither and yon throughout this volume are printed errors which are the necessary concomitants of any publication of this nature. However, we trust that we will not be taken too severely to task for these unfortunate yet truly unavoidable slips.

THE newspaper," declared the late C. P. Scott, onetime editor of the famous *Manchester Guardian*, "has a duty to perform. Its honesty must not only extend to fair presentation of news with friend and foe alike being given a fair, unbiased hearing, but it must also pursue intellectual honesty in its opinions. A newspaper is a public institution and should perform its obligations with that courage which rises above almost incorrigible human prejudices."

This magnificent dictum has guided *The Manitoban* during the past year. The staff and editorial board have sought to achieve a standard worthy of a college publication, which, while retaining the artistry of academicians, should yet lose nothing of its news disseminating qualities.

The rolling roar of the presses is now stilled, but soon the ink will fly and steel letters shall again stamp their inerascable mark. Then *The Manitoban* will once more assume its duty with courage and persistence.

U.M.S.U. DRAMATIC SOCIETY EXECUTIVE

THE University Dramatic Society has traveled a road beset with difficulties this year, and has emerged, if not triumphant, at least wiser and stronger than before.

The society's success in the fall term proved to be deceptive. In the usual One-act Plays at M.A.C., the participation of six faculty dramatic societies made two full evenings' entertainment possible for the first time. On November 20th, M.A.C. gave "The House with the Twisty Windows," an exciting drama produced by Lilyan Brown; St. John's made their first contribution to U.M.S.U. dramatics with the delightful Irish comedy, "The Workhouse Ward," produced by Nancy Pyper, and Arts secured a real triumph with "The Intruder," very capably directed by the student-producer Evelyn Morris. November 21st saw "Rich Man, Poor Man," a very entertaining farce offered by U.C.; "The Grand Cham's Diamond," another comedy, by Science, and the most impressive and dramatic play of all, "Ile," produced by the Engineers under Nancy Pyper's direction. The stage was capably handled by James Whyard and Bob Blakely, and Sheldon Arnett's business management secured a record attendance of over twelve hundred. From every point of view the plays were the best ever sponsored by the society at M.A.C.

Plans for the annual play in March were also completed before Christmas; Sudermann's "Joy of Living" had been chosen to produce, after long deliberation. Only with the new year did complications appear which threatened these arrangements; they developed such weight that the play had to be given up, despite every effort to carry on with it. It was considered inadvisable to undertake a substitute under such conditions.

While the insuperable obstacles encountered this spring made it impossible to produce an annual play, and so broke a continuity of many years, it may yet be confidently hoped that the society in the future will benefit rather than suffer from the lessons so learned. An extensive reorganization is already under way which should make such misunderstandings impossible henceforth, and every effort is being made to assure a vigorous and successful life for the society next year.

U.M.S.U. GLEE CLUB EXECUTIVE

Top Row—
D. Mudge (President)

(Business Manager)

Bottom Row—
W. Wright
R. Hoole

THE U. of M. Glee Club again scored a triumph with the major production, "The Yeomen of the Guard," which was acclaimed as the club's finest achievement during its five years of Gilbert and Sullivan Operas. This was due in no small measure to the painstaking training given by the directors, Mrs. Sinclair, Mr. Gibson, and Melba Smith, and to the efficient functioning of Executive, Business Committee, and Design Committee.

Many opportunities were presented in the varied roles for principals, and these were made the most of, in both singing and action, by a well chosen and enthusiastic cast. The chorus was an active feature of the Opera, full of color and varied gesture.

The valuable offering of the Glee Club is that training is given in all aspects of the Opera, for students interested in these. Thus, the orchestra provided opportunities for many, as did the make-up, discipline, stage, costume, publicity and advertising committees. Great credit is due to Architectural students who designed and made the very attractive set of Tower Green, and also the many properties.

A. E. Smith

THE year 1931-32 will be remembered in the life of the Debating Union as a year in which there was a tremendous revival of interest in debating, in which the debates of the Union were witnessed by audiences that filled the theatre to capacity, and in which the Union made a great advance in the direction of attaining its true status as a public forum.

Recent years have shown a regrettable tendency towards insularity and also towards levity: the Debating Union had "gone collegiate." To counteract this tendency the efforts of the Union were directed towards the consideration of problems of

great social import, and to all the bi-weekly meetings an invitation was extended to some prominent members of the community in order that the views of the general public might be heard from the Union floor.

Major debates were held in the College of St. Thomas, with the University of British Columbia, and with a team sponsored by the N.F.C.U.S., all of which were attended by large crowds and set a high standard of debating quality.

In a word, the result of the year's work can be best stated in the words that "students and public have become debating conscious."

Front Row—

W. Shaver
J. Master
G. Sharpe
K. Dickson
C. Johnson

THE U.M.S.U. Council having quite definitely expressed their views concerning the depression, the Japanese War and the world series, the Social Committee this year has aimed to carry out a limited program. Quality and not quantity has been their standard. The opening function of the fall term was the Thanksgiving Day dance in honor of the visiting track teams from Saskatchewan and Alberta. At this no effort was spared to leave a lasting impression with our visitors, of 'Toba's hospitality. This was followed shortly by the usual Pumpkin Ball, the success and popularity of which was born out by the record attendance.

It was not without arduous effort on the part of our president, who notwithstanding several refusals, finally won the consent of the U.M.S.U. Council,

that the Annual Color Night made its auspicious appearance as the lone and crowning achievement of the second term. The Varsity athletes were entertained at dinner and dance in the most approved style. We feel that we cannot pass this event by without expressing our warmest appreciation to the special committee who so enthusiastically and artistically handled, along with the regular committee, the matter of decorations for this affair. We feel with justifiable pride that this was assuredly the most outstanding social event of the season.

At the outset the committee planned to make everything just as good as possible and still to remain a little ahead of the game, and we believe that has been the result obtained.

WILLIAM L. MORTON

RHODES SCHOLAR

WILLIAM L. Morton's unusually spectacular career at Manitoba University and St. John's College culminated in his nomination as Rhodes Scholar for 1932-33. After taking his elementary school training in Gladstone, Manitoba, "Bill" came to Winnipeg to continue his education in St. John's College.

He has been editor of *The Johnian*, then of *The Manitoban*, when his fine editorials attracted widespread attention. Bill Morton has just completed a term as President of the U.M.S.U. Council. Prominence in the Debating Union, in football and on the track has proved his versatility.

Literature, however, constitutes his main interest. He plans to make this subject his main study at Oxford next fall.

We'll be hearing from you, "Bill"!

ONCE again the Hardy trophy, emblematic of the championship of Western Inter-collegiate rugby, has eluded the endeavors of the men who represent Manitoba in that line of sport. Although they were not conceded a Chinaman's chance in the opinions of those who considered their possibilities before the commencement of the season, Karl Wintemute's proteges upset all this pre-season speculation when they raced through all their Inter-collegiate competitions much in the manner of a typical Manitoba cyclone. And only when their best efforts had been spent against the unusually strong bulwark presented by the British Columbia

coast brigade at Vancouver last fall did they "meet their Waterloo," and then by the narrowest of margins.

After the Brown and Gold had won a stirring 26 to 16 victory over the Old Boys, the clarion call was sounded for future victories. At the end of the following week a strong and highly favored aggregation from St. John's met with more than the expected opposition from the students, and after a desperate struggle, scoring most of their points in the closing minutes of the game, only succeeded in eking out a 15 to 7 win.

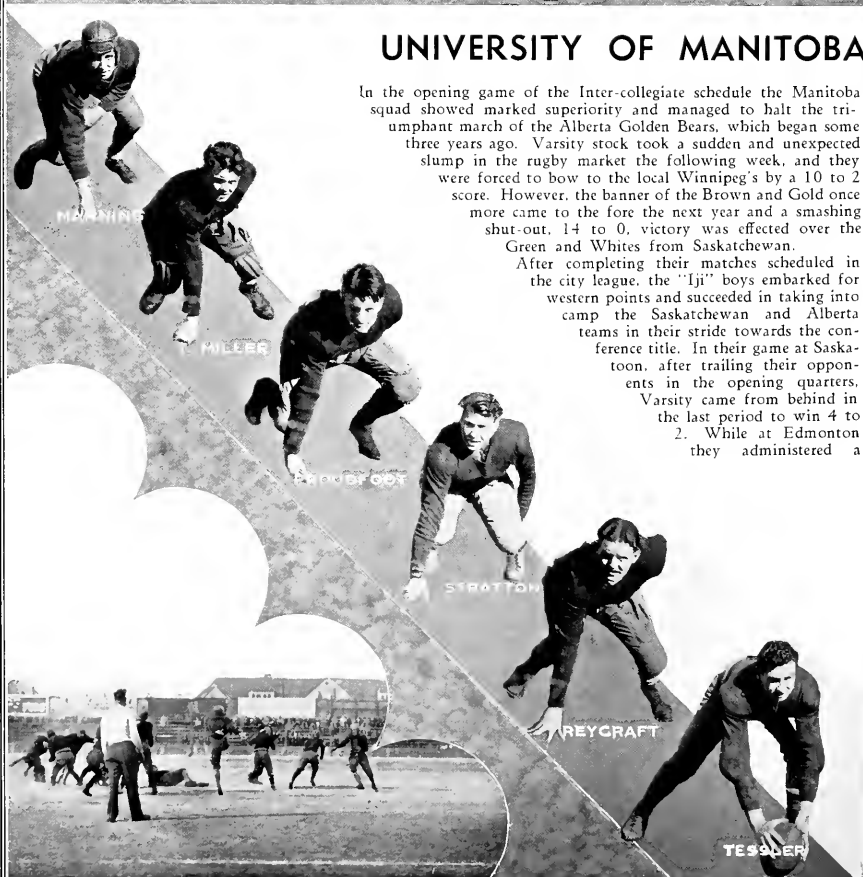

UNIVERSITY OF MANITOBA

In the opening game of the Inter-collegiate schedule the Manitoba squad showed marked superiority and managed to halt the triumphant march of the Alberta Golden Bears, which began some three years ago. Varsity stock took a sudden and unexpected slump in the rugby market the following week, and they were forced to bow to the local Winnipeg's by a 10 to 2 score. However, the banner of the Brown and Gold once more came to the fore the next year and a smashing shut-out, 14 to 0, victory was effected over the Green and Whites from Saskatchewan.

After completing their matches scheduled in the city league, the "Iji" boys embarked for western points and succeeded in taking into camp the Saskatchewan and Alberta teams in their stride towards the conference title. In their game at Saskatoon, after trailing their opponents in the opening quarters,

Varsity came from behind in the last period to win 4 to 2. While at Edmonton they administered a

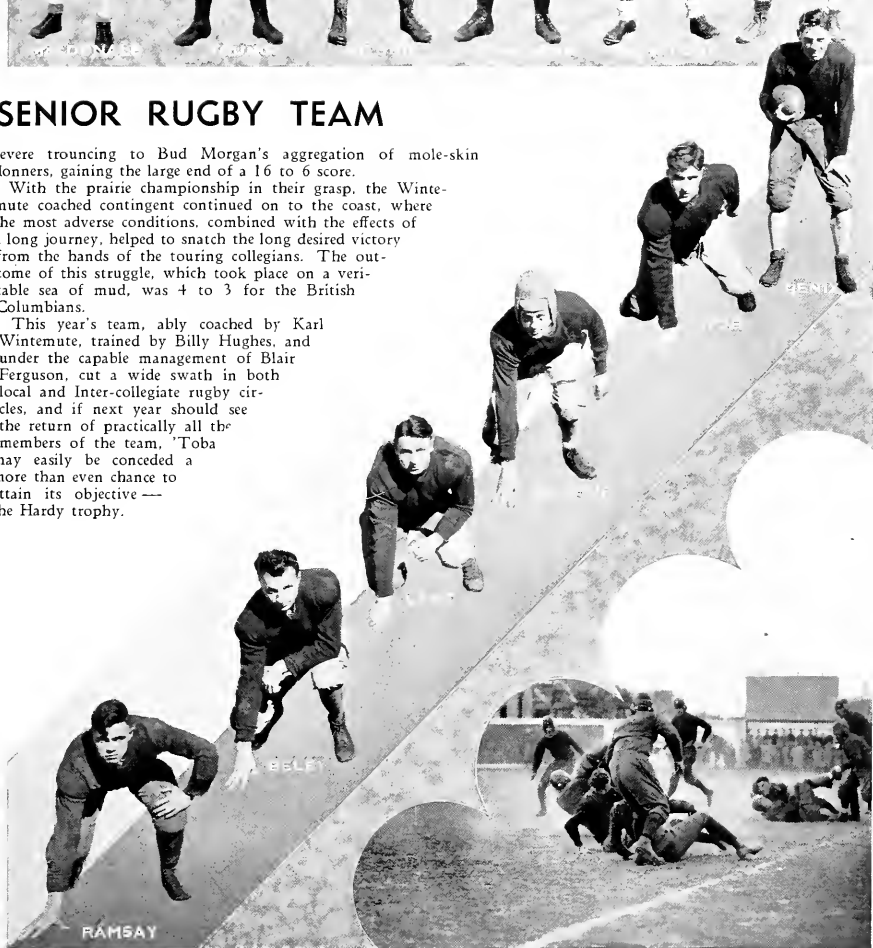

SENIOR RUGBY TEAM

severe trouncing to Bud Morgan's aggregation of mole-skin donnors, gaining the large end of a 16 to 6 score.

With the prairie championship in their grasp, the Wintemute coached contingent continued on to the coast, where the most adverse conditions, combined with the effects of a long journey, helped to snatch the long desired victory from the hands of the touring collegians. The outcome of this struggle, which took place on a veritable sea of mud, was 4 to 3 for the British Columbians.

This year's team, ably coached by Karl Wintemute, trained by Billy Hughes, and under the capable management of Blair Ferguson, cut a wide swath in both local and Inter-collegiate rugby circles, and if next year should see the return of practically all the members of the team, 'Toba may easily be conceded a more than even chance to attain its objective — the Hardy trophy.

ONCE again we are unable to claim a Junior Championship for the Varsity Junior squad, though it was not for lack of trying. About forty inexperienced rugby maniacs tried out for the squad during the course of the season. This raw material, composed of eager, ambitious young fledglings, was gradually moulded into a rugby squad through the painstaking efforts of Coach John Moyse, who was ably assisted by Vincent McKenty. True, this team did not appear to be much on paper, but it was, truthfully, one of the best junior teams produced by Varsity for several years. If it is possible to keep this squad together, we should be right in there to the last minute with the best of them next season. Next season will be our big chance. There was only one team better than Varsity in the Junior League this season. Through inexperience the team lacked staying power. Often Varsity would be leading at half time, but fell

down in the dying minutes of the game. Next year we hope for more and better equipment.

If a little more attention and consideration were given the juniors by the Athletic Directorate, they would be well justified. Especially this year, with a powerful nucleus and men coming to college with high school rugby experience. With most of the senior team intact for next season, it looks like a banner season for University rugby, the Hardy trophy and the cup emblematic of Manitoba Junior Rugby prowess, won by the juniors. Every junior player can be proud to look back on the playing season of each fall, for Varsity has seldom fielded a more plucky group of players.

The following players composed the regular junior team: McIntyre, Ramsay, Musgrove, Scott, O'Kouski, Plaxton, Martin, Bracken, Penney, Balls, Leckie, and MacArthur (captain).

U.M.S.U. JUNIOR HOCKEY

IN SPITE of the gloomy predictions last fall, Varsity was able this year to put on the ice a first class Junior hockey aggregation. Coach Bill Cockburn had to make a team out of men almost entirely new to the Junior ranks, but his masterly hand was apparent from the first, and noticeable in their unexpected strength.

Half way through the season, when Bill left for the Olympics, his duties were undertaken by Bun Stephenson who proceeded to work the boys as they had never worked before.

With Roy Musgrove, the league's most brilliant and effective goalie, and Bud Harbottle, another Varsity veteran, back in the fold, a foundation was at hand on which to build the team. A host of new material turned out and many promising players were discovered who were soon worked into the strongest defensive team in the league.

The record of the team's wins and losses does not portray an accurate picture of their abilities and accomplishments. Some wonderful hockey was played and had the fates not been against them, there would be a different story to tell.

Prospects for the future are bright. Many of our present players will be eligible for at least another season, and many new men will be with us. In a post-season game with an all-star inter-high team, there were many players of excellent ability seen in action, who will soon, we hope, be wearing the brown and gold.

Although the U. of M. hockeyists did not exactly set the town on fire this season, no one can doubt that they were at all times worthy representatives of our student body and a group of athletes of whom the University might well be proud.

THE activities of the Juvenile Hockey team began this year with Bud Harbottle as coach. A fine team was lined up and the first game of the season saw them emerge with flying colors, defeating St. Paul's College 5-1. The team fought hard all through the season, and lost its chance of getting into the play-offs when Kelvin defeated Varsity 2-1 in a very close game.

The team as a whole deserves great credit, particular mention being given to Davis, Saltzman, and Tully for their fine playing throughout the year.

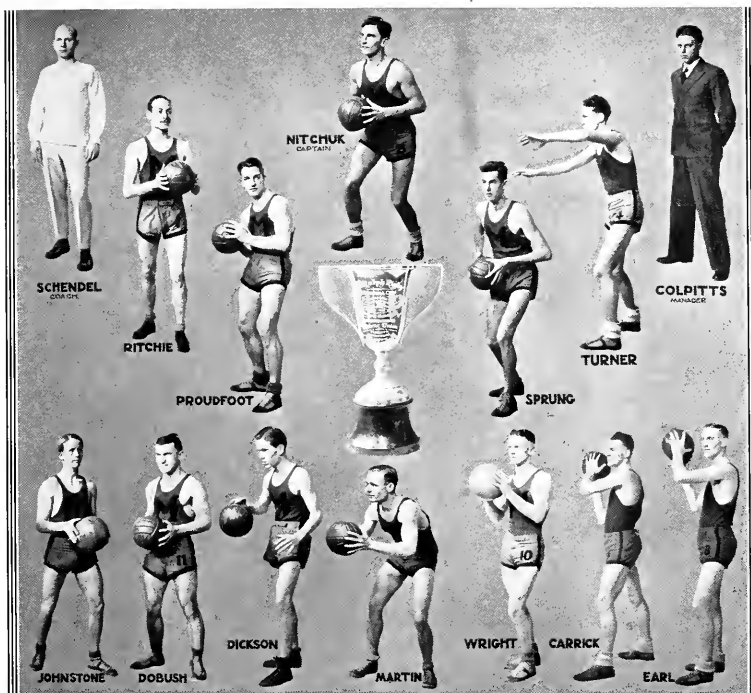

AGAIN, under Coach Larry Adamson, Girls' Hockey has been very successful. Although plans for a Western trip fell through, due to the depression in the Western Universities, the girls had one small trip.

On the week-end of the 12th of March the team travelled to Dauphin and played the collegiate team there, Varsity defeating Dot Cadwell's squad.

There have been other games—two with Eaton's and one with the "Northern Lights." The Eaton's games ended in ties and Varsity was victorious by a 2-0 count in the other.

At present plans are under way for a game with the Varsity Junior boys and with this victory we hope to close the season.

U.M.S.U. SENIOR BASKETBALL

THE past few weeks have seen one of the most successful campaigns in the history of Manitoba's basketball squad drawing to a close. Starting out at the first of the season as an unknown factor, they proved to their followers that they could ably uphold Varsity's reputation on the basketball floor.

Flashing brilliant form from the first game, Varsity had little trouble overcoming all opposition to capture the first half of the season as an unknown factor. To prove this was not a flash in the pan, they "took" the strong University of British Columbia five, on January 5th, to restore the Rigby trophy to its old resting place.

Toba's first major defeat was at the hands of the strong Nodak team from the University of North Dakota. Chilled to the bone after an arduous ten-hour trip, they took the floor at Grand Forks and subsequently were defeated. However, in a return game the Manitoba squad, although outclassed,

cut down the difference in score to prove the score of the first game was no true indication of their ability.

Due recognition must be given to the veterans Captain Alex. Nitchuk, Stan Carrick, and Pete Dobush for their unselfishness in returning to the Varsity fold when their services were required to lay the foundation for future strength in Varsity basketball.

The remaining two regulars of the team, in the persons of Gordie Earl and Charlie Proudfoot, did yeoman service and played smooth basketball the entire season.

The alternates, Ritchie, Sprung, Wright, Martin, and Stamshorn, in no way weakened the team when on the floor and turned in excellent games at all times.

With the bulk of the team eligible for next season, and excellent new material coming up, Varsity's prospects for next year look exceeding bright.

A. Hendersson

NOT to be outdone by the example set by the Senior squad the Varsity Junior "A" squad played brilliant basketball all season and capped its performance by capturing the Jamieson trophy, emblematic of the Junior Championship of the city. No play-offs were necessary as the squad took both the first and second series.

Continuing on their winning way the Juniors kept in the running for the Crowe trophy by turning back the Buffaloes, Junior "B" champions, by a 36-20 score. If the quintette continues its bril-

liant form it bids fair to cop the Provincial Junior Championship.

ALTHOUGH unable to enter the ranks of the winners the Junior "B" team made a creditable showing under the hard working captain, Sam Kaplan. They were continually in the fight for a place in the play-offs and with this year's experience should be heard from next season.

THE assault on the Manitoba citadel for possession of the Cairns trophy, which began four years ago, after the Brown and Gold had cornered the cup for a period of seven years, again bore fruit as the Saskatchewan track and field squad came to the front in this year's Inter-collegiate meet held at Sargent Park. The coveted trophy relinquished four campaigns ago will once again spend a year in parts west, although the 'Toba squad turned in by far the strongest threat to regain the title which they had once held with such success. A single first place proved the deciding factor in a meet which all considered as the finest conducted since relations with Western Universities, and which was attended by the largest crowd on record.

Cleve Gerry was the high point man on the Brown and Gold squad, copping first place in both the running high jump and the pole vault, besides registering third in the running broad jump. Jack

Liddle, up and coming sprint star, electrified those present with a thrilling win in the 440 yards, besides pulling the fat out of the fire in the men's quarter-mile relay. He also placed third in the hundred yards dash. Mervyn Sprung was nosed out in the last yard of the half-mile event in one of the most thrilling races seen in years and will be a much heard of gentleman in the future. Capt. Fred Fjelstead, handicapped by a recent illness, was nowhere near his usual form and had he been so there might have been another tale to tell. Stan Carrick proved the most versatile athlete on the field of endeavor. Stan entered in four events and netted himself eight points to add materially towards Varsity's total.

Others who shared the limelight with point-earning efforts were, Norm Penny, third in the pole vault; M. Dale, third in the mile and three-mile, and Austin Floyd, member of the relay team.

THIS year the members of the Co-ed Track Team left no stone unturned to win the coveted Rutherford trophy. The girls, forming one of the strongest teams that has ever represented Manitoba, literally ran away with their events to take seven first places out of a possible nine and to win the trophy with fifty-three points, thirty-five more than the combined efforts of Alberta and Saskatchewan. Further honors were bestowed upon the team when Genevieve Johns, the outstanding performer of the day, annexed the individual championship by winning all the sprints. Out of the five Co-ed records broken the Manitoba girls were responsible for four and shattered them by no small amount. To go into the merits of each member of the team would take considerable space, but with such stars as Aldis Thorlakson, Genevieve Johns, Gertrude Fuller, Mary Cooperband, and Doreen Fal-

coner on hand next year, another win is positively assured for Manitoba.

INASMUCH as the basketball team this year has received five new recruits into its fold, the girls soon adapted themselves and the team work was splendid.

In the Inter-collegiate game with Alberta the team went down "fighting," for, at the last few minutes of play, the team had only four players on the floor. This year Manitoba gave Alberta the hardest battle since Alberta carried the honors west, losing only by a narrow margin.

The team came out second best in the City League, being nosed out in a close overtime game with Y.W.C.A.

U.M.S.U. MEN'S CURLING

UNIVERSITY curling achieved both popularity and success this year, under the very capable presidency of Grand Watson. Aided by continued cold weather, the entire schedule was completed on hard ice. Of the eight faculties competing Arts was the winner with 32 points and Science a very close second with 31.

In the University Porte Markle competition the Science rink of Watson, Howden, Cornice, Brown, went through the schedule undefeated.

Twelve rinks were entered in the city bonspiel and enjoyed varying measures of success. Although no cups were won, Johnny McDiarmid proved the ability of university curlers by bringing his rink into the finals of the Free Press and the semi-finals of the Alexander Memorial.

U.M.S.U. CO-ED CURLING

THE curling this year has been fairly successful. Immediately after Christmas each faculty representative was informed of try-outs for U.M.S.U. and to have her best curlers present.

For weeks the girls curled together under their coach, Grant Watson. Finally, just before the Bonspiel, the U.M.S.U. rink was chosen, consisting of two girls from Wesley—Olive Glinz and Elizabeth Boughton—and two girls from Agricultural College—Ruth Casselman and Patricia Reid. These four did their best to uphold Varsity in the Bonspiel. We would like to have had two rinks entered this year, but there was not sufficient material.

Meanwhile the Inter-faculty games have been going on with Agricultural, Wesley and Medicals tying for first place.

U.M.S.U. MEN'S TENNIS

FOLLOWING the annual fall tournament held in each of the faculties, an Inter-faculty competition was planned and organized in early October, under the guidance of Harold Stinson. After an interesting competition in which two representatives of each faculty participated, Kenneth Gunn of Science finally emerged victorious, scoring his second consecutive win in this event. Although this branch of sport has not developed as rapidly as the number of its followers would warrant, it is to be hoped that U.M.S.U. tournaments of this type will prove a forerunner of inter-University competition.

U.M.S.U. CO-ED TENNIS

THE tennis tournament conducted by the U.M.S.U. women's committee proved two things—first, that the University of Manitoba has players of outstanding calibre, and, secondly, that every year a greater interest is taken in this form of sport. Two winners were declared among the girls of each faculty and these competed for the championship. Mrs. Ann Coombes of St. John's College finished triumphant with Ruth Mitchell of M.A.C. the runner-up. It is to be hoped that next year we will be able to have inter-collegiate matches.

National Federation of Canadian University Students

Founded December, 1926

OBJECT

To promote in every way possible a better understanding among all students; a greater degree of co-operation between all Canadian Universities for the promotion of national interests, and to provide a means for developing international relationships with student groups in other countries.

Founded at the University of Manitoba
on March 15th, 1931

THE University of Manitoba was nothing more than an examining board and a degree conferring board for many years, in fact, from 1870, when it was first founded; but in 1900 the University Act was amended, giving the University Council authority to appoint or dismiss professors and lecturers, these actions to be subject to the approval of the Government.

As a result of these provisions three professors were appointed, followed in 1904 by further appointments, and from then onward the University as a teaching body developed somewhat rapidly until in 1914 a complete Arts course was supplied, and instruction was given in all subjects necessary for that degree.

Up till the present time all Arts students have been accommodated in the buildings on Kennedy Street, but with the completion of the new structure on the St. Vital site, the Senior Division students will next year commence attendance at that building.

Im

F

The Arts Building.

THE graduation of a student is an exceedingly important event. For most it marks the end of specific and formal training for life and for all it should mark the beginning of a zealous and determined effort to rear the best possible superstructure on the foundation that has been laid. The conviction will increase with the years that your University education has been invaluable, that it has given substance and direction and strength to your intellectual powers and that your associations with your fellow students and with your Faculty have fitted you to be and to desire to be extensively servicable members of society. There is much need for you in a world presently disturbed and confused. You can bring to its poise, moderation, broad and sympathetic vision, the energies and enthusiasms of youth, and a trained mind to aid in the solution of its problems.

On behalf of the Faculty of Arts and Science I assure you that our interest in you will not cease with your graduation. We will know that our sowings have taken root if you continue to apply your hearts and minds unto wisdom.

AT the end of the term of 1931-32 the Arts Executive Council will have completed a most successful session. Though we retire with regret, yet it is also with pride in the knowledge that everything is left ship-shape for the incoming executive. Through the admirable co-operation of the sub-committees, the reduction of the budgets did not result in any curtailment of activities. Under the able leadership of the general chairman, the student body has successfully taken part in all faculty functions, which is a great achievement with the good old depression at its height—or depth. The fond hope of this council was to make Arts a more closely organized unit and then to render this unit U.M.S.U. fee conscious. This movement has been initiated and there is great confidence that the succeeding executives will carry it to a successful conclusion. On the whole, we should have great admiration for our Senior Stick, Lady Stick and members

of this council, and the work accomplished under their regime.

THE usual activities for which the Co-ed's Executive are responsible were carried out this year with their customary success. This success was due in no small part to the splendid co-operation of Mrs. R. C. Lodge, in her capacity as Honorary President, and we wish to take this opportunity of thanking Mrs. Lodge for her help.

The oath-taking ceremony and reception of freshmen was the first pleasant duty of the executive and through the hearty co-operation of all members the freshmen were made to feel at home and enjoy their first University function. The faculty tea and Co-ed's dinner were well attended and thoroughly enjoyed. In second term the Athletic Banquet, under the management of Kay Young, President of Athletics, was a great success. The tea in honor of the graduates, under the capable management of the Lady Stick elect, Betsy Tarr, was a very fitting farewell to the graduating class.

The Junior Executive did not function this year,

but we feel confident that next year they will have an opportunity of proving their usefulness, when we move out to the Fort Garry site.

THE Women's Self-Government Committee commenced its duties at the beginning of the first term, by conducting a freshmen examination. However, the committee did not insist that gowns be worn by all members of the sophomore Junior and Senior years, as they felt it was rather unfair to enforce this rule this year, in view of the financial situation. On occasion the committee has attempted also to quieten the over-noisy co-eds in the library. As usual, the members of the S.G.C. were hostesses at one of the tables at the S.C.M. Annual Guest Tea. Next year the committee will be reduced to one Senior and one Junior representative, as such a large committee is not really necessary.

ARTS DRAMATIC CAST

THE activities of the club were this year confined in the main to two dinner gatherings, both at the Bay, and both well attended.

The Freshman Banquet, held in October, following initiation ceremonies, in Theatre "A," brought the club members together for the first time. A short talk by Dean Tier, followed by an inspiring address by the popular Prof. Wright, concluded the evening's program.

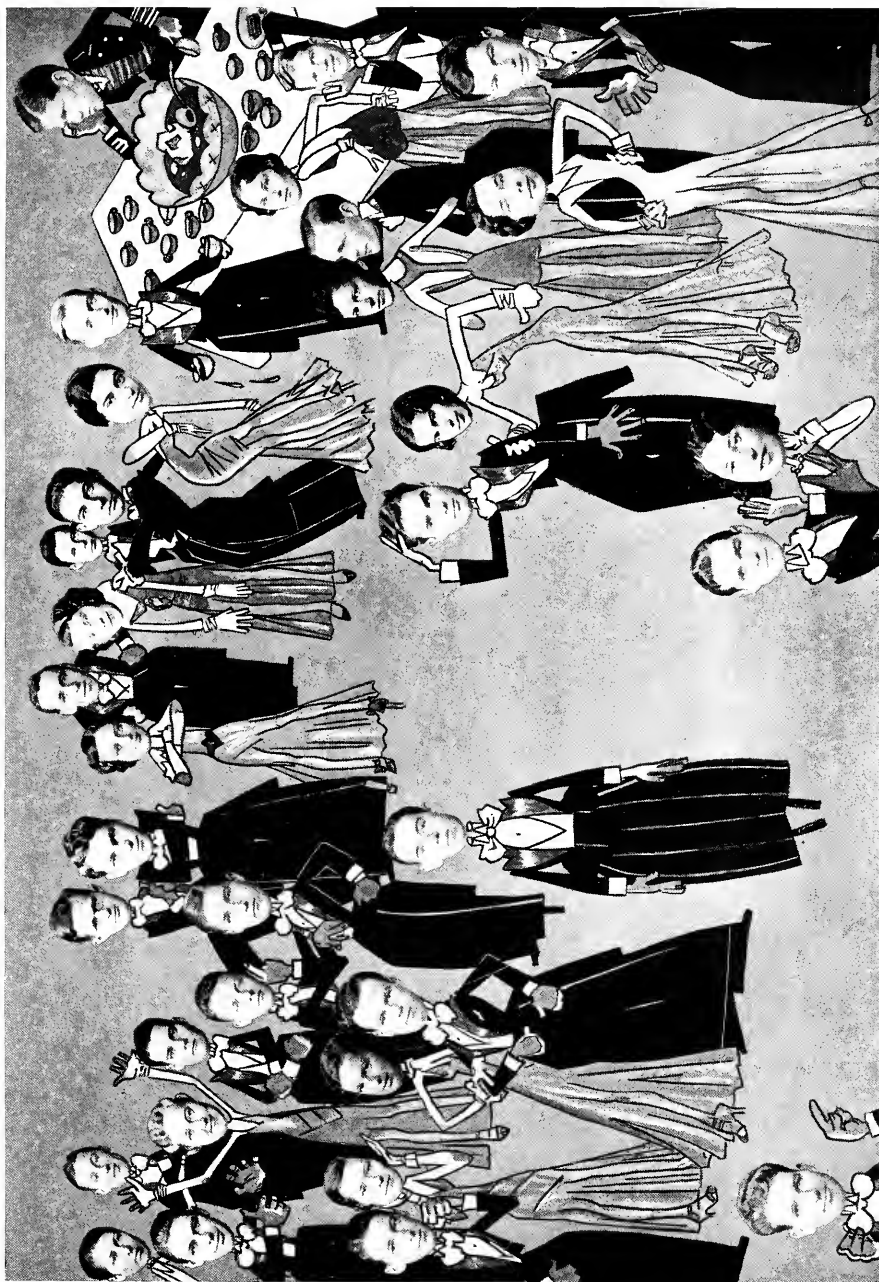

Mid-March brought the annual Athletic Banquet, at which meeting due homage was paid the deserving he-men of the faculty. Prof. Hunter Marshall warmed the hearts of his hearers with a sparkling address. Installation of new officers brought the evening to a close.

To the new officers, who are assuming their duties at a time when the faculty is to be temporarily divided, the retiring committee extends its very heartiest wishes for a successful year to be.

A NOTEWORTHY success was scored by the Arts Dramatic Society this year in its presentation of Maurice Meterlinck's "The Intruder." This intense drama was capably produced by Evelyn Morris, whose treatment of it was so skillful that every action of the players was artistic and to the point. The portrayal of the old grandfather was one of the finest that has been done for many years. The other characters ably assisted in effecting a splendid production of which the student body may well be proud. The play was later produced at the Little Theatre where it was enthusiastically received.

THE CAST:

The Grandfather	Elswood Guy
The Father	Arthur Patrick
The Uncle	William Palk
The Daughters	Eleanor Lodge, Joyce Heys, Beryl Rabinovitch
The Maid	Marion Brown
The Sister of Mercy	Virginia Davies

THE large number of participants in the various activities alone has marked this as a very successful year in the realm of Arts Athletics.

This Fall saw a keenly contested Golf Tournament, organized with a record entry and some outstanding play. Tennis, too, proved so popular, and so large was the entry, that the courts were snowed in before the finals came to a close. Such enthusiasm as this shows, is the most creditable side of our entire program.

The Arts Track Meet, though receiving very slight support, managed to produce material which won for Arts more points in the Inter-faculty Meet than we can remember having garnered since the year of the great snow, when the bluebirds flew backwards.

Thus, with such an auspicious start, Arts entered into the Inter-faculty competition with unbounded hopes. Not having sufficient interest shown in Soccer to warrant the entry of two teams, a Senior contingent went through the series with some success. Although not "bringing home the bacon," they made a very good showing indeed.

The Hockey season was entered upon with keen interest being shown, and every place on both senior and junior teams being closely contested at all times. Arts could be counted upon to give a good account of themselves, and we noticed with pleasure that several Arts men were on the plucky Varsity squad which made such a good showing. Unfortunately, due to the loss of one or two old stand-bys, the season came to a close without a championship being won. However, even greater enthusiasm was shown in the Inter-year games, which

were run off very successfully.

Basketball once again provided a real threat from Arts, the seniors dropped the play-offs by but a few points, while the juniors also acquitted themselves with credit. We were also pleased to see a number of Arts basketballers on the championship Junior and Senior Varsity teams.

Curling, which each year finds many new and enthusiastic supporters, was no exception this year and interest and competition were keen. Great credit is due to those rinks which made such a fine showing in the city bonspiel.

This year we were exceptionally proud of the swimming team which represented us in the newly formed Inter-faculty swimming contest, which was run off in conjunction with the Manitoba Swimming Association's Spring Gala.

ARTS DEBATING this year got away to a good start with a social evening and debate in conjunction. After this event a further group of debates were planned which for one reason or another failed to materialize. The first debate of the second term was, owing to very inclement weather, rather poorly attended, and those who did brave the elements certainly heard a very forceful presentation of a topic which has held a very prominent place in the minds of local citizens. This year's executive is sure that Arts Debating has not once fallen below its high standard—and wish next year's executive much success.

THE executive of the Council met weekly throughout the University year. The first duty of this group was to see that the Arts track meet and tennis tournament was run off on schedule. After Christmas, Hockey, Basketball, and Curling presented their problems, but all obstacles were passed with precision and fine organization.

The Arts Girl's Athletic Banquet, under the management of Kay Young, president of the Council, was the culmination of a splendid year of Arts Women's Athletics. Great credit is due the council for the way they adapted themselves to a reduced budget without curtailing their activities to any great extent.

ALTHOUGH, because of the depression, there was a scarcity of girls for Arts Hockey this year, the seniors, with only eight players, struggled along, and at the date of writing have lost three and won three games. Nothing to write home about, to be sure, but our coach, Les Cannon, seems well pleased with us, so why worry.

The Juniors, coached by Murray Turner, played no interfaculty hockey due to the lack of funds in other faculties. However, they played four games against the "Northern Light," a high school team, and succeeded in winning the final game.

THE Senior championship Hockey Trophy, which the Arts faculty was striving to obtain for the second successive year, has gone elsewhere this year. Only three of last year's team were back again this year and as a result the teams were rounded out by the last years junior players and by freshmen. The team was placed at somewhat of a disadvantage due to the fact that several Varsity Junior games were played on the night of inter-faculty games and thus three regular players were able to take part in only half

the scheduled games. However, even at that the team only missed the play-offs by one point.

The activities of the Junior team did not meet with as much success as the efforts of the seniors, but even though they were unable to win any of their scheduled matches, they succeeded in keeping the number of goals scored against them to only two. Most of their matches resulted in scoreless ties. The members of this team will add much to the possibility of a successful senior team next year.

THIS year, the track team, with the aid of a few dark horses in the farm of freshmen, was pulled out of the lowly position it has occupied for some years, to stand fourth.

The point winners, Pfeffer, Purdy and Hay, certainly showed their ability, the latter two being selected for the University Track team. With these men and recruits from the prospective freshman class we look forward to another successful year.

THIS year the Arts Co-eds again dominated at the Inter-faculty meet by carrying off the championship with a total of thirty-

two points and breaking the only two co-ed records. Gertrude Fuller tied for the individual championship, winning the 60-yard sprint, placing third in the 100 yards and winning the 220 to lower the previous record by one and one-fifth seconds. Mary Cooperband won the baseball throw, breaking the record by more than thirty feet. Another premier performer was Evelyn Blankstein, who placed second in each of the three weight events.

As a proof of their ability on track and field four of the girls made positions on the U.M.S.U. team and were by no means in the background. With plenty of excellent material on hand the arts co-eds are looking forward to annexing another championship next year.

UNDER the energetic and able tutelage of that incomparable manager, Harry McIntyre, the Arts team has risen to great heights. For instance they achieved first series honors, losing the second series by a few points to the Engineers. Then, in the first game of the play-offs for the inter-faculty championship, the Blue and White succeeded in tying the team that won the Western Canada Inter-collegiate Championship. Indeed they lost the title, but, not until the final whistle blew. Watch them next year!

FOR the first time in four years the Arts Co-ed's Basketball team came within an ace of beating their age-old rivals, the M.A.C. Unfortunately, just as victory was within their grasp, the Aggies uncorked one of their aggressive attacks, to mark up another and final win by a seven point margin. All of which it too bad; but then, Arts have the basis of a real team and next year, with the help of the Almighty, and a little more practice, Varsity Arts is going to produce an unbeatable quintette, or else!

THE prospects for Arts Soccer at the beginning of the season seemed far from bright. Due to the loss of Manitoba College grounds and to the complete breakup of last year's team, the work of organization was unusually difficult. So instead of entering two weak teams as usual, we concentrated upon building up a strong Junior team.

A summary of the season's play is as follows: a draw with United; a win over Meds; a loss to Aggie, in a game which should have been played in night-gowns; and last a win over St. Johns. We ended the season in second place, one point down.

The outlook for next season is good, most of this year's players will be back, and a splendid bunch they are. May they receive adequate support from

the faculty, and decent write-ups in The Manitoban.

AS THE basketball season draws to a close, the Arts Juniors may proudly look back upon a year of achievement, which, even if it has not brought back to Arts the mythical inter-faculty trophy, has at least seen the formation of a real team. Made up as it is largely of freshman material, it is decidedly not too-much to hope that next year it will measure up to all advance notices and show itself for the fast, clean, and heady team that it is.

JUST ARTS

DOC—I do love Alpine scenery, don't you? Too bad this view of the mountains was spoiled.

NEW ARTS—This just shows what Jack Frost can do to weepin' willers.

HARRY—
"Or like stout Cortez
when with eagle
eyes

He stared at the
Pacific—and all
his men
Look'd at each other
with a wild sur-
mise—
Silent upon a peak in
Darren."

CHIVERS—This
might be Bing Cros-
by: only the latter
quavers, not shivers.

OLD ARTS—Is
this an example of
college life on our
campus? Anyway,
the boy industriously
heading upstream is
none other than
Eph. Zilch.

JANE—Awright,
I'm mad, and you
can't play in my
back yard any more.
I won't play jacks
or hopscotch neither.
And you can gimme
back my skipping
rope.

ART—They
laughed when he
couped the clippon,
but look at him
now. Yes, look, but
don't laff. Cheez!
wotta man!

TURRY—How I wish I
hadn't given up my zither les-
sons, through those long winter
evenings it was my only con-
solation.
JIM—Well, it looks like
springtime in the Rockies again.
They say that this photograph
was the inspiration for that no-
torious novel—"Through the
Rockies with Lew Cody on a
teboggan."

ESTHER—All we can say is
that the sands of the desert will
never grow cold at this rate.

YUILL—This is Yool.
Pride of our school.
Nobody's fool.

HARRY—Well, Hi, suppose
hits nyce work hif yer kin get it.

GERDA and KAY—Don't tell
me, let me guess. Why of
course, it's our old school teach-
ers, Gerda Hieland and Kay
Morebert.

FLUFF—Hottha, or at any
rate, warmcha. She wears white
shoes on account of she can run
faster in white shoes. Fan mah
brow!

I DO not think that any graduating class has left the University with a prospect of such difficulty in the matter of obtaining employment as the class of 1932 may have to face. To have spent five years in training for a special kind of work and then at the moment of completing one's training, to be faced with a world that has little or no interest in one's special qualifications calls for a high degree of courage, of faith, and of determination.

You who graduate this year may not be able to secure at once the particular kind of work that you have set your heart upon, but whatever you find to do, do it with a purpose, do it with the feeling that no work is too trivial to be done thoroughly and well. Acquire the habit of turning out nothing but the best of which you are capable, and the habit will remain with you when your work assumes greater importance. Finally, remember always that enforced periods of leisure may be turned to useful account if they be not frittered away in mere idleness.

E. P. FETHERSTONHAUGH,
Dean

E. P. FETHERSTONHAUGH

ENGINEERING

LARRY M. ADAMSON—*Electrical*

Larry comes from Newdale, and is one of those boys who put Engineering on the map with his ability at curling, football and hockey. He is the envied lad of fourth year, occupying the coveted position of coach of the girls hockey team. However, some guys get all the breaks. Larry was U.M.S.U. president in his third year.

Weakness—Getting lost in the corridors of the Fort Garry

ROBERT A. CHIPMAN—*Electrical*

Bob has the highest "Rankine" at peak loads; his infinite capacity for a rapid charge of knowledge marks him as the class prodigy. His Steinmetzian reasoning is beyond the audio frequency band, perhaps that is why we do not detect his methods. Safely recommended as expert radio operator for the next Byrd expedition.

GEORGE T. L. ANDREWS—*Electrical*

The Pilot (ask about the name) landed in Engineering after hopping off from Backda's for the ministry, via St. Johns. Dared to be Daniel, and succeeded, as seen by the fuzz about the still upper lip. Phone numbers are his weakness, and he has a line all of his own. Don't make the mistake of giving him your girl's phone number.

Future—Professor in Electric traction.

S. FINDLAY CLARK—*Electrical*

Fin is a man with a past. He himself would hesitate to tell us many of the phases of his life story. He is thus to many of us a man of mystery. As a puzzle solver he has few equals. Leave him alone for a few minutes with a bridge problem. Culbertson could do no better. In his weaker moments Fin likes to discuss politics, philosophy, economics, or what have you.

Ambition—To find the Perfect Professor.

GEORGE E. BIGLOW—*Electrical*

George won his nickname "Eagle-Eye" in cuspidor hockey. He says he would like Engineering a lot better if it wore skirts. Was the best shot in the class in first year, with two windows to his credit. If you want an authority on removing a car from a snow-drift, here's your man. He also claims to have obtained more information than most of us on the trip to Slave Falls. However, if you want something done, let George do it.

Famous expression—Women are the spice of life.

BERNARD DOMEY—*Electrical*

A future consulting engineer, perhaps, who, when asked something will no doubt answer, "Ask the man who owns cnc." But withal he is a worthwhile friend. As for a scholar, judge for yourself; he managed to gather one supplemental in his sojourn at his alma mater. It must be the way you hold your mouth, Bernard.

E. S. BRADDELL—*Electrical*

Ed was born just about the time Edison invented the talking machine—maybe that accounts for it. He works slide rule answers to seven places. Probably learnt rapid planning and tactics in the O.T.C. where he obtained his "A" certifi. "Scotty's" favorite (?) hobby—extensive reports, practical reasoning, and gettings things done by remote control.

W. J. DUBESKI—*Electrical*

An earnest student with a full appreciation of the high character of his calling, a reputation for carefulness, punctuality, and a deep sense of duty. Went north last summer hoping to see a bear in his native haunts.

Ambition—To establish an electric railway in his back yard.

Weakness—Shows and chocolate bars.

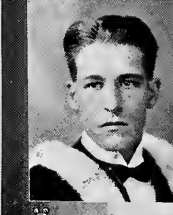

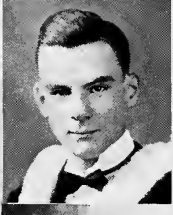

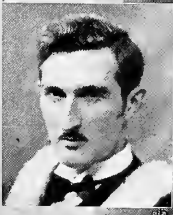

CECIL J. CAMERON—*Electrical*

Cec. hails from the land of the foothills—Calgary—and the name of "Slim" Cameron is a by-word in the Rockies. Installed the C.P.R. signal systems in his spare time during the holidays. Witty, cheerful, just a real square shooter. Shows flashes of brilliance and a real seriousness under a careless exterior.

Wine, women and induction motors.

STANLEY DUTCZAK—*Electrical*

Stan is our tall dark horse, who, thinking that wine, women, and song didn't fit in with his University course, gave up singing. Comes out with weird expressions in the draughting room occasionally, which you can't find in Webster. The boys at Churchill christened him "Gunny-sack," or something like that, but we don't know why, if you haven't heard the latest one, consult Stan.

ENGINEERING

WILLIAM J. HALPARIN—*Electrical*

Since initiation day this boy has felt that he was truly an Engineer. Tried to demonstrate it by laying his silver pencil across the d.c. bus-bars in the lab. His ability to worry A.C. problems "in absentia" is now his crowning achievement. Willie may have done better as a travelling salesman—he alone knows.

Familiar expression: "Where did'ya get that from?"

CLARENCE D. MURDOCK—*Electrical*

Although he claims Canora as his home town, we seem to hear a great deal more of Estevan. Anyway, Clarence is always willing to bet his last nickel on Saskatchewan, in any game, and against any odds. It seems that he took his first two years there. He will argue on any subject, from women to politics, and has never lost one argument in his own estimation. Ask him about the approach-force system, as outlined by Strangler Lewis.

Three weaknesses—Bridge, bridge, and bridge.

G. LESLIE HOOD—*Electrical*

A product of Glen Ewen, Saskatchewan, and Oxbow High School, where he showed them how by winning a Governor General's medal. He is a follower of the misogynistic league, although he started to disobey the rules in fourth year. He seems to occupy the position of class consulting Engineer; enjoys a brisk mathematical workout, and is most efficient at peak loads. He claims that Differential Equations are the spice of life, but we think that was due to other influences. Just a darn good Engineer.

WALTER M. MURRAY—*Electrical*

After graduation in Civil Engineering, Walter decided to join a class of live wires and get a great kick throwing switches and circuit breakers. He is a constant worker and thoroughly enjoys writing A.C. reports. A natural aptitude for reading a wide variety of subjects, coupled with a marked weakness for Celebrity Concerts.

KENNETH G. LAING—*Electrical*

Ken, as we know him, really only represents one half of a complete unit, the other half being—well, use your own imagination. Ask him how many games he won in the 1932 Bonspiel, or how to eliminate the hum from a loud speaker. He can tickle the ivories till your toes tingle, and is an expert at chasing the colored balls around the green tables. He's a stay at home man, but not his own home.

Secret ambition—To get married.

GEORGE A. McKAY—*Electrical*

George went to Churchill in '31 to play horse for Carter-Halls, and from what he said, we don't think he enjoyed the game very much. He delights in poring over a mathematical text-book, and in arguing with the profs. Plays hockey and football. A very deep and practical thinker, with a big future.

"Who wants to buy a first mortgage gold bond on a Kv.A. meter."

DONALD F. H. MARTIN—*Electrical*

When you want a dance or a class party put on in grand style, Don can sure do it. You should also head him as as radio announcer, or possibly you weren't at the Crook's Tour. He was "Miss Taken" for a chorus girl once, but Engineering has made a man out of him since. The social man of class '32.

Ambitions—to get a report in ahead of time.

W. B. PETERKIN—*Electrical*

Bill registered in Engineering, and the Profs. have been looking for him ever since. While the draughting room resounded in echoes disconsolate, "where's that man Peterkin." Bill was achieving greater fame in a finer art. As president, he led the Glee Club to the pinnacles of success. His theories on flange and aqueous friction have baffled the keenest of intellects.

Famous last word—"Why pick on me?"

LESLIE J. MOULDER—*Electrical*

Les hails from Merrie England. He has served time in several institutions (chiefly educational) all the way across Canada.

U.B.C. was his first alma mater, but he seems to have been fairly happy with us for the past four years.

As for ourselves, we have gradually learned to suffer in silence under his puns.

Ambition—the attainment of sufficient will power to withstand the line of the cue game.

PHILIP W. PINN—*Electrical*

Good old "Safety"—from Gladstone. Claims he has a sure system for distinguishing twins, but we think it's taking an awful chance. He's a quiet chap—how come he plays the roarin' game? Remained pure for four years, but this year he has taken to smoking. Remember, Phil, you can't hold down a good job doing things by "halves."

The man who knows.

ENGINEERING

JOE POPESKI—*Electrical*

The big question mark of the class. His rate of asking questions varies inversely with the amount of lecture notes taken per hour. Joe has been with as many as two of the fair sex at once, so he may be just a Romeo in disguise. He has a reputation for his hair-splitting accuracy, even to getting 6 places on a slide rule. Enjoys hanging on to 220 volt wires, just for fun.

Theme song—"Please sir, Prof.—I didn't quite get that."

HYMIE FLEISHMAN—*Civil*

We all envy Hymie, his pure innocent soul—but why bring that up. He's a bear for detail which proves him an efficient and get-ahead able engineer. He's everybody's friend and has a heart as big as the big, Give Hymie a Kirkham's text and a package of Wrigley's and immediately the clouds are scattered and the sun shines for him. He learned how to say "damn" with profound meaning in Churchill last summer. His pet theories on women are kept very secret.

LLYOD G. SCOTT—*Electrical*

He originated the Roblin-Hood combination, to keep himself in the dark woods, but lately we have been able to get a "Langside" this most "gracious" fellow, and learn how he is always able to pull down the highest mark. No problem or situation is too intricate for Lloyd; he can enjoy most any. Should give a good account of himself before long.

Favorite (?) lab.—Electrical measurements.

JOHN M. GRIDDALE—*Civil*

Jack has gathered his Engineering experience and inspiration working during the summers with the City Engineer and the C.P.R. His college interests are many, among them are hockey, football, sorority balls, and, of course, his studies. When it comes to absorbing knocks and broken bones, Jack makes an excellent sponge. He has had everything from appendicitis and gallstones to broken collar bones.

HARRY SHATLHAM—*Electrical*

Harry is our one and only red head. Takes life with slide rule accuracy, that is close enough for practical purposes. He is always willing to lend a hand—especially a 4th in bridge.

Favorite pastimes—Reading, bridge and tennis.

HENRY KREUTZER—*Civil*

Class '32 certainly got a break when Henry took to Engineering. After several years of Normal and teaching, he put such things away and came to college. Henry is one of those men who doesn't know his own strength, a true friend with a heart of gold. Steinbach, his home town, must be a great place to be able to give up men like Henry. Politics, wars, and murders keep him supplied with food for argument, and last but not least, he reads "Hush" and thinks Janet is a honey.

BILL CAPELLE—*Civil*

Conscientious Bill is the type that if he can't go through he'll go around or over, but he gets there for 'a' that. Railway Engineering and Geodesy fascinate him something awful. He would no doubt be the world's greatest cross country hiker if he went out for that sort of thing. Just a big strong silent man—Bill.

BRUNELLE LEVEILLE—*Civil*

We respect Brunelle's quite wisdom and weighty words. He does things. His pet subject is Municipal Engineering. He's aiming to get his B.S.D. after getting his Civil Engineering. A strong ambition indeed. According to rumors Brunelle is a true 40-beer Engineer, but of course it is only hearsay.

DAVID C. M. DUNCAN—*Civil*

We are proud of our Valentino. Though peaceful and inclined to silence, Conrad would abhor life and studies if he didn't find consolations in life in friendships and love. A love sincere and faithful as himself. We now understand why he is a dreamer: Can we blame him? Aren't we all? We wish him a successful career, accompanied by the same delicious romance which is now the spice of his fate.

EDMUND J. LINDSAY—*Civil*

Since his first year at University Ed has always been engaged in social activities, and has devoted much of his spare time to them. He has held important offices in various organizations to which he was appointed by reason of his financial abilities. Indeed, he has sold as many tickets and signed so many checks during his student life that we would recommend him as a circus manager, if he had not taken Engineering. We shall remember him as a gay companion and an energetic leader.

ENGINEERING

MARKLAND N. McEWEN—Civil

Mac is a born philosopher. His wit and good humor are well appreciated in conversation. Our friend Krutzer, having found him to be a second Graham MacNamee, is considering asking his services for his coming political campaign. We have heard that Mac has recently been awarded a contract for the repairing of a cottage at the beach. This will undoubtedly be the humble debut of a great engineer.

STANLEY SMITH—Civil

Stan is a sport enthusiast, with a preference for basketball. He has acquired valuable experience as a salesman, making a specialty of selling magazines and ladies' shoes. His success in this is due, no doubt, to his good looks and his magnetic personality. Who knows how far this will carry him on the road to personality? No one can tell. But we are assured he will achieve great things.

CLARENCE MCGOWAN—Civil

Clarence hails from Carman (there's a town as is a town) and rightly proud they are of him. Mac makes it hard for the rest of us. By attending too many lectures and paying up to the pros. His strong subjects are Chemistry and Thermo (not to mention Frazzle Lee). He is a captain in the C.O.T.C. and would rather go on parade than eat. The working girls may have their Rudy Valle, but we have our Clarence.

L. M. STEVENSON—Civil

Stevie has discriminating tastes which led him to be set on class '32 the great honor of graduating with him, and indeed it is an honor for he is one of the best. He has a way of telling jokes in the draughting room which simply demands your attention. His big moment in Highway Engineering and he has worked for two summers with Good Roads gaining experience in that line. Stevie gets a great kick out of pillow fighting in the Wesley residence.

JOHN N. McLEAN—Civil

Spick is a crooner, and often charms his classmates with his melodious voice. He could have successfully performed with the Glee Club had he not preferred to give his whole attention and energy to his studies. Some engineers in the past have succeeded in other branches of human activity, and we would not be surprised, therefore, to see John go through Hollywood.

MAX S. WEDRO—Civil

Max is a martyr to the noble cause of welded joints versus riveted joints and steel construction. He dreams about them which isn't so good. As a talker after lunch he has an argument with Capelle every day; this is continued on their daily cross country trek to their respective domiciles which leaves Max busting out in sweat all over in trying to keep up with Bill's long legs. Max really is a hot number when it comes to bridge design for he certainly knows his gussets. His favorite sport is swimming.

WARREN W. MILLER—Civil

We take our hats off to our Senior Stick! Besides being a capable organizer, Warren shines in athletics. He was quarter-back of the University Rugby team which traveled West last fall, and is also a valuable player on the Engineer's hockey team. In sports and in other activities, he always strove to hold high the pennant of our faculty and his efforts were rewarded with success.

RUDOLF J. WILLIAMS—Civil

Rudy is our scholarship student. He devotes his life to studies, with strong inclinations for structural design. He recently won the prize given by the Winnipeg branch of Engineering Institute of Canada for his summer thesis on Churchill. Congratulations, Rudy! Well gifted and endowed with the virtues of perseverance, Rudy will no doubt succeed in life and do honor to the profession he has chosen.

GORDON L. SCOTT—Civil

The pride of Govan! One man in a thousand. He possesses that subtle sense of humor that is extremely enjoyable to his neighbors and fellow students. Scott never worries, he lets the others do that. We feel that we shall remember Scotty a long time.

BEN J. COHEN—Architecture

The playboy of Architecture. An authority on movie stars and radio crooners, he has avoided many strenuous afternoons and evenings doing research in these fields. However, examinations hold no terrors for our little "Ice Cream Cohen."

He has no wife to bother his life,
No lover to prove untrue,
So all day long he sings his song
And paddles his own canoe.

ARCHITECTURE

J. KASIMIR JASTREMSKY—Architecture

Activities—
Basketball.
Track.
Boys' Parliament.
Pastimes—
Attending University.
Pea shooting.

WILLIAM E. SHEETS—Architecture

Bill stepped through Architecture in three years but managed to drag along with him a couple of scholarships. He obtained these between duties as Architectural Society President and Engineering Council representative. Spends his summers, spending Saskatchewan Government taxes on Saskatchewan Government beauties. What Architecture loses the world gains. Men and women!

H. ISADORE RICHMAN—Architecture

First two years he spent in Arts.
Making up his mind.
Then with vigor and resolve.
He left them flat behind.
Arriving safe in our domain.
He started life anew.
Making friends on every hand
Around the good old "U".
Now he is a Specialist.
Mathematics are his meat
In days to come you'll see his work
In building down the Street.

HENRY F. STEVENSON—Architecture

Harry first showed Architectural tendencies at the age of two years—one day while plunging across the floor he stumbled over his blocks and raised a projection on his dome. "Enough," said Harry—"I'm going to be an Architect." Lost for two years in Arts, he came to us in '29. Harry has been a student of outstanding merit, has actively engaged in sports—held the office of Vice-President of Architectural Society. We're all for you Harry.

EDWARD W. ROGERSON—Architecture

Clever as you make 'em.
Here's a friend sincere.
Ambitious ad infinitum
And scholarships last year.
Liked by all who know him.
He's loyal through thick and thin.
Architect of great renown
Is the prophecy for him.

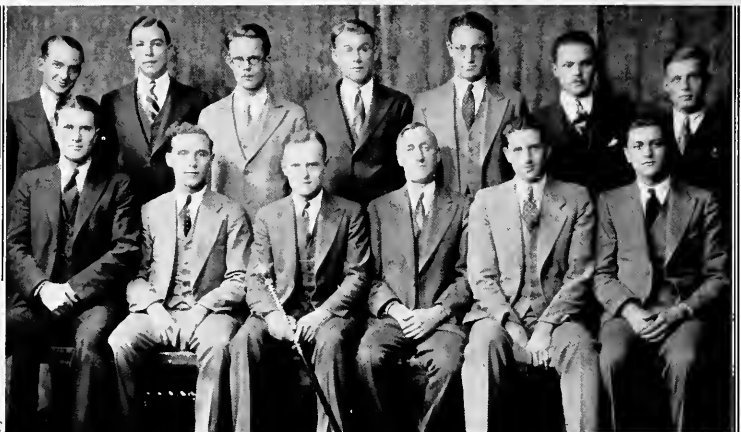

S. ETHELYN WALLACE, B.A.—Architecture

Ethelyn entered Architecture in the Fall of '28, leaving an enviable record of scholastic achievement and athletic prowess in Varsity Arts. This personable young lady has hummed and smiled her way through three years of structural, strength and drafting—has been actively identified with student organizations—has established herself as one of the outstanding bowlers and curlers of the department—and in general has been "One of the Boys." Architecture is proud to present its "First Lady."

ENGINEERING EXECUTIVE COUNCIL

Back Row—H. Shitray, W. Sheets, K. Bjerring, W. Trott, E. St. Mars, E. Rhodes, D. Brazier.
Front Row—C. Rutledge, H. Smith, W. Miller (Senior Stick), Prof. H. Herriott, E. Lindsay, D. Martin.

SHORTLY after the opening of the Engineering lectures it was found that the registration showed a greater increase than ever before.

The council enjoyed a year of excellent co-operation under the capable direction of Warren Miller, the senior stick.

Under Don Martin, the social committee staged two very successful dances, Frosh Nite and Crooks Tour, the Grad farewell gives promise of being on the same high scale of quality.

The Society meetings have all been well attended; inter-year debates added a note of interest and talks by Prof. Findlayson, Mr. J. W. Sanger, and Hon. D. G. Mackenzie have added a wide store to our practical information.

The Society staged another very successful trip, this time a tour of the Point Du Bois and the new Slave Falls plants, through the courtesy of the City Hydro.

The strong Engineering track team moved from second to top place in the inter-faculty meet, and added their quota to the U.M.S.U. team.

The U.M.S.U. rugby squad saw seven players representing the faculty, while the basketball team had five, with Cece Colpitts acting as manager.

In the inter-faculty basketball, the seniors captured the Birks "A" trophy, and the juniors, though defeated, show promising material for a winning team.

Curling, our largest sporting representation, brought no championships home, but the teams ranked high.

In football the seniors were finalists and the juniors also did fighting. Hockey saw the seniors tied for first place and the juniors eliminated in the play-offs.

The men of stone and steel continue to show their versatility with the "Slide Rule," Engineering's own publication, rising to new heights under Fin Clark and Wm. Trott; and a second outstanding performance in the one-act plays.

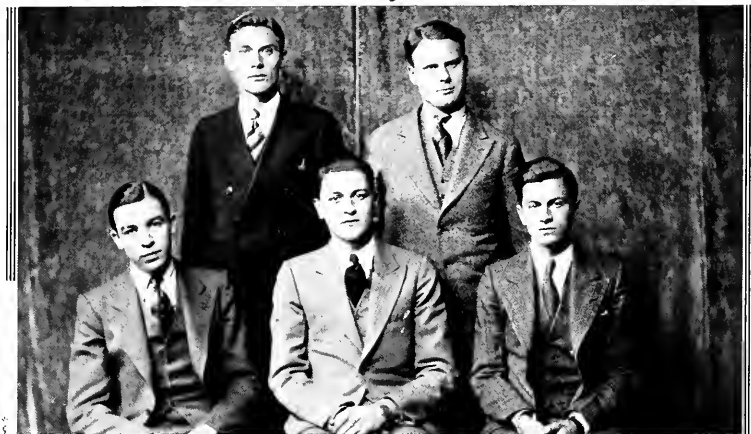

Never in the history of the University has a class graduated in such circumstances as confront us today, but we are confident that every man will prove his ability and make his presence felt.

ENGINEERING ATHLETIC EXECUTIVE

*Back Row—S. Smith, C. Johnston.
Front Row—J. Grisdale, T. Crayston, D. Brazier.*

ENGINEERING SOCIAL COMMITTEE

*Back Row—J. Scott, J. Whyard.
Front Row—W. Sheets, D. Martin, W. Fotheringham.*

ON looking back over Engineering achievements in the realm of sport during the current season, another milestone of athletic prowess has been passed. At the beginning of the fall term the Engineering faculty terminated the Medical reign of supremacy on the cinder path and sand pits.

The football teams played truly representative football for which Engineering has been noted, finishing with the senior team defeated in the finals.

The basketball team again retained the senior inter-faculty championship, while the junior representatives lost out by the closest margin.

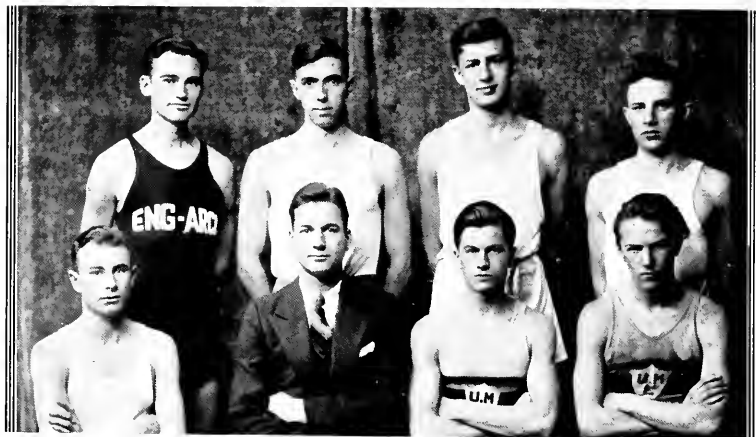

The inter-faculty curling team, although not as successful as in former years, terminated a fine year with a wealth of material available for the future.

The colors of Engineering were, however, more successful in the realm of hockey than in any previous years. The junior team, intact for next year, lost a close season to St. John's. The seniors, at the time of writing, are in the finals with U.C. and hope for the best.

A truly representative number of athletes from Engineering will be seen on all the University teams including track, rugby, hockey and basketball.

THE Engineers are justly proud of the singularly high social standing they have achieved in regard to all their functions. This tradition has been nobly upheld by Don Martin and his staff this year. The outstanding successes of Fresh Nite and The Radio City dance, with their original and interesting innovations, their large and representative attendance, give promise of the Grads Farewell bringing the committee's work to a most gratifying and satisfactory close.

ENGINEERING TRACK TEAM

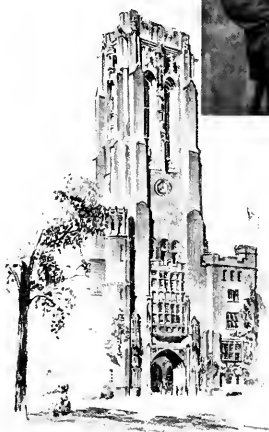

Back Row—T. Drew, L. Howe, K. Whatmough, E. Sandilands.
Front Row—G. McLeod, T. Crayston, W. Fotheringham, M. Dale.

ENGINEERING INTER- FACULTY CURLING

Back Row—D. Brazier, P. Pinn, G. Henson, D. Dunlop.
Front Row—J. Youngman, C. Johnston, W. E. Smith, R. McKenzie.

AFTER eleven years' supremacy, the Medicals were forced to surrender their track and field laurels to the fleet-footed bridge builders, who led the day with a total of 42 points.

Carrick accounted for a third of the points by placing first, second and third in the high hurdles, discus and running high jump, respectively. Drew added 8 points by taking first in the low and second in the high hurdles. Bourszynski again demonstrated his prowess in the field events by capturing the javelin throw. He was backed by Coleman, who took the shot-put.

The freshmen won recognition when Dale, Whatmough and Korcheski proved point getters. Sector, Carrick, Coleman, and Korcheski comprised the fast stepping relay team which won the final event of the day.

THE past season was probably the best enjoyed by the Engineers, that is, with regard to the evident enjoyment of the large number taking part in the most popular sport in our faculty. Although not having the honor of gaining first place in inter-faculty play, we always gave considerable worry to our opponents before succumbing to defeat. However, next year, with the aid of the Senior Stick, we plan to make it a banner year for Engineering curling.

ENGINEERING SENIOR FOOTBALL

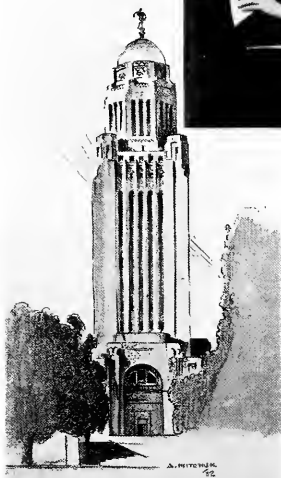

Back Row—J. Cherenkora, C. Spice, H. Fargey, W. Smith, N. Linnone, B. McConnell.
Front Row—D. Brazier, H. Finness, C. Wren, J. Crisdale, T. Kwiatkowski.

ENGINEERING JUNIOR FOOTBALL

Back Row—G. L. Scott, M. McEwen, W. Okonski, D. Duncan, L. Marshall, J. Lockhart.
Front Row—M. Schom, F. Felstead, S. Gerlovin, W. Quilliams, I. Glantz.

THIS team was made up of a few of last year's junior finalists and senior players, and was further strengthened by the addition of four new men who had just entered the faculty. The team looked like the most promising in years and after losing the first game to United we took Medicals, Science and Aggies into camp. The league finished with Aggies, United and Engineers in a tie for first place. A draw was taken with United getting the bye. Engineers and Aggies played to a tie in the first game and in the second game the agriculturists won one to nothing. This senior team will be practically intact next year and we have expectations of a championship line-up.

THE tryouts for the juniors saw the largest turnout in years, and it took several practices to select the team. The team played four games and were rewarded with a fair degree of success by winning two games, tying one, and losing one. All the games were hard fought and the boys were disappointed in that they just missed getting into the finals. This team was made up mostly of last year's junior finalists, so that there was plenty of experience in the ranks to help along the new members.

ENGINEERING SENIOR BASKETBALL

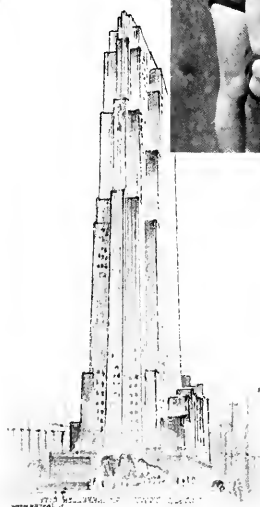

Back Row—C. Proudfoot, A. Nitchuk, S. Carrick.
Front Row—S. Kaplan, G. Earl, W. Dydyk.

ENGINEERING JUNIOR BASKETBALL

Back Row—G. Leckie, C. Byers, R. Moore, A. Billinkoff.
Front Row—M. Dale, S. Smith, C. Brown, J. Youngman.

ON looking back over the records of year 1930-31, it will be found that the Engineering basketballers set up an unbeatable record, winning both Birks "A" and Birks "B" trophies. In this past year although both senior and junior teams were at least as good, if not better, than last year's teams, the seniors only managed to raise the Engineering colors by defending their right to the Birks "A" cup.

In the senior league a much higher grade of basketball was displayed in all games than in any previous year. A keen, healthy, competitive spirit kept the interest sky high.

The Engineering senior team was rather fortunate this year in that it was composed mainly of Varsity senior players. The fine spirit of team work in all games played drew admiration from both the opposing teams and the audience. It need not be stated here at any length that every individual on the team is eligible to play again next year, so beware Arts and M.A.C.

ONE of the chief difficulties that had to be coped with by former basketball reps was the shortage of material for a junior team. Happily this difficulty did not present itself this year and a very patriotic spirit was shown by all basketballers in all classes. The support of the picked team at every game was practically 100 per cent. Closely contested games throughout the league kept the leading position bouncing from team to team. It can be safely said here that the junior Engineering team was looked upon as a formidable opponent from the very start of the basketball season to the end.

The Engineering Society extends its thanks to both junior and senior players for their loyal support and services rendered.

ENGINEERING SENIOR HOCKEY

*Back Row—J. Willows, N. Iannone, H. Shirray, G. Johnson, L. Adamson.
Front Row—R. Marvin, J. Grisdale, D. Brazier, W. Miller, K. Truman.*

ENGINEERING JUNIOR HOCKEY

*Back Row—J. Cooper, G. McKay, J. Isbister, T. Hill.
Front Row—F. Vance, W. Ramsay, H. Fargy, H. Finsness, R. Sellors.*

THE Engineering faculty put her best foot forward in the Senior Inter-Faculty Hockey League. After a start that was anything but hopeful, the team soon settled down to a steady brand of hockey and came through with flying colors, finally succeeding in engaging United Colleges for the Inter-Faculty Championship. At the present time one game still remains to be played, and the team is conceded a good chance to gain the trophy.

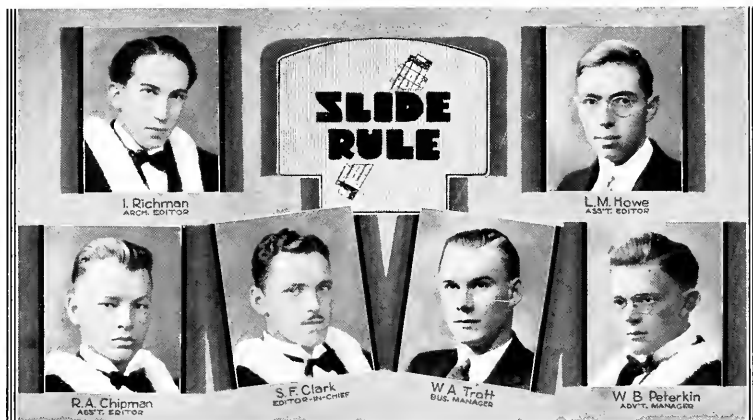

OUR representatives in the Junior Inter-Faculty League had a most successful season, but for the simple reason that the type of hockey served up in this division was of an unusually high calibre. We were forced to bow to stronger teams. However, at the end of the schedule the juniors were well up, tying for second place. The abundance of material that is forthcoming leads us to entertain high hopes for next year.

ENGINEERING DRAMATICS

Back Row—T. Hill, G. Brown, L. Hood, C. Johnston, L. Marshall, C. Brown, E. Rhodes.
Front Row—G. Scott, H. Jomini, M. Duff, C. Rutledge, R. Williamson

ENGINEERING SLIDE-RULE STAFF

CONTINUING the highly successful experiment of last year, the Engineers second venture into the field of drama merited signal honors.

The brotherhood have a love of the sea and this year we were drawn from the murky depths of the ocean floor, and lead, driven, and cajoled by the mystic influence of Nancy Pypier, into the hard, glistening wastes of the "frozen polar seas, there to catch the spirit of men "frozen in;" the slow, deadly power of the great white desert.

It was recalled in October that there were co-eds in Architecture and a remarkable little character actress was discovered in Margot Duff. The other lead was played by another newcomer to the faculty, Lawrence Marshall, who revived traditions of the days of "Wooden ships and Iron men." The

dramatics representative, Carvel Rutledge and a committee handled the detail work and the Architects were responsible for the very effective set.

STILL the only engineering publication in Canada, the "Slide Rule" has passed through a second year of success marked by a wider interest inside and outside the faculty. Three issues were published this season, the majority of the articles in which were written from experiences on the part of the students themselves.

This publication is destined to become a most important adjunct to the life of the faculty if given the necessary impetus, and this it surely merits.

THE United Colleges (Manitoba and Wesley) began in a very humble way. Each institution had its beginning by holding classes in log cabins about the time that Manitoba became a province. Manitoba College, in 1871, with the late Dr. George Bryce as the principal, was established by the staunch group of Presbyterians who had set up their "Auld Kirk" in the Red River settlement in 1854. It was solely an Arts institution. The Wesleyan Institute, in 1873, with Mr. Allan Bowerman as principal, took charge of primary and secondary education only. It was four years later, in 1877 that the University of Manitoba was founded. Both Manitoba and Wesley Colleges were affiliated with the University at this time, the former college having the honor of preparing the first graduate to receive a degree from Manitoba University. Several changes were made during these early years, the Wesleyan Institute having been established in a building near where the Canadian National Office stands today. In 1881 Manitoba College purchased its present site from the Hudson Bay Company and two years later established its theological department. The first classes after Wesley received its charter were held in 1888, in Grace Church. Later moves took the college to Albert Street, then Edmonton Street, at Broadway, and in 1896 the present college was opened on the Portage and Balmoral site. The present site of Wesley College was at this time "quite" a distance out of town.

The two colleges taught both Arts and Theology until 1914, when the former course was dropped by Manitoba College. In 1925, when the union of the churches came about the two colleges became known as the United Colleges, Manitoba taking over all the Theological work and Wesley continuing with the Arts courses.

Expansion has been continued until today the United Colleges has a larger registration than at any time in its history. The two colleges are indeed united now under one roof and we look forward to continued expansion leading to a bigger and better building taking its place in the University of tomorrow.

Wesley College.

O. T. ANDERSON

UNITED COLLEGES

L. GRANT BRÄGG

This brilliant student entered United College in his second year, coming from Wapella, Sask. In his third year he was Bulletin Board Editor of Vox, and a member of the Athletic Council, while he served as Treasurer of the Student Council during the first term of this year. Grant has an enviable scholastic record and is taking an Honors Course in Science.

ALICE COX

She has achieved success who has lived well, laughed often, and loved much; who has filled her niche and accomplished her task; who has never lacked appreciation of college life or failed to help; who has looked for the best in others and given them the best she had—that's Alice.

JAMES MACKAY

Jim will look back on a college career, of studies and activity, silently and steadily pursued with pleasure, and on those not-to-silent periods when he helped to cheer rugby games to victory. He will look back on an unostentatious four years and know he found them worth while.

F. STANLEY GAMEY

In 1927 Stan was initiated into Wesley, and since has invaded the realms of golf, inter-faculty curling, the Social and Literary executive and the Athletic Council. A quiet reserved nature lends depth to his interesting personality. Stan is difficult to know, but his friendship is not the kind that is bought at a fair.

LUELLA J. SPRUNG

As a freshman, we learned to respect her for her many accomplishments, as a junior we welcomed her friendship and advice, but it was as our Lady Stick that we really grew to love her and value her true worth.

OLIVE GLINZ

Olive is known to all by her friendly and unassuming manner, carrying with it a sense of dignity and charm, which goes to make up her interesting personality. Her varied interest in all activities, her sincerity and ability to contribute to college life have merited her the honored position of Lady Stick. A bright and successful future is the wish of her many friends.

HAZELLE R. BERGSTROM

Here's to the girl with the ready smile,
Ability plus—a peppy style;
Zealous—good turns in her college days;
Eager for fun—and winsome ways,
Loads of achievement in many spheres,
Luck go with you, and laughter—some tears,
Every joy in the coming years,
to Hazelle.

LINDA R. HARDER

She's deep, thoughtful, interesting, kindly and warm-hearted, but—
"Heaven help the adorer,
Who happens to bore her.
The lover who weakens her spleen;
But too blest for a sinner
Is he who shall win her
And Linda's the one whom I mean."

JAMES BROWN

Quiet at home anywhere, whether it be the class room, a mission field, a dance floor, a football field, or curling rink—that's Jim. Jim's pep, sportsmanship and clear understanding of human nature will carry him far in life's ambition and goal—that of medical-missionary in Northern Canada. Good luck, Parson!

W. WESLEY HARLAND

A native of Treherne, and an original '31, Wes returned to Wesley to join Class '32 as a Jolly Junior. Interested in everything—member of the U.C. track team as a sophomore, championship debater, and President of Dramatics as a Senior. Withal, Wes has found time for productive study and many lasting friendships.

UNITED COLLEGES

RICHARD HERZER

Wesley is proud of Dick on account of his scholastic ability, though he has not shown us that other side, which Browning talked about when he said:

"Two soul-sides,
One to face the world with:
One to show a woman . . ."

—yet his personality augurs for its presence. Here's luck, Dick! We expect great things of you.

BARBARA J. MILLER

Barbara is a girl who is true to her friends and work, with allowing anything to disturb her tranquility. Since joining Class '32 in her second year, her pleasing personality and love of fun have endeared her to us. Her various activities include skating, dancing, tennis and incidentally—concerts.

HANDFORD HIBBERT

"Red" is an "It" of Boissevain. His disposition, executive ability, and keen interest in all student activities make him the appropriate choice for Senior Stick. A ready sympathy and willingness to help others regardless of his own difficulties have won him a host of enduring friendships and the esteem of all.

LOUISE McPHERDSON

A newcomer in our midst! Yes, and a hard working one, too. Louise has taken her first three years extraordinarily, and is the kind who pulls down the marks. A better friend is not to be found, although some think her reserved. Sincerity is her "password."

MARGARET JOHNSTON

Margaret Johnston a B.A. to be
To college did go to get this degree.
Varsity's halls echoed her glee
Then Wesley heard this laughing spree.
Her appetite no doubt is handy
To cope with her feasts of peanuts and candy.

ROY MUSGROVE

As a medalist in this year's golf tournament, and as goalie on Varsity hockey squad, Roy is well known to all. His proficiency outside the sport world must not be overlooked, however, so that we may say in general of him: "A cheerful, active mind, in an athletic body."

KATHLEEN MAIN

After spending two years at Varsity, Kay successfully overcame that handicap and joined forces with Wesley in her Senior Year. She possesses a keen sense of humor (especially when in the library) yet shows a faculty for serious thinking at exam. time.
Weakness—Deutsch.
Pastime—More Deutsch.

MARGUERITE OASTLER

Marguerite, her name describes her. A girl in whom we find a pleasing personality, ready wit and admirable sportsmanship. Besides possessing scholastic ability she is an enthusiast of curling, hockey, dancing and "debating." Her merry twinkle and cheery smile will carry her far.

MARGARET C. MELLISH

Mirthful, active, responsible, generous, ambitious, resourceful, true—put altogether the result is Margaret. To this add a keen interest in all college activities, with a preference for athletics and dramatics.

THELMA PENNEY

A sincere friend, peppy and with a ready laugh. Tel has endeared herself to all. Only eight o'clock lectures can ruffle her good-natured disposition. Besides tennis, skating, curling, dramatics and social activities, she finds time to spend the odd hour in the library.

UNITED COLLEGES

NITA N. PERVESEFF

A doughty philosopher; intends to become a librarian, so books are her hobby. The kind of girl who doesn't push herself into the footlights, but works industriously off-stage. Despite Nita's high ambitions we feel assured her energies will soon be spent in making some "lucky dog" happy.

ALICE O. SOLSTAD

First impressions are not always true. Al appears quiet only to those who are not acquainted with her. Her friends know her to be gifted with a great sense of humor and a fund of good nature. She always accomplishes what she sets out to do.

LILIAN RACEY

Freshette: Shy—scholarship—a few good friends.
Sophomore: Less shy—debating—less study—S.C.M.—new friends—hospitality.
Junior: Quite at home—debating—executives—even less studying—committees—too many friends.
Senior: Debating—executives—parties—men—entertaining—midnight oil—Buffalo—rushing.
Future: China.
"Nothing is too good to say about Lil."

MARGARET THOMSON

Subject: A write-up.
Material:
Veracity: "To follow truth as blind men seek for light."
Vivacity: "'Tis the songs she sings and the smiles she wears, that scatter the sunshine everywhere."
Pugnacity: That "never-say-die" spirit.
Result: Our friend Margaret.

CASPER RUHR

"He's not very tall . . ."
But well designed.
At times refined.
A merry mind
Socially inclined.
Giri—blind
"Cappie"—defined.

WILFRED TURNBULL

Coming to United from the University of Sask., Fred lost no time in proving himself a worthy addition to Class '32. Intensely interested in class and college activities. Has a weakness for blondes and Soc. and Lit. meetings. Future uncertain, but likely that of understudy of Einstein. Incidentally Fred is Student Treasurer.

CLARENCE SAMIS

"Sammy" hails from Arcola, where he got his introduction to Maths., and where he played his first tricks. As we have come to know him, we have become used to his slyness, and have come to recognize in him qualities of true sportsmanship and a desire to get at the bottom of things. Sammy will receive his science degree and will go forth to inspire others to do likewise.

EVELYN WHITE

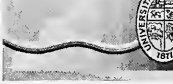

Irish ancestry has been kind to Evelyn in giving her a lovable personality, and laughing Irish eyes. Always has a smile and a kind word for everybody. Fond of signing out English books, but we suspect she doesn't read them. Evelyn's aspiration is that of private secretary in Ottawa or Vancouver. Now, Evelyn! !

WILLIAM H. SHAVER

Ambitious, cheerful, active, efficient, original, with round common sense—that's Bill. Enthusiastic supporter of college activities, filling to the full such offices as President of Social and Lit., the History Club, and his class in his graduating year. If your college career is any criterion, well, the world is yours, Bill.

NANCY WHYTE

Vice-President of '32; a girl whose piquant charm and unassuming grace are so undeniable that we confidently predict Nan to be one of the future traditions of Wesley. A flashing sports woman, a delightful friend, the essence of class spirit. The question presents itself what would Social and Lit. and the whole class do without her?

UNITED STUDENT COUNCIL

UNITED Colleges have been very fortunate to have Senior Stick O. Handford Hibbert guiding the destinies of the Student Council this year. "Red" has discharged his duty faithfully and well, he has promoted a "United" feeling in our college activities and has endeavored to lend his co-operation as much as possible to the University of Manitoba.

The Student Council has complete and absolute control over every branch of student activity. In the council are representative members of the various years and the faculty. Executive organizations in charge of athletics, dramatics, debating, social and literary, Vox, Brown and Gold, etc., are strictly responsible to the council.

The work of the council has been more than ever increasingly difficult this year, due to the fact that

the registration has increased to almost unmanageable limits, but owing to the untiring and unceasing efforts of every member of the council, every line of activity has been carried on smoothly and efficiently, and now as we look back over the year's activity, we can honestly say that United Colleges has passed through one of the most successful years in its history. The treasurer's report indicates that financially the year has been a success also, and that there is a substantial sum left to hand over to the next council.

While primarily the work of the council is to foster activities among its own students, it does not overlook the fact that with its sister faculties it must contribute to the success of the University, and every effort is made in every line of activity to take a part in interfaculty affairs.

STUDENT activities are very often carefully scrutinized by academic authorities in an attempt to estimate their place and value in the scheme of higher education. Dramatic societies have rarely been adversely commented upon from this standpoint. Drama has its place in the curricula of several of the most important departments of the University system and it is a vital art form in the life to today. It is thus proper and inevitable that it be recognized by the work of

organized dramatic societies functioning in the various faculties.

In United Colleges "Dramatics," as it is handily called, has had a long and excellent record. It has been the aim to produce plays that are technically sound and interesting, as well as literature. Successive executives have endeavored to maintain and to contribute to a tradition whose ideal it is "to produce good plays well."

THE Student Christian Movement lives up to its name. Students always enjoy getting together to talk. How to live is one of our greatest problems, the Christian philosophy of life as lived by Jesus Christ throws an ever radiant light on the solution. As for movement—we opened our fall term with a well attended Freshmen Reception followed this up by the organization of efficiently led study groups. Later in the year we spent an enjoyable evening listening to a report on the Pacific Area Conference held last June in B.C. A hike out in St. Vital with the accompanying bean supper and talks on the Buffalo Conference has been our major event thus far this spring. A plan to participate in several fireside groups is under way.

University S.C.M. suppers and gatherings have been well attended and we are looking forward to the Spring Camp.

THE Co-ed Executive, as the year comes to an end, reviews its activities for 1931-32. A new social event in the form of a girls' dinner opened the fall term. Early in the second term a novelty silver increased the funds. The special feature of the closing spring term is the entertainment for the graduates—the final function.

The success of Co-ed endeavors has been due to the co-operation and enthusiasm of the girls. The executive greatly appreciates the support it has received and has enjoyed the work it has shared with the girls.

THE (Social and) Literary Society, despite its name, has this year shown small reverence for any Muse except Terpsichore. The Freshman's Reception slipped by in fox-trot time, the spring term was inaugurated with rhythmic revels, and the Annual Dinner will no doubt enjoy its usual epilogue of syncopated beauty. Only the Formal Reception and Stunt Night have nodded to "literary" considerations, the former somewhat stiffly, the latter with effervescent extravagance. Class '32 won the cup.

A VERY successful year has been experienced. Much enthusiasm has been manifested in the attendance at inter-class debates, while subjects ranging from the importance of dogs and radios to batchelors to those of a deeply philosophical nature have been thoroughly discussed. In addition, both Mr. McLeod and Mr. Knowles have represented the University in the McGoun trophy competition.

ANY college periodical which aspires to be more than a miniature newspaper should fulfil very definite and exacting requirements, and should endeavor to maintain standards which will at the same time encourage and reflect the finest qualities in the life of the student body.

A publication of that kind should provide an outlet for the expression of student thought on the affairs of the college and those of wider importance in the life of the world. Within its covers should be found the humor of corridor and classroom, news and opinions of its readers, and the serious treatment of vital problems. It should avoid creating for itself an exclusive circle of regular contributors of proven worth and ability, seeking always to en-

courage the development of potential literary ability wherever it may be found. It should serve to strengthen bonds of sympathy and co-operation between faculty and students, and recall the achievements of those who have passed on to their chosen fields of endeavor. In short, it should present a cross-section of the life and interests of the institution which it serves, and above all, should find its highest value as an exponent of the best ideals of education, speaking in terms of culture, personality, and service to humanity as the most important guiding principle in the acquisition of knowledge.

These are the ideals we have claimed for Vox; the extent to which they have been realized is a matter for our readers to decide.

UNDER the administration of a strong and energetic council, United Colleges athletics have enjoyed a period of prosperity. The executive has been active throughout the year and more teams have been put in the field than ever before. The year began auspiciously with United running a close second for the track title, and the capture of the Senior Soccer Shield for the fifth time in six years.

The council sponsored United's entry in every phase of inter-faculty athletics, including men's and co-ed's track, Men's and co-ed's tennis, men's and co-ed's curling, men's and co-ed's hockey, men's

and co-ed's basketball and two teams in soccer. Aside from inter-faculty sport, a full program of tennis, track, curling and hockey was carried on within United Colleges.

The executive for the year consisted of:

Hon. President _____ Prof. O. T. Anderson
President _____ Harold Stinson
Vice-Presidents _____ Mervyn Sprung and
Marguerite Oastler
Secretary _____ David Conly

Managers for each branch of athletics, and two representatives from each class.

G. Johns

THE track season opened auspiciously with a very successful inter-class meet, featured by an unprecedented number of entries in all events. Class '33, led by Gerry and Sprung, won the cup for the second consecutive year. Genevieve Johns made herself known by capturing 20 points for the Freshmen.

In the annual inter-faculty meet, the Red and White was a threat all the way, and made a most creditable showing. Cleve Gerry winning the individual championship with three firsts, and "Mub" Sprung coming second with two firsts and a second.

United was well represented in the annual inter-collegiate meet by Genevieve Johns, Corinne Davis,

Cleve Gerry, Mervyn Sprung, and Norman Penney. The lithe Genevieve ran away from all competitors in the three sprints, and again in the relay, to lead the Brown and Gold to victory, capturing the Rutherford Cup for 'Toba and the individual award for herself, breaking two records in doing so. Cleve added another broken record to the list of his track achievements when he set up a new mark in the high jump, while Corinne, Norm and "Mub" each made a worthy contribution.

None of these track stars belong to the graduating class, so we are already looking forward to next fall with high hopes of even greater success.

ONCE again the boys from United Colleges have demonstrated their superiority in inter-faculty soccer circles, and as a result the trophy, emblematic of the Senior Championship, has re-occupied its place in our halls after a year's absence at M.A.C. Handicapped by the loss of several stalwarts of other years, the lads were not looked upon as a serious threat to senior honors, but the presence of an abundance of that quality commonly referred to as "grit" pulled them through a difficult schedule with but a single loss. When the regular schedule ended in a three-cornered tie, the red-shirted boys sat back and watched Engineers and Aggies battle through two full games before reaching a decision. Then, on a snow-covered field, they defeated M.A.C. by a 3-1 score to capture the

league championship. The team was capably managed throughout the season by Hartley J. Harland, and with most of the members returning next year, United has great hopes for further successes on the football field.

THE junior edition of United's inter-faculty soccer entry scarcely fared so well as did the seniors. Composed largely of inexperienced players, the team really did remarkably well by finishing the schedule only one point behind the league leaders. Most of the players will be back next year, and benefitting by the experience obtained in the past season, are fully confident of bringing back the junior trophy to United.

TWO hockey championships in one season! A feat that has not been accomplished since the Meds. turned the trick back in 1923.

Their first year in the senior division, our boys began the season with three straight victories, and only suffered one loss during the entire campaign. "Goals for, 9; against, 1" tell the story of the six scheduled games. The first play-off ended 3-3, but the final, played on St. Patrick's Day, ended 4-1, with the U.C. team on the top. Four days later they went on to greater success, winning over the

Royals, Bank League champions, 3-1, in a hectic overtime game, to capture the Auditorium trophy.

The juniors found the going tough, but came through in a blaze of glory, emerging victorious with a 1-0 win over St. John's in the finals. They came through the season without one reverse and only one goal scored against them.

Special credit is due Norman Penney who piloted the U.C. hockeyists through the year, at the same time playing a flawless game in goal, allowing only one score in nine games.

THE United girls made a stirring bid for the championship this year, proving to be worthy opposition to the "Scientific" champs. The team was built around a nucleus of "grads" who leave us this year; however, the enthusiasm shown by our junior members leaves us with no fears for the future. Two of the members made places and a reputation with the U.M.S.U. team. The team has a real live manager in the person of Jim Brown.

TWENTY mixed rinks of co-eds and men enjoyed the "roarin' game" this season. Curling was managed very efficiently by the joint committee consisting of Margaret Mellish and Bert Love. The season opened with a novelty bonspiel, and the finals for the championship of the winter schedule brought down the curtain on a very successful season. A great deal of interest has been aroused in curling this year, and it is hoped that it will carry into the future.

THIS year (presumably due to the depression) United was only able to field a junior team, composed mainly of Freshmen and Sophomores, and coached by Evans Furnival.

In the first series the United squad placed second to Medicals, while in the second series they managed to cop second place once more, being beaten out by Aggies.

Most of the team will be back next year and will be under the capable management of T. Saunders.

THE girls' basketball activities were limited to one entry in the Senior Inter-Faculty League. The team's invisible success was confined to one victory over the Arts girls, but inasmuch as that team had three U.M.S.U. players on it, and the United team was made up of players just being initiated into the sport, the success to the team, at least, was no mean one. The college dropped two splendid games to M.A.C., finishing the season in a tie for second place.

*I*T was on November 6th, 1906, twenty-five years ago, one quarter of a century, that the founder of the College, the Premier of the Province, Sir Rodmond Roblin, declared the Manitoba Agricultural College officially opened and prepared to serve the farmers of Manitoba. Since its inauguration the College has had a most vicissitudinous career, but has always progressed toward the fulfilment of the original purpose of better service to agriculture in particular and rural life in general. With the changing conditions of agriculture the immediate objects or ideals of the institution have also changed. During this period it has passed through four distinct phases which for the want of better terms may be briefly stated as, first, extension; second, teaching; third, research, and fourth, graduate study. It is interesting to note that these stages of development synchronize very closely with the regime of the four men who have at different times directed the affairs of the College, i.e., Dr. W. J. Black, Professor J. B. Reynolds, Dr. John Bracken and Dean W. C. McKillican.

Administration Building, Agricultural College.

*G*REETINGS and Best Wishes!

You have completed four years of study. You have passed many examinations, and are now going out into the world as graduates. Far be it from me to minimize what you have done, but I hope you do not think of it yourselves as a finished job or an accomplished end in itself. You are only beginning your education. What you have learned here will be of most value to you if it has taught you how little you know and what realms of knowledge are still unattacked. I hope that your experience in College has given you an inquiring mind, a thirst for learning, a judicious critical turn of thought that examines everything and sifts the true and useful from the false. I hope you have gained some breadth of view and some resources of mind and spirit. You are going into a world that is having heavy going; grant that you may find a place of usefulness and have a part in bringing about a better day.

W. C. McKILLICAN.

Dean

W. C. McKILICAN

AGRICULTURE

JEAN ALEXANDER

Do you know the girl with the winsome air.
Twinkling brown eyes and curly black hair?
A willing helper, a student who uses her time to advantage, a lover of sport, with a mind of her own; a true friend, that is Jeannie.

DOROTHY COLTART

A real zest for fun and life, coupled with a winning way, have made "Dot" one of the most lovable members of our class. As a member of the Class Basketball team, Girls' Gym team, and taking an active part in the Track Meet, she has ably demonstrated her athletic ability. Go to it, "Dot"—our best wishes go with you always.

D. W. BASARAB

"Bass" hails from Sifton. His untiring persistency and capacity for efficient work have enabled him to overcome obstacles greater than himself, thus proving himself a valuable asset to our class. He can easily adapt himself on extremes of environment, because neither Chicago nor Churchill have hindered his progress.

ALVIN J. COOPER

In "Al" we have had a valuable addition to our college life in social and literary fields, and, most particularly in the realms of sport. While interested in all sports, his specialties have been football and basketball, where he was a valuable player on the senior teams, and in field and track as one of the individual champions of 1931.

R. M. BLAKELY

Joining the ranks of '32 a year late, Bob has crowded four years of study and student activities into three, full of benefit, not only for himself, but for all those who have really become well acquainted with him. Prominent in debating and dramatic circles, as well as an able basketball referee. We wish him well in his chosen field of horticulture.

RUTH CORMACK

Ambition—To be a chemist.
Occurrence—Vista.
Object—To claim for her own a knowledge of life as presented at M.A.C.
Procedure—Win two scholarships in three years, with a minimum amount of work.
Result—A mixture of fun, wit, sincerity and good sense.

JAMES JOYNT BOURNS

Joynt is perhaps as well known in the "East" as in the "West." He is one of these "Yes, Yes" men to the "Come hither" of the fair sex. Joynt is, in, short, a good sport, gifted with a sense of humor which makes him very popular. Active in all phases of athletics, he is outstanding as a curler, having won the College curling cup in his third year.
Motto—Keep them guessing.

J. H. CROSSLEY

Quiet and unobtrusive, Jack is one of the most popular and industrious members of his class. Never in the foreground, yet his influence is always felt both in class and out of it. He hails from Saskatchewan and has elected horticulture. His main ambition seems to be to occupy a ward in The General Hospital.

MARGARET CLARK

"To know her better is to love her more."
Had an outstanding college career. Playing a prominent part in the social and scholastic life of the college. "Clark" will attain great things in life and we proclaim her now as always—"One of the Best."

BILL CUMMING

A naturalist from birth, Bill accepts studying as a necessary evil in a college course. He is always at home with the birds, flowers, or his beloved "Bugs." Following his natural bent, he has confined his studies mainly to Entomology.
"Archie" has been an indispensable asset to our class functions whenever and wherever held. In elocution and dramatics he is outstanding.

AGRICULTURE

DAISY DE JONG

A lady of careless curls and gray blue eyes; serious of thought with a gay sense of humor and a sweet personality; the best of sports and indispensable to all her friends.

THOMAS R. HODGSON

Tom has distinguished himself as a student by being scholarship winner in his first year. Conversant in current affairs as is revealed when someone is victimized by his convincing argument. A clear thinker with that "Stodious" air, though his interests are balanced by a fondness for sport in which field he has assisted his faculty in soccer and tennis.

DOUGAL FLETCHER

Apart from his studies he has found time to take an active part in curling, and the S.C.M., being president of that organization in his final year. Doug. leaves behind him memories of his ability as a student and his sterling qualities as a friend.

CHARLES L. JOHNSTON

A good athlete, a greater sportsman, a gentleman in every respect. "Chuck," one of the best of inter-faculty goalies, has played no small part in winning two football championships for M.A.C. He has also excelled in hockey, captaining several of these teams. He has held the positions of athletic and social presidents in his third and fourth years, and his efficient handling of these committees has further enhanced his reputation as a well-informed and likeable personality.

GWENDOLINE GARDNER

A light and airy exterior bide a deep and profound interior to all but the few who know her best. For three years she has sung in the Glee Club and this year with the University Glee Club. She has served on the athletic committee and takes an active part in track meets.

PHYLLIS CLAIRE LAIRD

A peculiar and refreshing sense of humor, unusually good judgment, a sincere friend and worker, and withal a good sport. Played on the girls' hockey team, won her athletic "A," an efficient third year president.

FRED HAMILTON

Fred entered M.A.C. with class '31, but changing his course returned to graduate with '32. His interests have been many and varied. In athletics he has played a prominent part in football, basketball and hockey. Fred's congenial nature and ready wit have won for him many lasting friendships. The future should hold a successful career for him.

HAROLD LAYCUP

Harold began with the class of '27, but discontinued his course after four years in favor of married life and the teaching profession. He returned this year to graduate with '32. While at M.A.C. Harold has specialized in track, holding the 440 yd. record for several years, and in football, playing on the senior team for all five years and consequently on the championship team in '32.

ESDAILE HILL

True blue in all she does, Esdaile is one of the best friends anyone could have. Keenly interested in music she has been actively interested in both the M.A.C. and University Glee Club. Ambition and the will to go ahead will carry her far.

ANN LIVINGSTONE

Basketball!
Men fall!
That all?
Lady Stick!
Hockey stick!
No, nothing sticks Ann!

AGRICULTURE

NEIL M. MACGREGOR

To enumerate Neil's college activities is to include everything on the curriculum. Literary activities include debating as well as considerable "pen work." Our senior U.M.S.U. representative has also taken care not to let social activities get too far in arrears. Further, when we come to athletics we find he has entered into practically every field of sport, particularly senior football and basketball. Scholarships? One every year.

J. R. McQUARRIE

His strength of character comes from his energy and industry, strength of arm from using a paddle as a summer guide near Rainy River. Ken has shown his executive ability as a capable and energetic president of the Literary Society. His interest and knowledge of economics will stand him in good stead when he embarks on the river of the "Future."

MILLY MACKAY

Oh! why do I find it so difficult
To write of this classmate so dear?
For she's lovable, interesting, very demure,
For she's clever and witty
And she'll smile for you sure.
Now, what more could you ask,
Of any one girl in any one class.

GERALD J. MEEHAN

Jerry, our popular senior stick, has given much to the college and has received much in return. In sports, football, hockey and curling lie Jerry's main interests. To obtain a balanced diet he also took a prominent part in literary work by debating and by occupying the chair of the Literary Society during his third year. Executive work has been his chief contribution—starting as president of first year and finishing as president of the student body in his final year.

ALICE McFADDEN

A sunny nature, a winning smile,
Always a true friend, not just for a while,
No matter what she does, we all can tell,
If Alice does it it shall be done well.

WILLIAM NIMCHUK

Bill was born in 1910 at Hazelridge. Graduating at the high school there, he came to M.A.C. Cy is like Faust, never content, but seeking more light and truth in science. He has elected Economics and has become an outstanding member of the option. "Cost of production" is his favorite problem. As a member of the "Fraternitas Bursae" Bill has made many friends.

KENNETH McLEAN

A thorough worker and clean-cut sportsman, Ken has distinguished himself in studies and student body activities: a scholarship winner in his third year, despite the responsibility of being class president and secretary of the Social Science Club. He was appointed president of the club in his final year and guardian of the student body purse. On the soccer field and on the curling rink he was to be found taking his place in the field of sport.

BELLA NOZICK

Bella isn't just another blonde. Quietly utilizing her total abilities she has gone blithely through her four years. Dominated, as she is, by a keen interest in her work, we know she will make good in whatever field she chooses.

MARGARET J. McLURE

To describe Marg. is a difficult task, she is a combination of so many different characteristics—friendliness, forcefulness, sincerity, fun. Her years at M.A.C. have been filled with student activities of all kinds—basketball, class president, debating. A friend . . . worth having and one with whom we will be sorry to part.

SHERROD ROLAND

From Newdale he came with an ambition to seek fame (or fortune?) in Agriculture after attending Kelvin High School. Sociable yet reserved, a conscientious worker with particular interest in chemistry, Sherrod is one of the younger members of his class and one admired better as he is known better.

AGRICULTURE

IRMA SANSFIELD

Better known to her friends as Dolly, originally came to M.A.C. with class '31. However, after rollicking through one year, she decided to join the ranks of '32. She is well known on the tennis courts and on the skating ice, and also in her executive work on the S.C.M. and as Class President. Because of these and many other nice things, that we haven't time to tell you about, Class '32 certainly appreciate their Dolly.

PETER STOBBE

Pete, our conscientious agronomist, came to us from an agricultural school in South Russia. Always a good student, Pete won an agronomy scholarship in his third year. He has taken a keen interest in the activities of the college, being secretary of the Student Body in his final year. Pete has a way all his own, which does not fail to win for him a place in the hearts of all his fellows. Favorite saying: "Three no trump."

Pastime: "Three no trump."

NELL SCHOFIELD

Nell is perseverance plus, and by perseverance we mean just that, not that she goes around with that determined air—she really charms us with her gifts of wit and conversation.

MARGARET R. STODDART

When a person can be subjected to such influences as fair-haired friends, college students, professors and bridge clubs, and still retain a pleasing personality as Margaret has, one may be sure that such little things as the world and its drawbacks cannot stand between her and success. If Margaret puts into her career the same effort and enthusiasm as she has put into her curricular and extra-curricular activities, her future is assuredly brilliant.

A. N. SKOGLUND

Swedish by birth, but well acclimatized to Manitoba, "Skoggie" is continuing his countryman Linnæus' work in plant taxonomy, and no doubt will soon devise a new classification for Alberta "Sage brush." We wish him every success.

EILEEN TALBOT-CROSBIE

In the three years since Eileen has joined our class she has accomplished much—S.C.M., Managra, curfing, and executive work. Besides all this she has managed to find time for a lot of fun and for being a most understanding friend.

M. NORMA SMILLIE

And what a smile! For four years M.A.C. has been fortunate in having this radiant personality with her cheery smile as one of its members. Her hearty and infectious giggle has helped to win her many lasting friends. As president of the Social Committee in her third year, Norma proved that co-operation is the key to success, and we wish her the very best for its continuation.

MICHAEL TIMONIN

A product of the Russian steppes, coming to us from an agricultural school in Czechoslovakia, Mike's wide experience in travelling has given him a philosophy of life all his own. His main student interest lies in the field of plant pathology. The soccer team has also found him an indispensable player. His thoroughness and ability to get at the root of any problem confronting him will carry him far.

OLIVE L. SMITH

Sometimes serious, sometimes gay,
Catching a scholarship on her way,
A mind of her own, a ready wit,
A willing helper, depend on it,
At basketball, at parties, gym,
She's the one that's got the vim.

JOSEPH WAWRYKAW

Joe came to us from Gimli with several years' teaching experience and a term of engineering. Joining class '31 as a Soph., he recovered his senses to add materially to the honor and glory of class '32. A student with ability and zeal for work, carrying two extra subjects in his final year, he finds time in the "wee hours of the morning" for his social obligations in the city.

AGRICULTURE

OSCAR WINKLER

Born in 1896, "Fritz" spent his early life on the shores of the Black Sea. A war veteran. In 1922 graduated from Stuttgart Hohenheim College. Arrived in Canada in 1926 and M.A.C. in 1930. He won the friendship of the men and the hearts of the women. Now he is the agricultural representative for Steinbach and its locality.

BELLE YOUNG

Did you ever see Belle worried or excited? We all admire her for the happy atmosphere she creates, and envy her nonchalance. But Belle is true blue and it is with many wishes for her success that we see her graduate.

STUDENT affairs at M.A.C. are run for the students by the students. The two faculties represented each have their own executive which directs student affairs and serves as a connecting link between the student and the faculty.

In matters affecting both organizations the two executives convene together under the name of the "Joint Council."

Each of the two units consists of a "Stick" or president, a secretary, a treasurer, the heads of the various committees and the year presidents.

THE policy of the Managra is to work in the interests of the faculty of Agriculture and Home Economics, its staff and students, to mirror college life in its many and varied phases, and to serve as a link between the present student body, graduates, and ex-students. To the individual the magazine presents an opportunity to develop latent journalistic or literary talents, and serves as a record of college events.

The contribution of the present Managra staff and student body has been such as to fulfill the year's program in a most satisfactory manner.

THIS year the "Lit." has been piloted through its many activities by J. K. McQuarrie and Miss R. Casselman, with R. M. Blakely as secretary. Besides taking a prominent part in making the U.M.S.U one-act plays a success, this executive has sponsored the usual Stunt Night, All Canadian Night, Dramatic Night, and the Glee Club, not to mention the many and informative debates, inter-class and otherwise.

THIS season has been a very successful one socially, due to the able leadership of our social convenor, "Chuck" Johnston, and to the willing co-operation of the other members of the committee. At the opening dance in October the freshies were well sponsored and royally welcomed. Other dances were equally successful, though particular mention might be made of the Christmas dance on December 19th, which gave everyone a good start to an enjoyable vacation.

THE S.C.M. at the Agricultural College is one of the four major committees which handle student affairs.

Its contribution to college life has not only been through the sponsoring of successful social events, but primarily through three major projects.

Study groups under the leadership of well chosen leaders have proven extremely interesting and most educational.

Sunday evening services with people from various walks of life as speakers have been enlightening and informative.

A valuable addition to these services has been the group singing and special music by various members of the student body.

ONE of the most pleasing features of the past season has been the number of students from M.A.C. who have ably represented the University in various branches of athletics. We extend to them our heartiest congratulations.

Girls' Basketball—Doreen Falconer, Anne Livingstone, Berna McKenzie, Nancy Milton, and Helen Schofield.

Girls' Track—Doreen Falconer and Isabelle Fallis.

Girls' Hockey—Anne Livingstone.

Girls' Curling—Ruth Casselman and Pat. Reid.

Men's Track—Austin Floyd.

THE Inter-faculty League made a delayed start, due to adverse weather conditions, but interest was well sustained. The result was a three-cornered tie between Engineers, United Colleges and M.A.C. In the replays M.A.C. disposed of Engineers at the second attempt and earned the right to meet United Colleges (who drew a bye) in the final game. This was played on a snow covered, wind swept pitch—United winning after extra time by three goals to one.

Congratulations, United!

THE junior football team produced somewhat unexpected results this year. Commencing the season with only three of last year's players, practically a new team had to be built up around this nucleus. However, they went through the season with but one defeat, losing only to the season's champions—Accountancy—but this was sufficient to put them out of the running.

THE M.A.C. basketball quintette is stronger than ever. For six consecutive years now they have held the Inter-faculty trophy. This year five Aggies are playing on the U.M.S.U. team. Once again they hope to retain their cup, and we are confident that they have a fairly good chance.

THE Aggie junior girls' basketball team have been playing right up to the

mark this year and are looking forward to some more exciting games. Four of the players are new on the team, but the other five are well known from the games last year.

Helen Cranston plays centre, with Marguerite McCaulay, Margaret Coates, Betty McKay, and Gertrude Cole as forwards, and Margaret Garner, Ruth Ransom, Isobel Fallis, and Marjorie Dick playing defence.

THE M.A.C. seniors have completed a year of basketball that has been very interesting in spite of the fact that the opposition was too strong for the team to get into any of the play-offs. Many of the games, however, were of excellent quality and closely contested, so that the season has been a valuable one in training those members who will be present in the fall to form the nucleus for next year's team.

THE M.A.C. junior team did not do so well at the beginning of the season and as a result lost out in the first half of the series. After Xmas, however, they hit their stride, going through the second half of the series without losing a game. Having won the second half, M.A.C. had to play Medicals for the division championship, and in the two-game series that was played, M.A.C. won 45-34. They now meet Science for the junior basketball championship and prospects look good for the team to bring the cup to M.A.C.

AGRICULTURE ONE-ACT- PLAY GROUP

WITH a team composed largely of last year's players and some clever new material, the M.A.C. puck-chasers had bright hopes of winning this season the coveted shield which just eluded them last year. The team went through the season without a defeat and had the satisfaction of holding the leading St. John's team to a hard fought tie. Their performance was a credit to themselves and to their able coach—Prof. Ball.

M.A.C. chose as its contribution this year, "The House With the Twisty Windows," by Mary Pakington. Under the able direc-

tion of Mrs. Lilyan G. Brown and a cast, all of whom took their parts well, this play would rank high as an amateur production. The scene was in the cellar of a house in Petrograd, used as a prison during the "Red Terror."

CAST:

James Roper, K.C.	Mr. Wilfred Waddell
Charlie Clive	Mr. Reginald Bowring
Teresa, Lady Ponting	Miss Evelyn Stockton
Heather Sorrell	Miss Nora Sleeman
Anne Sorrell	Miss Gertrude Cole
Derrick Moore	Mr. William A. Cumming

A diploma in Agriculture is granted on the completion of the three-year practical course in Agriculture.

A diploma in Home Economics is granted on the completion of the two-year practical course in Home Economics.

The diploma course does not give a professional standing to those taking it, but it does prepare for life on the farm and in the home and for capable intelligent citizenship. Enough science is taught to give the student an intelligent understanding in his daily life and a scientific basis for his practical studies, but the advanced science necessary for a Bachelor degree is omitted.

Practical instruction in Agriculture and Home Economics therefore takes the largest place in these courses.

FOR some years the Inter-faculty Curling cup has evaded the hands of the M.A.C. "stone-hurlers." Many hard battles have been fought, but at the critical moment it stealthily evaded being captured to adorn the halls of M.A.C.

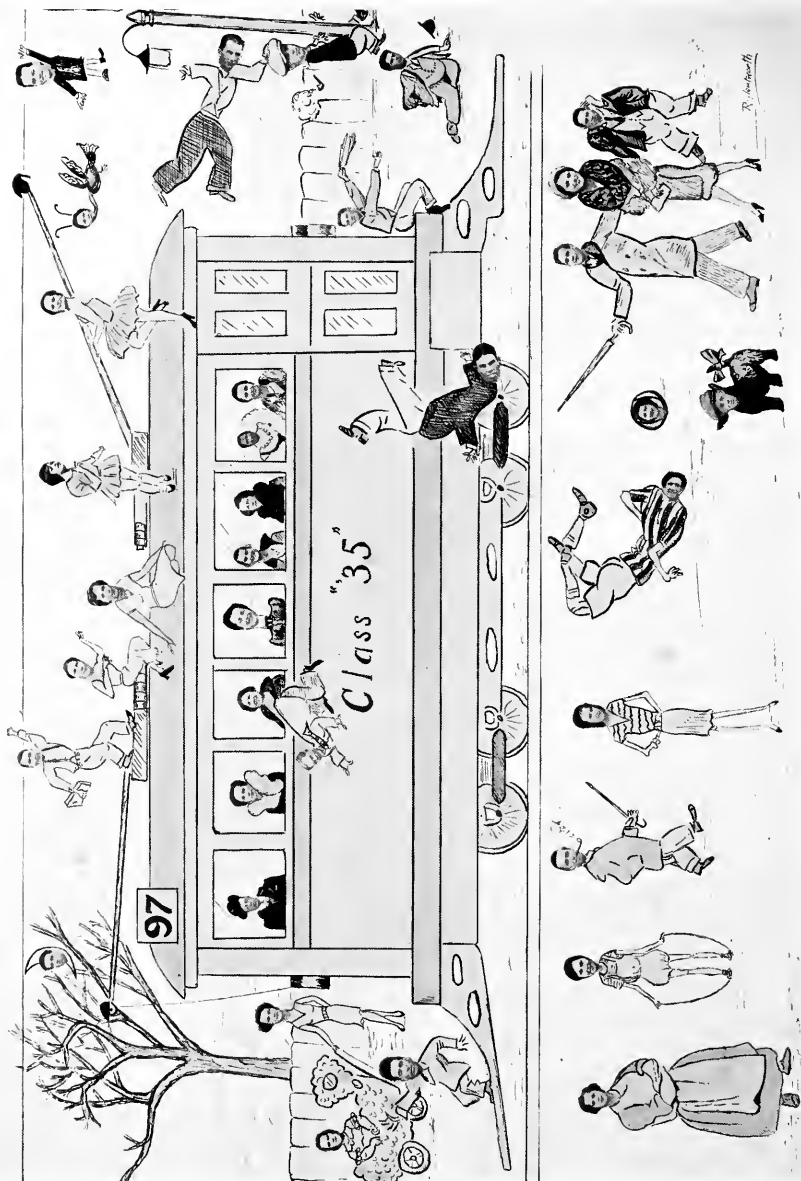

This year a special effort was made to bring it home again and things seemed rosy until the last when Arts emerged victorious and Aggies fell into second place.

A total of 18 games were played in 12 of which Aggies came out on top. Headed by three noted skips, Bourns, Meehan, and Swanson, all backed by curlers of merit, the games were scientifically played and we must say well contested.

With one more game to play, the Co-eds have an excellent chance of winning their competition. Led by Ruth Casselman this quartette of Aggies' outstanding lady curlers have fought through many keenly contested games, ending in a three-cornered tie with Arts and United. Having eliminated United, they still have to play Arts.

Aggies' hopes for the future are not veiled in the clouds of the past, with a large number of excellent curlers to choose from for coming years, their hopes soar high, and there is no doubt that the truant shall return home.

AGGIES have played an important role in the U.M.S.U. track meet, and no doubt will continue to do so in the years to come. Owing to late registration it is a difficult matter to size up the freshman year as to possible entrants in the track team for that year, hence many have been overlooked. This year the co-ed team were close contestants with Arts for first place, the former emerging victorious by a slim margin.

Isobel Fallis equalled the record in the 100-yard dash and carried off the honors in the running

broad jump. Doreen Falconer placed first in the high jump, while the relay team came out on top.

The men's team was not as strong, Austin Floyd placed third in three events, namely, the 100-yard, 220-yard and the 440-yard sprints, while Neill MacGregor came third in the pole vault.

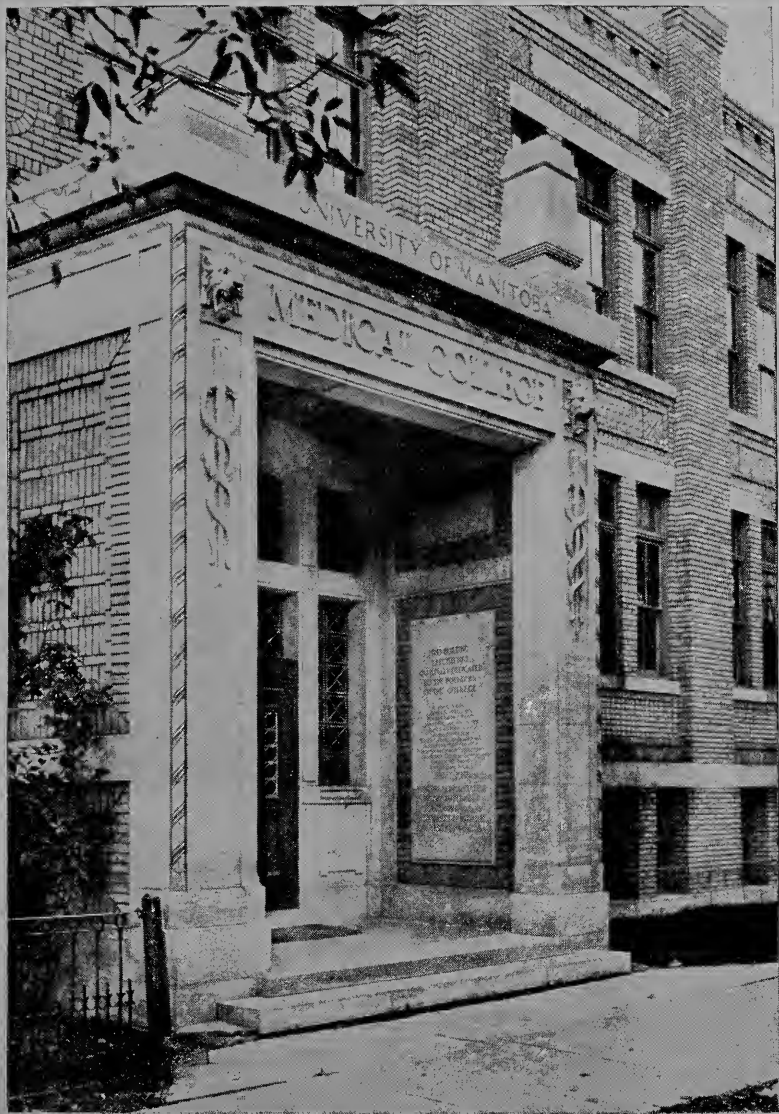

There are possibilities for next year in the men's track, in weight men and distance runners.

AUTOGRAPHS

OUR modern Faculty of Medicine is a lasting and living monument to the memory of the thirteen physicians who received the Charter of Manitoba Medical College on April 20th, 1884. From those days of Dr. James Kerr, the first dean, a faculty who had such faith in their efforts that they supplied funds for the first buildings, and a graduating class of six men in 1886, it has steadily progressed to its present position as a sister faculty in the University of Manitoba and one of the foremost medical schools in the Dominion.

AUTOGRAPHS

Entrance, Medical College.

AND now the day approaches on which you are to pass outward from the circle in which we have so amicably dwelt and worked together, to the great circle of the world. In it the restless spirit of change is abroad and that peace and certainty that men long for is hard to come by. But somewhere out there you will find a place and work to do, a life of great complexity when compared with the relatively simple existence of our fathers. You will not practice the individual materialistic medicine that was once deemed sufficient. Medicine no longer a mystic cult is now an integral part of the social machine and of you will be demanded richness of personality, breadth of intellectual interests, catholicity of sympathy, expertness in the technique of social relationships not considered essential hitherto. We have tried to bring to you technical competence and a trained scientific spirit of investigation. We have urged you to draw from the study of Medicine the enduring inspiration it yields. With these and common sense and intellectual honesty we feel that you are well equipped to work out your Destiny with satisfaction to yourselves and pride to us.

A SOMEWHAT colorless year might well describe the session 1931-32 for the M.M.S.A. Though there seemed to be a general lack of enthusiasm due, no doubt, to financial stringency and lack of outstanding achievements in the realm of sport, these were balanced by a fairly efficient administration and the maintenance of Medical activities at standard. As usual, medical students have contributed very greatly to U.M.S.U. affairs. Our meetings have been few, but we have profited by interesting addresses by such speakers as Professor Osborne, Professor Fieldhouse, Dr. Ormerod, and Dean Mathers. So ends a session reflecting, perhaps, the spirit of the times.

THIS year we achieved a long cherished desire, namely the purchase of a Stick symbolic of our Presidential office.

In Athletics, Miss Aldis Thoriakson was most outstanding. During the year, beside being on the U.M.S.U. basketball team, she distinguished herself both as a member of the Medical Track team and individually at the Intercollegiate Track Meet by establishing a new record for the javelin throw.

We are represented in the graduating class by only one member but here we feel that quality makes up for the lack of numbers.

WITH the end of the present academic session the Third Volume of the University of Manitoba Medical Journal will be completed and although it may be said to be still in its infancy, it is felt that the Journal has become an integral part of Medical student activities.

The excellent cooperation of members of the Faculty and the increased interest evinced by the Undergraduate body and many medical practitioners has been responsible for whatever measure of success this publication has achieved, during the past year.

THE Athletic Executive has endeavored to carry on the good work of its predecessors. Although at the beginning of the session it was thought that one or two activities might have to be dropped through lack of funds, by careful budgeting and economy we were able to continue all of them. Therefore, we feel that the year has been a very successful one, even though our teams have been unable, so far, to obtain a championship.

W. Bishop

THE senior hockey team, while showing a deficit in goals, nevertheless has scored a credit balance in good sportsmanship and in the turnout of players for games. Of course, the teams which dealt them defeat were excellent ones, but we are confident of success next season.

THE Medical juniors, a hardy team of "Saw Bones," played "bang up" hockey all winter. At the beginning of the season they were conceded but little chance of being placed in the finals. But they completely fooled everyone, battling their way into the play-downs and there were only nosed out after a closely contested game. This team will be a hard one to stop next year.

THE Medical girls have had a very successful year in the field of Curling. Several of our members have turned out every Wednesday afternoon, putting their scholastic aspirations quite in the background for the time being.

We are very proud of the girls on the two Medical rinks which entered the Novelty Bonspiel. Both these rinks reached the finals. At present our Inter-faculty rink is in the finals of its league. Through it we hope to retain the Curling Trophy for another year.

ALTHOUGH our Curling teams this year have not obtained the success that was anticipated, it may be safely said that they show promise which has never been brighter and may be depended upon to furnish a real threat next year. With the added experience and the addition of new material, we feel confident of entrenching ourselves firmly in the front line of Interfaculty Curling.

FROM the standpoint of wins and losses, the season for the junior soccer team was not a startling one. However, the boys showed real fighting spirit, and the team also served a good purpose in developing prospective senior material. The season wound up with a glorious bang when we were defeated by St. John's in the semi-finals.

THE Senior Medical Soccer team of 31-32 did not quite reach the standard of previous years. However, by dint of hard work, the boys were able to make a fair showing in the inter-faculty league, and, with the advent of new blood, and with the steadily increasing interest in soccer shown within the faculty, we hope to field a formidable array of soccerites next term.

MEDICINE MEN

WITH the sudden exodus of five of the old guard of point-winners in track, Medicine was rudely jolted into the realization that in the time of plenty she had failed to provide for the years of famine. Nevertheless, in spite of the poor health of their captain and their own lack of experience and training, a small band of athletes

fought with the true Medical spirit in a contest where they knew the odds were heavily against them.

To these men Medicine wishes to express its gratitude in no less a degree than it has to previous more fortunate track teams.

FOR some unknown reason there was a lack of enthusiasm shown in the activities of the Senior basketball team this season. However the revived interest this year in the sphere of Inter-University basketball will, we feel, stimulate a greater degree of competition in this branch of sport.

THE current year has been one of satisfaction to the men of our junior team. The Sawbones' squad swung smoothly into action and during the first half of the league carried off the honors on every occasion. With the New Year there followed those weekly struggles and bitterly contested battles through which we strove, reaching the semi-finals. Throughout the series we have been impressed by the great generosity and good sportsmanship of all our opponents.

WHILE it is only during the last few years that Science has been numerically comparable to the other faculties, Science students have been with the University since its inception.

The Science Students' Association was formed in 1920, under the leadership of Andrew Moore, who had the honor of being the first Senior Stick. This association was formed primarily to further the interests of Science Students and to render their participation in extra-curricular activities more beneficial and more general.

That the association has adhered to its original object and aims is evidenced by the fact that it is noted throughout the University for the fine spirit of loyalty and co-operation of its members, and their enthusiastic support of its activities. That this has been maintained despite the rapid growth of the faculty until it is now one of the largest is due in no small measure to the able leadership of the various carefully chosen Sticks and Executives.

The move to the new Science building next year with the separation of the Junior and Senior divisions, will provide a real test of the esprit de corps of the Science faculty, but with a strong Executive the Association will no doubt carry on successfully although difficult problems can be expected to present themselves for a year or so at least. However, with the co-operation of all members of the association and the assistance of an interested faculty which has proven such an aid in the past, the years to come should find the Science Students' Association increasingly effective as a unit and as a part of the University as a whole.

New Science Building (now under construction).

THE 1932 class of Science will be remembered not, as is often the case, with a graduating class, for brilliant achievements on the part of the individual members, but for the consistently high level of ability shown by the class as a whole and for its extreme solidarity in social affairs.

Future classes may have the advantage of better laboratories, better equipment, better library facilities, but no class will graduate with greater promise of bringing future credit to the University than will the class of 1932.

I would ask those of you who are going out into the world to master your trade of scientific teacher or scientific investigator in the only way any trade can be mastered, by standing on your own legs and practising it, not to be disheartened by the deficiencies you will discover in your scientific knowledge. During your university life, if I may use a biological analogy, you have gradually discarded the hard crust of superficial, dogmatic opinion that you brought from your schooldays, and have acquired a new crust of opinion formed by personal observation. The aim of your university training has been, not so much to give you technical mastery over some branch of science, as to help you to form your new viewpoint by impressing upon you the cardinal importance of accuracy in thought and word, of scepticism towards established dogma, of distinguishing between sense and nonsense, of putting fact above opinion, of seeking both sides of a controversy, and of suffering fools gladly.

If your new crust appears a trifle weak in places, remember that experience will harden it and reflect upon the wisdom of the moulting crab, than which there is no animal more timid, more retiring, more modest in its demands, whilst its shell is soft, and no animal more aggressive, more enterprising when its shell has hardened.

R. A. WARDLE,
Hon. President, Science.

R. A. WARDLE

... S C I E N C E ...

A. S. DAWSON

Art, though never failing to be the best of fellows at all times has always indicated, during his brief sojourn here, an incredible "appetite" for scholarships, and is a sterling member of any executive. He has elected Geology as his career, so the best of luck on the rock-pile. Arthur!

JESSIE FOWLER WYLIE

"The keen spirit
Sizes the prompt occasion, and makes the thought
Start into instant action, and at once
Plans and performs, resolves and executes."

—HANNA MORE.

OLAFUR JOHNSON

A serious and high-minded young man whose ability and determination will doubtless ensure his success in the higher realms of Physics and Mathematics.

DORAN BENNETT

Almost looks angelic at times, but don't let her face fool you, boys. After a year of Medicine, life holds no illusions for her. An athlete who perennially surprises her friends by making her grade in exams: a strong but (not silent) woman.
Ambition—A family of ten.
Hobby—Collecting strong signs.

STEWART ARCHIBALD JOHNSTON

The heavenly constellations must have been in perfect accord when our social representative first saw the light of day—not were the fates stinting in their gifts. His fame for prolonging "Scientifics" will be everlasting. During his scholastic career he has won many scholarships, has been a demonstrator of renown, and has held many offices in the Science executive.

LILLIAN BULMAN

GERALD M. PROUDFOOT

Gerry is one of our original old-timers, and as such has been well known about our halls for many years. His record in student affairs includes, his holding the offices of Secretary of U.M.S.U. Council and Senior Stick of Science. Has played on basketball, football and curling teams. A good egg. We wish him the best of luck on the Precambrian Shield, which we understand, is to be his future home.

CHARLES CHATAWAY

GRANT WATSON

In addition to tennis and golf in the summer, and curling in the winter, Grant has attended lectures in Science, and has even been known to take a mild interest in laboratories. He is one of the U.'s outstanding curlers, and U.M.S.U. tennis champion. We will regret the loss of an outstanding athlete and a "good egg of the first water."

ROBERT COATES

Particularly noted for his ability to argue with anyone on any subject, Coatie is usually to be found in the Chemistry lab., either settling world problems with great ease or demonstrating to his classmates the proper method of doing any kind of analysis. We respect the "man in the bowler hat" and wish him well.

... S C I E N C E ...

CARL COLLINS

Carl's interests in Science have been many and varied. After holding several positions on the Science executive he topped them with that of Social representative, in which position he was most capable. An effective member of the Science basketball team. He has also been an enthusiastic curler. Geology forms his intellectual stimulus and occupies most of his time this year.

ROBERT HOWDEN

One of the reasons why Science is noted for its curlers: a member of the Science team which won the Porter-Markle trophy. Bob is headed for the Medical College, and we wish him success in his profession to be.

K. W. DOWNES

Better known as the leader of the opposition in Science circles. His interests have been extensive and varied, including S.C.M., year book rep., and curling. His popularity is evidenced by his election as president of fourth year. Gordon hopes to continue in Physics; will be succeeded? Y axis foolish questions.

GORDON JOSIE

ARTHUR FOSTER

Although not conspicuous, Arthur has been an active and very interested member of the Science faculty, and the Scientific Society. As a student his particular interest appears to be in Physics, but Maths. also shares his time, and his intelligent questions during and after lectures reveal evidence of considerable enthusiasm and personally acquired knowledge of his subjects.

HARRY C. LANE

The man with a suppressed desire, i.e., a certain red-headed woman. His activities have been numerous, including basketball, U.M.S.U. representative, athletic rep., finance committee, etc. Hopes to obtain an M.Sc. in Geology, specializing in Petrology, but will offset his intensive studies in this field by acting as senior U.M.S.U. rep. next year.

LORRAINE GERRIE

One of the few girls we know who has the courage to stand by her convictions and at the same time sufficient intelligence and tact to know how and when to do so. Her grace and technique have won for her the attention and admiration of all exponents of the terpsichorean art. True to her friends at all times, Lorraine will leave the University with our sincere wishes for a very happy future in whatever field she may choose to enter.

W. H. R. McCracken

As president of the Men's Club this year, Bill has carried on the tradition of the Club especially in regard to their notorious banquets. His athletic activities include track—being a member of the Science track team—and curling. Geology is his main scholastic interest.

LILLIAN HELYAR

MARY MARTIN

DOROTHY MUDGE

Dorothy's college personality has as many facets as a diamond. With scholarships, dramatics, hockey, Science faculty affairs, and the Glee Club, she has been more in the limelight in her two years here than most students have in four, but she is never too busy to be thoroughly human. We admire her capability and cleverness, but we like her still more for her ready sympathy and enthusiasm.

C. CALVIN NEUFELD

Although only with the class for a short time he has made many friends by his readiness to be of assistance, and his more mature mind has made this aid valuable. His attention seems to be centered on Physics, as he has been an able demonstrator in that subject for the last two years. We sincerely believe that he will be a success as a teacher, in which profession he has already had considerable experience.

BEA NEWTON

In Bee we have the personification of executive ability and of sport interest. Her many offices during her first years culminated in those of Lady Stick of Science, and President, Women's Committee U.M.S.U. She has been intensely interested in tennis, track, curling and hockey.

CRISPIN TYNDALE

Known around the University as "Skip" Tyndale, He has lived up to his nickname by taking an outstanding part in Science inter-faculty curling. His scholastic interest is divided mainly between Chemistry and Zoology. May he always be able to "draw through a port," "throw a runner," or "lay down a guard" as the occasion demands in life.

G VALUE in a scientific mind, most of all, that love of truth, that care in its pursuit, and that humility of mind which makes the possibility of error always present more than any other quality. This is the mind which has built up modern science to its present perfection, which has laid one stone upon the other with such care that it today offers to the world the most complete monument to human reason. This is the mind which is destined to govern the world in the future, and to solve the problems pertaining to politics and humanity as well as to inanimate nature. It is the only mind which appreciates the imperfections of the human reason, and it is thus careful to guard against them. It is the only mind that values the truth as it should be valued and ignores all personal feeling in its pursuit.—Prof. H. A. Rowland.

In the first place the scientist's nature must be one which vibrates in unison with that of which

he is in search; the seeker after truth must himself be truthful, truthful with the truthfulness of Nature. For the truthfulness of Nature is not wholly the same as that which man sometimes calls truthfulness. It is far more imperious, far more exacting. Man, unscientific man, is often content with the "nearly," and the "almost." Nature never is. . . . In the second place, he must be alert of mind. Nature is ever making signs to us, she is ever whispering to us the beginnings of her secrets; the scientific man must be ever on the watch, ready at once to lay hold of Nature's hint, however small, to listen to her whisper, however low.

In the third place, scientific enquiry, though it be pre-eminently an intellectual effort, has need of the moral quality of courage—not so much the courage which helps a man to face a sudden difficulty as the courage of steadfast endurance.—Sir Michael Foster.

SCIENCE EXECUTIVE

D. Mudge
H. Lane

THE Science Executive has, under the leadership of Mr. Proudfoot, Senior Stick, upheld the traditions of the faculty, in so far as it has endeavored to have all its members taking an active part in some or all of the Science functions. The large and enthusiastic freshman class, under the presidency of Robert Bradshaw, aided greatly in this respect.

Mr. William Kepman, the athletic rep, saw to it that all interested in sports could try out for the faculty teams. Science participated in football, basketball, hockey and curling, and were successful in winning the Junior Basketball and Porte Markle trophy, emblematic of inter-faculty curling championship.

Miss Daisy Boyd, in charge of Ladies Athletics, arranged for worthy teams to represent Science in curling, basketball and hockey. The ladies have won the hockey championship and it is fitting to note here that five players of the U.M.S.U. hockey team are members of Science.

The Science track team were a credit to the faculty, Mr. Jack Liddle being particularly outstanding.

Miss Beatrice Newton, Lady Stick, has seen to it that the activities of the ladies club did not suffer for want of participants and support. Supper meetings were held preceding the general meetings, one of the classes taking charge on each occasion. Due

to efforts of Mr. William McCracken, president of Men's Club, two highly successful banquets were held. (Nuff sed.)

The usual monthly general meetings were held. Arrangements were in charge of a committee with Mason Sharpe as chairman. Several inter-class debates, sponsored by Lorraine Gerrie, debating rep, took place, frequently followed by informal dances. During the year a new constitution was made and adopted after due consideration at general meetings.

The faculty enjoyed a highly successful financial year due to newly formed finance committee and the very efficient Treasurer, John McIntock.

Convenor of Social Committee Mr. Stewart Johnston was responsible for some highly successful social functions, the highlights of which were the Freshman Reception and the Grads Farewell.

The Science faculty was ably represented on the U.M.S.U. council by the Messrs. Dawson and Lane. Year Book arrangements were in charge of Mr. Josie, the result of his efforts being evidenced in this section of the Year Book. The secretary, Harold Johansson, performed somewhat tedious duties in a very satisfactory manner.

In fact, all the members of the executive fulfilled their obligations creditably and, we hope, to the satisfaction of all concerned.

ONE of the pleasantest surprises this year was the wonderful effort put forth by the members of the Science Track team at the Inter-faculty track meet, in which second place was eventually captured. Encouraged by the wonderful exhibition of their captain, Jack Liddle, one of the stars of the U.M.S.U. track team, the boys came forward to make an unusually strong and able showing, and succeeded in upsetting the "dope"

of the railbirds. Miss Margaret Shaw was the outstanding member of the Science girl's team and her remarkable ability earned her a coveted position on the U.M.S.U. girl's team. On the whole the team are to be congratulated on their meritorious efforts and should most of these athletes return to the University next year, Science should be well to the fore in the field of track.

THE Green and Gold squad did not win a game this year—but what's a win—you know that little piece of Kiplings. However, what is far more important the boys played their games and played them well. But for a few unfortunate clashes of the city Junior schedule with the Inter-faculty schedule they might have come out on top.

With the separation of the Junior and Senior divisions another obstacle arises, but with the great improvement the team showed in latter games one cannot help but feel hopeful for the future.

SCIENCE demonstrated their basketball ability by winning the Birks "B" Trophy, emblematic of the Junior inter-faculty championship for the first time in a number of years.

After tying for honors in the first half of the series, they came through with a win in the play-off.

Second series found the members tuned up to higher efforts, which resulted in the acquisition of the divisional championship.

The play-off series with M.A.C., the other division winner, very nearly spelled their downfall, but a seven-point lead remained to their credit, to give them the much desired championship.

THIS year the Science girls have come forward, with considerable enthusiasm, to make an impressive showing in junior inter-faculty basketball.

Although generally being novices at basketball, they have won two out of three games, with one game, on which the championship depends, remaining to be played.

It is with confidence that we look forward to a bigger and better season next year, as the majority of the team will be back with renewed enthusiasm and pep.

THE season 1931-32 proved a very successful one for the Science girls' hockey team. The girls were enthusiastic from the start and ever attentive to the words of wisdom of their coach, Mason Truman. In the Girls' Senior Inter-faculty League the team lost but one game. This success was due to the fact that every girl on the team put her whole heart and soul into the game. All of the girls enjoyed the game, not alone because they were winning, but because of the game spirit displayed by the opposing teams. Let us hope that in years to come this year's record may oft be repeated.

SCIENCE CO-ED CURLING

L. Bolman
A. Cottingham
B. Newton

SCIENCE curlers enjoyed a very successful year in 1931-32. At the beginning of the season a novelty spiel was held in which no less than 60 students participated. The main event was won by Grant Watson's rink. Archie Cormie's rink taking the secondary event.

For the first time in many years a Science rink won the University Porte-Markle competition. The personnel of the winning rink was: G. Watson (skip), B. Howden (third), A. Cormie (second), O. Brown (lead).

In the regular inter-faculty curling, Science placed second, losing out to Arts by a slim one-point margin. This standing is noteworthy in view of the fact that the three Science rinks were composed almost entirely of new men, only two of last year's curlers being included.

Bob Howden skipped his rink to a well deserved victory in the finals of the consolation event in the U.M.S.U. Novelty Spiel. Bob Lilly played third, while Mary Martin and Greta Howat held down the front end in fine style.

THE soccer teams of the faculty of Science enjoyed a very successful season from beginning to end, not so much in scoring goals as in enhancing their reputation among the other faculties, by displaying sportsmanship on the field and a willingness to co-operate at all times in order to make the schedule run smoothly.

This is the second year that Science has been represented in both the senior and junior divisions of football, and there is a strong feeling among Science supporters of this game that next year will undoubtedly see Science as a serious contender for the soccer trophies.

What? Again?

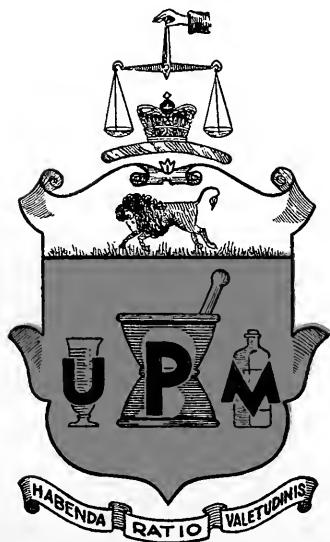

THE art of pharmacy is ancient and honorable. It dates back to the time of the early Egyptians, and rises out of the natural instinct of men to seek relief from pain.

Pharmacists the world over have made many valuable contributions to medical science. Their general service to the public entitle them to a large measure of the good-will of the many they serve.

The man who elects to serve the community as a registered pharmacist, must have more than the commercial point of view. His skill in the compounding of prescriptions is of inestimable value. Not only must he know the properties of every ingredient, but he must guard as well its purity and fitness for use.

Behind those lights that send a gleam of hope into the night, is a spirit of sympathy and service, backed by special knowledge earned only after a long and rigorous apprenticeship, followed by a course of a very high standard of professional education, entailing the application of theoretical principles to actual experience.

This is the pharmacist—the friend of all.

"Arrowsmith"

Free wheel

I congratulate the students in Pharmacy who are concluding their academic Courses this year. Those in closest association with them assure me that their class records are highly satisfactory and that they have creditably performed their duties and discharged their obligations as an integral part of the student body of the University. For these reasons their Faculty is pleased to place upon them the seal of its approval and to express the confident hope that they may all be extensively serviceable members of their various communities.

The members of the class, I am sure, are sincerely appreciative of the privilege that has been theirs of two years experience as University students. If this experience had promoted integrity, strength and independence in thinking, the University has reason to be proud of the services it has rendered.

I urge the departing students to retain a connection with the University and its work, and so ensure continued interest in intellectual pursuits. It may well prove that your intellectual interests will be the salt that will savor your lives.

AN EPOCH-MAKING PHARMACEUTICAL DISCOVERY

The Story of Iodine

TROUBLE had come to the small throat of Li Foo's young wife. Her slender fingers seemed perpetually touching the lump to feel whether it were growing. Sad little smiles were all that was left of her gay laughter. "Is there no help, Li Foo?" she asked.

Li Foo talked with the priests of the temple, who gave him the magic of the sea sponge. On the beach in the early morning he found a sponge cast up from the sea. He burned it and saved the ashes. These he dissolved in wine and gave to his wife to drink, little by little. And little by little the lump in her throat receded. Laughter returned to her eyes. Mighty the magic of the sea sponge.

While the above is a legend, it is based on knowledge that the Chinese possessed 4000 years ago. Li Foo never knew that the growth in his wife's throat was a goitre. He never knew that the magic of the sea sponge was its iodine content—that most all sea organisms are rich in iodine. Neither

did the Greeks who stumbled upon the same cure as early at 200 A.D.

Not until 1812 did a then obscure French pharmacist, named Courtois, discover Iodine as a separate substance. He saw it first as a violet vapor rising from a pile of seaweed that he was burning to make saltpeter. It was named Iodine ("violet-like") by Sir Humphrey Davy.

Today it is realized that deficiency of iodine in food is the commonest cause of goitre and other diseases—though some have too much of the element. Less than a thousandth of a grain per day supplies our needs. Used as a local application it is perhaps the nearest approach to the ideal germicide, killing invading germs with the least damage to living tissue.

Pharmacists the world over have made many valuable contributions to medical science. In the Colleges of Pharmacy and in numerous laboratories, presided over by pharmacists, research work is still being carried on patiently and quietly.

PHARMACY EXECUTIVE COUNCIL GROUP

W. R. Conner
Valedictorian)
G. L. McMorran
(Vice-President)
M. C. Cohen
(Sec.-Treas.)
A. W. Cumming
(President)

*I*N reviewing the various activities of the graduating class of 1932, there immediately appears the striking characteristic of the close harmony in which its members existed.

To this feature we attribute the fact that soon after commencing our University career, this group existed not merely as a class, but as a body of sincere friends.

Though restricted in part by the presence of a limited number of students, the success of the various undertakings may be attributed almost entirely to the various "Reps."

Responsibilities of arranging our social functions were taken care of in a most capable manner by D. G. "Dunc" Williamson, and his efforts were certainly not in vain, when we recall the mid-term dance held November 26th, 1931. This event again exhibited our class members as dart enthusiasts towards the undertakings of the class.

Favorable comment is due the members of our hockey team for the keen interest they showed by regular and well attended practices. Full credit must here be given to our hockey "rep," Mac Sample for his untiring efforts towards the maintenance of the team.

Curling, under the supervision of George Reid, was indeed the outstanding winter sport, and much credit is due him, when we consider that he had to see that 32 students got up on time Saturday mornings to be at the rink by 9 a.m. What a job! And, special mention must here be made for the efficient manner in which George conducted the curling bonspiel, for it was truly an event that will long be remembered.

And, last but not least, we mention the executive, who at all times kept the class foremost in their hearts, conducted and supported all class activities with supreme level-headedness, and succeeded in making our year a banner year in every sense of the word. They included Alvin W. Cumming, President; G. Lyall McMorran, Vice-President, and Max C. Cohen, Secretary-Treasurer.

All in all, the feeling of brotherhood that predominated among the members of our class was what made 1931-32 one of the most colorful years in student history of Pharmacy.

May each and every member of the class reap nothing but good fortune in the years to come, and continue through life with the same spirit and enthusiasm injected into them during their short University life.

OUR hockey team was under the direction of D. M. Sample, who proved very capable in this capacity.

The members who comprised the team are to be congratulated on their splendid efforts, and their sportsmanship as shown on the ice at all times.

Though not ranking first in the Inter-faculty League, our team received as much enjoyment and played at all times with as much enthusiasm and co-operation as if the honor and glory of our faculty were at stake. The true spirit of the Pharmacist!

VERY little can be said of the Permanent Executive in the way of past activities, since their term of activity commences after we have left the University.

It has been the custom of Pharmacy each year to elect a body known as the Permanent Executive. It is the duty of this executive to keep in touch constantly with the graduates of the class, after they have entered their various fields of endeavor, and to conduct any business that should transpire at some future date, to the best of their ability, and in the interests of our profession.

Professor H. E. Bletcher is Honorary President of this executive, and Professor D. McDougall is Honorary Vice-President.

THE men pictured above are representative of the three rinks, chosen to support the purple and gold in the Inter-faculty Curling League.

George Reid was in charge of curling activities, and succeeded in arousing more interest in this phase of sport than was experienced in any other Pharmacy undertaking.

A word of praise must here be given the individual members of the team, for their creditable showing and for their efforts in maintaining that ideal which has become so typical of all our undertakings, and that is the spirit of working together, all for one, and one for all.

PROFESSOR H. E. BLETCHER

*I*N the long years of Professor Bletcher's association with the University, as Director of the Course of Pharmacy, he has watched scores of students come and go.

As students of the graduating class of 1932, we wish to thank Professor Bletcher for all he has done for us, directly through his scholastic teachings, and indirectly through the encouragement and inspiration which we derived, through our associations with him during our academic career.

For five years we have looked forward to the day we will graduate, for we realize that it is truly a day of accomplishment and achievement, and we also realize that while it marks the close of one epoch in our lives, it marks the beginning of a much greater one.

In bidding you farewell, Professor Bletcher, we can only wish you long life, and excellent health to enjoy it. We trust that our graduating will mark not the end, but the continuation of further relationships. Our ideal in life, as inspired by your teachings is expressed by Longfellow, when he said:

*"Let us, then, be up and doing
With a heart for any fate
Still achieving, still pursuing,
Learn to labor, and to wait."*

PROFESSOR D. McDUGALL

*B*ORN in Manitoba, and completed his apprenticeship in Winnipeg.

1920 completed the diploma course in Pharmacy.

1924 completed the degree course, receiving the degree of Bachelor of Science in Pharmacy.

1926 received his Master of Science degree; his master's work being done in the chemistry of alkaloids.

Today he is assistant professor of Pharmacy and Pharmaceutical Chemistry.

Our chemical laboratories on Notre Dame Avenue, of which Professor McDougall is in charge, have afforded us untold opportunities to seek, to learn, and moreover to enjoy our practical work, which, thanks to his systematic effort, was never lacking in scientific interest. We have learned also, through our associations with him, that the prime essentials for success in any scientific undertaking are conscientiousness and efficiency.

Our laboratory periods, however, accomplished even more than this, in that they constantly brought us so close together in our work that we felt not merely as students to a professor, but as friends.

In saying farewell, Professor McDougall, we can only wish you continued success in all your undertakings, and the best of health to you and yours.

*I*N August, 1820, Rev. John West, who had just been sent out as chaplain for the Hudson Bay Company, started a small school at his home near the present site of St. John's park. His work was ably carried on by his successor Rev. David Jones, and in 1833 a new boarding school, called the Red River Academy, was opened. This institution was renamed St. John's College in 1849 by the Rev. David Anderson, first Bishop of Rupertsland, who enlarged its scope to include training for the ministry.

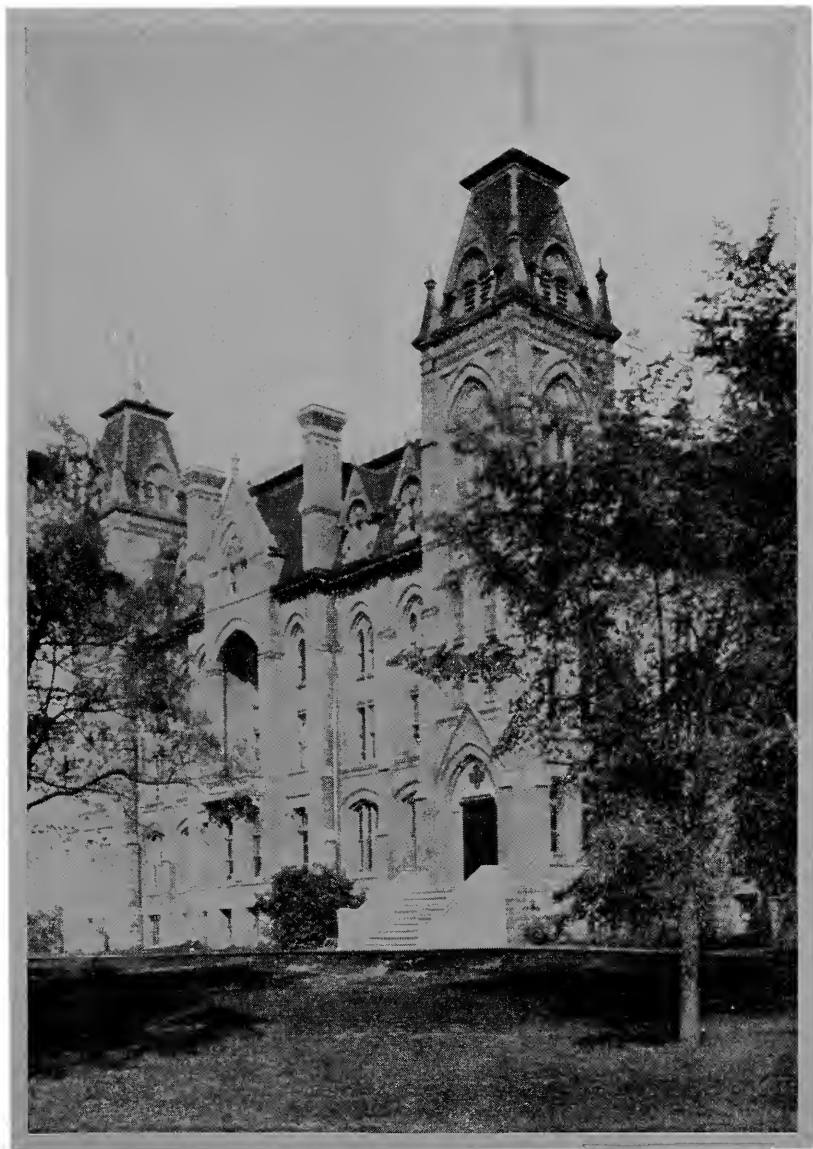

At the time of Bishop Anderson's resignation, 1864, the college, which had suffered greatly from financial difficulties, was closed, but through the untiring efforts of Bishop Robert Machray, new developments were brought about; the old institution was incorporated with a neighboring school and the whole opened in 1866 as a combined college and school. In 1871 the college was incorporated by act of the Provincial Legislature.

With this continual expansion, the building then situated on the banks of the Red River was unable to offer suitable accommodation and construction on a new structure on Main Street was commenced in 1883. Both students and boys resided in this building until 1910. A new building on Church Avenue, erected in 1911, has since accommodated the theological and Arts students.

During the war period the number of the men students was greatly decreased and the classes were composed almost entirely of women students. However, after 1918 the depleted classrooms were returned to normalcy and due to lack of accommodation co-education was temporarily abolished. However, the year 1931 saw the return of women students to the College with the result that it now has a registration of well over one hundred.

AUTOGRAPHS

St. John's College School.

I WISH to extend to the graduating class of 1932 my sincere good wishes for success and happiness in the field of service upon which you are about to enter. You are living in a great age of reconstruction which demands of you courage and confidence and sacrifice. At no time in the history of the race has there been a greater need of intelligent world co-operation on the part of nations and individuals to bring order out of chaos and happiness to mankind than there is today. World-peace and harmony is the great need of the age. To bring this about is your task and it will not be done without faith and courage and service. Go out to your duties with this cry ringing in your ears:

Be strong!

*We are not here to play, to dream, to drift;
We have hard work to do, and loads to lift;
Shun not the struggle—face it; 'tis God's
gift.*

Be strong!

*Say not, "The days are evil. Who's to
blame?"
And fold the hands and acquiesce—oh shame!
Stand up, speak out, and bravely, in God's
name.*

Be strong!

*It matters not how deep intrenched the
wrong,
How hard the battle goes, the day how long;
Faint not—fight on! Tomorrow comes the
song.*

G. A. WELLS,
Warden

G. A. WELLS

J. EDWARD BARRETT

The environment of a Winnipeg home and the training of the city schools are responsible for Eddie. He came to St. John's in '27, taking a course in Arts and Theology. His influence has been felt in College activities; an officer of the C.O.T.C., member of the Council; representative to the U.M.S.U. Council, and especially as President of the Social Committee.

Eddie returns to St. John's next year to continue with his Theological studies.

K. C. BOLTON

Arts and Theology. Born in Birmingham, attended Roan School, Greenwich, England. Came to Canada 1925, entered St. John's the following year, matriculated in '28, graduate in B.A. and L. Th. '32. Activities: Debating—President U.M.S.U. '31. C.O.T.C., 2nd in command, '31. Senior student '32. Sports—Scrub hockey, tennis and chess. Future: Casey goes West and Brandon diocese becomes the field of further success.

E. J. R. COOK

Adept in every sport, in every art. Proficient, having, too, a golden heart: Strong, sure and kind, he works as best he can.

ANNE COOMBES

Anne Coombes, nee Matheson, was born to charm. She entered St. John's in 1915, but capricious and the fates willed that Anne should break off her 1915 studies. In 1930 she again took up the thread of University life taking up Philosophy at the old college. All who know her attractive personality will wish her all happiness in the task of translating philosophy into life.

F. H. DONAGHY

A scholar, poet, gentleman and friend: The hurt world's brother: Irish in his jest; To deeper things that on his name attend The eloquence of silence shall attest.

F. E. GOLDRING

Industrious, musical, scholarly. Sportive, good tempered, trustworthy. Gentle, steadfast, companionable. Capable, kind-hearted Eddy.

RAYSON HAGUE

Impressive sincerity; a voluinous sense of humor, and a characteristic lifting of the brows (developed we believe by appraising bargains in the down-town harberdashery) are features we shall miss; but we wish our friend God speed.

J. W. JOHNSON

"Jimmy" is a Yorkshireman of rare personality. He is destined for missionary work in the Arctic region. St. John's will miss him—and wish him well.

JACK ROGERS

Born in England. Came to Winnipeg in 1908. Left school, then returned, matriculating in 1928 at St. John's. Gained B.A. and L.Th.—meantime filling various executive offices capably. Two years treasurer—re-organized financial policy. A genius for method, work, and laughter. "Jack of all trades—master of fun."

G. E. PHILLIPS

The soldier first, the student late,
The cleric soon to be;
Not oft indeed does Heaven combine
So many qualities and fine
In one such man as he.

W. L. MORTON

What is it to be great? As good
as he;
What to be good? Scan all his works
and see.
The sum of finest things in nature's
plan
Combines in this well learned and
noble man.

THE Students' Council of St. John's College experienced a very successful business year in 1931-32. As was the case in the previous year the largest part of its work has been in connection with the constitution. Owing to the admission of women students to the college it has become necessary to admit their sharing in student government along with the men. The question was debated whether an organization separate from that of the men should be formed, but it was finally agreed that until the co-ed body should have had more experience in student affairs and an increase in numbers, they had best work in conjunction with the men students.

Other changes in the constitution include election of the treasurer for the succeeding year by the retiring council and making students of one year's residence eligible for the office of Senior Student, provided they qualify in other respects.

The question of awards for leadership in sport and executive work has at last been solved. Previously, the only award given for athletics has been the Schultz trophy. It has been decided that an

Award Committee shall be appointed each year to decide on the distribution of crests for sports and of pins for executive work. The student body has doubled in the past year and the problem of accommodation has afforded considerable difficulty. The former reading room was turned into the co-ed's corner and the downstairs classroom changed into a common room. Later on it was realized that there was no common room where men and women students could mingle in the one group and so the men's common room was opened as a general sitting and reading room.

The council has done everything within its power to foster all extra-curricular activities. The progress made by the Library Committee, the Debating Society and Dramatic Society could not have been made without the loyal support of the student body to the council. It has been much to the credit of the senior student, K. C. Bolton, and the president of the Ladies' Committee, Miss K. Cheyne, that the first year of co-education has been such an unqualified success.

THE women's officers, like the girls themselves, have been somewhat of an innovation in St. John's College this year. Consequently, lest we "Rush in where angels fear to tread," we have restricted our activities to very modest undertakings. At the beginning of the year women were admitted to the Students' Council with a president and a representative from each year of Arts, all with voting powers. Since that time these girls have taken part in council debates and decisions as regular members of that body. At the opening of the first term the women students were called upon to elect one representative to each society or sub-organization in the college. These, with the president and the year representatives have comprised the committee in charge of women's affairs. Later in the year, when changes pertaining to women students were

officially embodied in the constitution, it was decided that the women's committee should consist of president and year representatives with voting powers as before, and the senior girl elect to each society as an ex-officio member without voting power. A secretary was also provided for.

The function of the Women's Committee, as defined in the constitution, has been "to foster the corporate life of the women students of the college." With that aim always before them, its members have striven to organize such activities as might benefit the girls socially, physically and intellectually. This year has been a beginning—we may hope for bigger things in future years when the body of women students will have grown larger, and when the co-eds will have become an integral part of the life of St. John's College.

THE icy blasts of a winter's day, November 21st, marked the failure of the pig-skin chasers to bring home the trophy for the fifth time to St. John's in its short history. The score of 3-2 indicates the dourness of the struggle with Accountancy. The following players presented at all times a well balanced team:

LIONEL HARRISON—This year's captain, popularly known as "Arry," made a spectacular centre man. A strong factor in the advance of his team to the final.

H. M. LEAH—Herb, centre half, has been recognized as one of the city's most brilliant players.

W. L. MORTON—Inside left. Bill, playing for the third year on the team, secured more than his share of the tallies.

G. E. PHILLIPS—Left wing. George, playing like Morton for his third year, was in his consistently good form.

A. E. SMITH—Left half. Ted, lanky, rusty-topped, also playing his third year with the team—a stalwart support to Phillips and Morton.

G. WALKER—Right half. A sturdy, keen tackler, possesses that never-say-die spirit.

E. COOK—Reliable defense. Ed's third year with the team. Here was calmness personified.

L. FORSYTHE—At all positions Lorne proved a valuable player. He formerly played for the St. John's Tech. eleven.

H. B. HARPER—Hank, under fire for the first time on the squad, proved his worth and should develop into a useful wing man.

MAC. SMITH—Inside right. Specially neat foot-work and a lightning drive.

MAC. TAYLOR—Goal keeper. Mac. proved capable of tending to all kinds of shots.

G. FOY and **C. BISHOP**—Capable substitutes. Held the fort in the absence of regulars.

ST. JOHN'S ATHLETICS

N. Holmes
I. Willis
A. Coombes
M. Taylor

THE year 1931-32 has been characterized by a greater interest in athletics than has been shown for some time, particularly tennis and track. St. John's has long upheld its prestige in other phases of sport and extra-curricular activities, but in past years—perhaps owing to the smallness of our faculty—we have had very little chance against other faculties which have more students from which to choose material. Although we did not show up brilliantly in the track meet the material brought to light shows great promise for the future.

For the first time for many years we held a college tennis tournament which was started as soon as college commenced. This was especially gratifying in that it has produced some excellent players, among whom are Mrs. N. Coombes, who won the

ladies' singles and later in the season the Inter-faculty championship, and Nonnie Jacob who ran close second in the college play-offs. Among the outstanding men players were Willard Monson and Mac Taylor, winner of the men's singles.

The college track meet was by far the most successful we have had for some years. Prominent among the men were J. Park, who showed up creditably in the Inter-faculty Track Meet, and Noel Holmes, who won the Schultz trophy for the aggregate number of points at the college field day. Miss Isabel Willis starred for the co-eds and we hope that she will have great success in the future.

All in all, the year has been very successful and we look forward to an even better one next year.

ST. JOHN'S
"D" COMPANY
C.O.T.C.

AS per usual "D" company of the Canadian Officers' Training Corps held an unusually prominent place among the extra-curricular activities of the men at the college. Keen enthusiasm was shown on all occasions, and this support given by the members of all ranks augurs well for the Company retaining the General Proficiency shield for the ensuing year.

This year the Annual "Don" Company Dinner was held at the St. Charles Hotel, and an excellent repast was followed by several "cryptic speeches and spicy toasts" and later by a number of original and entertaining items that were supplied by the members of the Corps.

The annual dinner and dance for the entire University C.O.T.C., at the Royal Alexandra Hotel, was also well attended and enjoyed by the would-be soldiers of St. John's.

The more important vacancies caused by the retirement of this year's officers were competently

replaced by J. O. Anderson, F. McKenney and J. E. Barrett. All of these men were successful in obtaining their commissions this year.

"D" Company roll for the past year was as follows:

Sixth Row—J. Hollies, E. Dosset, C. Bishop, N. Waitt, J. Johnson.

Fifth Row—H. Harper, J. D. Kell, A. McDonald, Robinson.

Fourth Row—L. Harrison, H. Kelly, J. Park, G. Harris, N. Gill.

Third Row—A. Holmes, H. Boys, G. Hunter, J. Bell, N. Holmes.

Second Row—H. Lelland, W. Monson, J. Kirkpatrick, L. Clack, H. Leah, R. Swain, O. Brett-Perring.

First Row—N. Clark, E. Smith, G. Warker (Capt.) F. McKinney, H. Marshall.

PRIOR to 1914 there was no organized system of instruction in regard to the degree of Bachelor of Laws in the University of Manitoba, nor in respect to admission to the Law Society of Manitoba, except occasional lectures by practising barristers. In 1914 the Manitoba Law School was established under the direction of trustees jointly appointed by the University and the Law Society. The school is fully organized, with a dean and staff of lecturers and examiners; and it provides a course of instruction in law, extending over four years, enabling students to obtain the degree of Bachelor of Laws in the University and to be admitted to the Law Society as Attorneys-at-Law and to be called to the Bar of Manitoba. In 1921 the curriculum recommended by the Committee of Legal Education of the Canadian Bar Association in 1920 was adopted. To this have been added other subjects; and the course, as indicated above, now extends over a period of four years, in place of the three recommended by the Committee of Legal Education.

The value attached to the possession of the degree of Bachelor of Law granted by the University of Manitoba may, perhaps, be judged by the large increase in the numbers of those taking the degree in recent years. From 1877 (the date of the incorporation of the University) to 1900, inclusive, the degree was conferred upon twenty-seven persons, of whom the Hon. J. E. P. Prendergast, Chief Justice of Manitoba and Administrator of the Province, was the first recipient in 1882. From 1901 to 1913, inclusive, the number was one hundred and nineteen; whilst during the period from 1914, the date of the establishing of the school, to 1931, inclusive, no less than three hundred and seventy-three have graduated, making a total of five hundred and nineteen graduates.

In passing it may be mentioned that the standard of requirements of the Manitoba Law School is the highest of any Law School on this continent.

Entrance Law Courts Building.

I T IS my privilege to express to the Graduating Class of 1932 the congratulations of the members of the Faculty upon the successful completion of their Course and best wishes for the future.

In endeavoring to suggest the place which these young lawyers should take in the world, I cannot do better than quote a few sentences from an address delivered in Winnipeg some years ago by that very distinguished Judge, Lord Buckmaster:

"We also have cast upon us a very grave and serious responsibility. We are not, and we ought not ever to be, people who merely know the law and appear in Courts and plead cases. We ought to be far more than that. We are the people who not merely administer the law, but who ought to shape and help to make the law. No lawyer ought to exclude himself utterly and entirely from the great public life of which he forms a part. He, beyond all other men, is bound to use his energies, because he knows the way in which the law can be altered and framed for the benefit of all mankind. . . . You must indeed be dull of sensibility if you have not from time to time felt the solid social structure tremble under your feet, and thought that you could hear in the distance the sound of rising waters and of rushing mighty winds . . . Those forces it is our duty to control and guide, for we are not merely the ministers of justice, great and august as that title must forever be, we should be the guardians of liberty, yes, and the pioneers of truth, and it lies with us to see that these great expanding powers may be guided, directed and developed so that they may produce a nobler life and an ampler liberty for those who will succeed to our struggles and to the victories we have won."

ACTIVITIES in the Law School have produced nothing startling this year—all being serene and uneventful. Due to the increased registration a larger number of students actively participated than ever before. A progressive move forward was made when the student body adopted a compulsory student organization fee, thereby showing the way for other faculties. This resulted in an increased revenue and urgent widening of the sphere of activities especially in the realm of sport.

The Benchers, as our executive is called, held regular meetings at which problems of administration and management were freely examined and finally settled, but usually after stormy and contentious discussion. Social affairs were always a complete success and this can be attributed only to the untiring energy and able engineering of Joe Lyons. Especially can this be said of the bachelor banquets, the only ones staged in the University. During the course of the year a number of smokers were also held at which prominent men of the city addressed the body on interesting and illuminative topics.

In the field of debating, which should be the peculiar accomplishment of law students, great interest was taken with pleasing results. During the

course of the term the Benchers sponsored a debate before the Blackstone Club and the Scottish Literary Society.

In February a mock trial was staged in which the litigants exhibited considerable forensic ability which speaks well for their future success as barristers.

The faculty was also enhanced by the presence of five fair Portias in our predominantly male faculty who throughout have taken an active interest and participated in our student affairs.

Although the faculty is to some extent segregated from its sister faculties, and the students have not the same opportunity to participate in University affairs as fully as might be possible, due to the fact that the greater part are employed in law firms, still Law students have been well represented in all spheres of University affairs, having in our midst the president of the Debating Union, the editor of *The Manitoban*, the president of the Athletic Directorate, as well as three members on the last mentioned body.

Altogether our relations with the other faculties have been most cordial, while harmony and good fellowship has prevailed within the student body itself at all times, which is, after all, the most worthy of all achievements.

LAW CURLING

Second Year

Third Year

Fourth Year

THE most successful attempt which our curling representatives made towards glorious achievement this year was in the Inter-faculty Bonspiel. The "terrible trio" comprised of Cam. Haig, Howard Hutton, and Vince Cooney, along with the inimitable Bill Goodall, had no difficulty in working their way up to the semi-finals, where they encountered Grant Watson and his unbeatable scientific curlers. In the ensuing game, after a closely fought struggle, Grant Watson skipped his team to victory by a narrow margin, and as a result we are now waiting for another chance.

We can be quite safe in saying that next year should see several of our stalwarts representing Varsity in the Manitoba Spiel—here's hoping.

The teams this year were as follows:

Second Year—

H. Hutton, J. C. Haig, V. A. Cooney,
A. Stringer (absent).

Third Year—

S. Denaburg, F. Meighan, I. Keith, J. Share.

Fourth Year—

D. Campbell, W. Boyd, H. Clement,
W. A. Goodall (absent).

THE season of 1931-32 was a very successful one for Law. In spite of ill luck, Law managed to capture second place in its division, sustaining only three losses throughout the entire schedule. It has the unique distinction of having defeated every other team in its division at least once and finally being unable to gain a place in the play-offs. Although losing three outstanding players this year we expect to have better luck in the future and look for great things from this team next year.

THE Law School again entered a team in the Inter-faculty Hockey League this year, after an absence of several seasons, playing in

the Junior Division. The team was criticized for the same reasons that Eastern sports writers bemoaned the fact that Canada was represented at the Olympic games by the Winnipeggers, namely, that they could not score goals. The two teams were similar in many other respects.

The first game against Accountancy was lost 1-0, and the second game to United by a 2-0 score. However, in the third game the sharpshooters found the range and Medicals were tied 2-2. The season ended in a blaze of glory by a victory over Pharmacy by two goals to one.

Inter-year games flourished with each year claiming the final honors. Almost everyone, whether he could skate or not, appeared in these games at one time or another, and enthusiastic times were had by all.

ST. MARY'S Academy and College was granted affiliation with the University of Manitoba in 1926. It is under the direction of the Sisters of the Holy Names of Jesus and Mary, a religious community of women which, since its humble beginnings in old historic Longueuil, P.Que., in 1844, has spread over the greater part of Canada and the United States. Today its members compose the faculty of numerous elementary, secondary and normal training schools, as well as colleges throughout the American continent. This institution stands for the education which creates true womanhood, and which has become hers through a timely process of development.

St. Mary's Academy.

*I*T is a memorable year for the student body of St. Mary's College, for despite the prevailing gloom, depression and anxious fears, our graduates had the initiative to form a unit in the Brown and Gold of the University of Manitoba.

The idealism inherent in St. Mary's is manifest from its progress in the past, and a conservatism of tradition which makes the education received here something distinctive—a distinction which will be sustained throughout the coming years, since you, graduates, admit with all authority that character is the fine fruit and flower of education; that upon character depends the very destiny of governments, all social life, all civilization. But character in the fullest possible sense of the word means courage of conviction. By conviction is meant motives, ideals, the reason why for every moral action. This has been as it were chiselled into your very souls during College days; so you now go out into the arena of life fully equipped to bear on high this distinctive mark of a St. Mary's Academy and College graduate.

SISTER SUPERIOR.

ST. MARY'S . . .

ALLISON ALLEN

We might call her witty,
clever and kind,
But love, as the world knows
is frequently blind.
We might call her graceful,
charming and fair,
But, no, let's just call her
the girl with red hair.

ANNE CLARE

Broad in mind, small in
stature.
Bad at times, but good in
nature.
Always ready with a smile,
Bright and cheerful all the
time.

IRENE FAHEY

Given—A very tall girl—
fair.
To find: A good friend.
Construction: Add to the
above an attractive smile
and an Irish tempera-
ment.
Answer: Iranaus—lots of
fun in spite of her record
in maths.

MARGARET GOROWSKI

Great thoughts, great feel-
ings come to her.
Like noble instincts
unaware.
A good student, serious
minded and friendly, Mar-
garet pursues her quiet way
towards the heights of her
academic ambitions.

JOSEPHINE KARG

Merry to talk with.
Merry to walk with.
And a jolly good friend withal
Dullness has no place in Jo's scheme
of things. The owner of curly
brown hair and a most deceptive
sobriety. Jo is known to her friends
for her sweet disposition and gay
friendliness.

MARY MACDONALD

"Moulded by some deep mischief
hidden elf."
Mary's bright smile, ready wit, and
repartee are outward characteristics
of a sincere personality. As member
of the '32 Council she has shown a
keen interest in student activities at
St. Mary's.

MAY McMILLAN

Calm and steady, firm and true.
With a friendly smile to see her
through.
May is a good student, and a dili-
gent worker. Quiet, unassuming,
and sincere.

ST. MARY'S REPRESENT- ATIVE COUNCIL

Standing—

S. Kenway (Exec.)
M. MacDonald (Exec.)

M. Patterson (Exec.)

Sitting—

D. Hodgson (sports)
A. Clare (Pres.)
E. Olafson (Exec.)

ST. MARY'S STUDENT BODY

THE chief aim of the Representative Council is to promote the general interests of the students. This purpose has been closely adhered to by the 1931-32 Council.

Successful social functions have been held. Dramatic activities have been given a new impetus under the guidance of Allison Allen and the Dramatic Committee. Dorothy Hodgson as Sports Captain has widened the range of athletics.

Particular mention should be made of the happy spirit of co-operation between the members of the Council and the Student Body.

The Student Representative Council take this opportunity of thanking Sister Superior and other members of the faculty for kind encouragement given in the various activities of the students.

ST. Mary's College student body comprises members of second, third and fourth year Arts. Since the affiliation of St. Mary's with the University of Manitoba in 1926 the registration has shown a steady increase.

The students are offered a wide range of subjects, and the disciplinary and broadening influence of religious, social and athletic activities with a view to their rendering greater service in their communities "The sphere of woman's activities has widened; woman's influence reaches much farther than ever before, and for such new conditions she should be prepared by an intellectual training higher and more thorough than has hitherto been necessary."

THE basketball season at St. Mary's has been an unusually successful one this year. All the practices resulted in good turn-outs and both of the teams entered the Academy League. Up until the present time the team from St.

Mary's College has not entered the Inter-collegiate League, but under the capable and efficient guidance of Dorothy Hodgson the team expects to make a creditable showing in next year's basketball activities.

*S*T. PAUL'S College began in 1926 as a High School, ready to satisfy the requirements of the Department of Education of the Province of Manitoba. Soon it was found necessary by Archbishop Sinnott to ask the Oblate Fathers to extend their course to enable the English-speaking Catholics to do college work. The Junior Division in Arts and Science opened in 1928, under Rev. A. Simon, O.M.I., the Rector.

In September 1931, the College moved its site from Selkirk Avenue and took over the Manitoba College property. The work was put in charge of the diocesan clergy, with Rev. C. B. Collins, B.A., LL.D., as Director. The course was extended to cover the Senior subjects in Arts and Science. In October of 1931 the College was finally affiliated with the University of Manitoba.

St. Paul's College.

THE importance of a Liberal Arts College functioning in a University group should not be minimized. The leading educators of our day are convinced that such a college really enhances the University by contributing to it its peculiar culture and by broadening its scope through an interchange of ideas on the principles that govern life and make it productive of good for the individual and the general public. On the other hand, the benefits accruing to an affiliated and allied college in a University group are manifold. The possibilities for the student in Arts and Science are greatly increased. The larger body can open up avenues of instruction beyond the hopes and dreams of the smaller college. The views and opinions of the students in the respective groups are held in a broader light and are respected more sincerely.

With these thoughts in mind, it is a real pleasure for us of St. Paul's College to contemplate for the first time our position as a unit in the family of colleges making up the University of Manitoba. Naturally, our beginning has had to be on a small scale. We are confident, however, that as time progresses we shall be taking a greater and fuller share in the cultural developments of the community. We feel certain at St. Paul's that we have begun propitiously, with the sympathetic understanding and interest of the maturer University body. Prosit!

C. B. COLLINS, LL.D.,
Rector

FATHER C. B. COLLINS

ST. PAUL'S . . .

M. BURZMINSKI

Mac completed his University course after three years at St. Paul's. He intends to go to Normal next year. We all wish him the greatest success in his chosen profession.

W. P. GAY

Walter was born in Winnipeg and attended local schools. Spent several years in Toronto where he completed Upper School. Successfully attended Manitoba U., U. of Montreal, and U. of Western Ontario. After being delayed in his studies by several years' illness he completed his Arts Philosophy course at St. Paul's. Interests are many and varied. Favorite occupation is observation and collection of information on all subjects.

SEPTEMBER 7th marked the opening of St. Paul's College in its new buildings on Ellice Avenue. On this occasion His Grace Archbishop Sinnott, assisted by Rev. Dr. Collins, received many hundreds of interested visitors.

September 8th, Registration Day and address to the students.

September 15th, St. Paul's Debating Society was formed and the first of its weekly meetings was held on this date.

September 27th—St. Paul's Athletic Association was formed.

October 15th, 16th, and 17th. During this period was held a series of spiritual exercises by Rev. Dr. Daly of Toronto. This retreat was closed on the morning of the seventeenth by His Grace Archbishop Sinnott.

October 22nd. St. Paul's College was affiliated with the University of Manitoba.

November 18th. St. Paul's Dramatic Society was formed.

December 15th. The Mothers' Auxiliary of St. Paul's College was organized.

December 21st. A monster card party was held at the college under the auspices of the Mothers' Auxiliary.

January 15th. A holiday in honor of the patron of the college—St. Paul.

February 22nd. The Athletic Association held a Father and Son night.

March 7th. St. Thomas Day. A banquet was held by the students of Philosophy in the college dining hall.

April 6th and 7th. St. Paul's Dramatic Society presented a series of three one-act plays.

April 21st. A banquet at the Fort Garry Hotel by the Athletic Association. Awards were made and a review was made of the season's activities.

THE transfer to other buildings, the influx of new students, and the limited time in which to organize, made it possible this year for St. Paul's College to be represented only in rugby and hockey.

Soon after the term commenced, coach Manning issued a call for rugby candidates and there was a hearty response. Three weeks of training put the players into good shape and they went through the schedule in fine form.

As soon as the snow appeared, two rinks were erected on the grounds. Various teams were formed. Several exhibition games were played with St. John's, Wesley, and St. Boniface College, creating

mutual friendship which is one of the aims of college competition.

Although in neither rugby nor hockey there was anything to speak about in the win columns, yet the example the players set in their behaviour on and off the field made up for this in no small way. The faculty takes this opportunity to thank the boys for their splendid co-operation and their sacrifice of all outside interests to make the name of St. Paul's College known in the realm of sport.

The college will be represented in many other lines of sport next year with the addition of new buildings and better facilities. In this we hope that Varsity's prowess will be enhanced in the future.

ITH the termination of another student year imminent, the Executive Council can review a record of splendid achievement and a period productive of many pleasant memories. Due primarily to its peculiar nature, the faculty of Accountancy has been struggling for some years with a twofold task. Firstly, to foster within the ranks of its own membership that indefinable spirit of unity, that *esprit de corps*, so absolutely essential to the true success of a student body; and secondly, to establish, on a much firmer basis, our connection with the University proper, so that our relationships may advance, insofar as it is possible, from the merely nominal to actual co-operation.

As evidence of the measure of success achieved by our present executive in both the avenues of endeavor indicated in the foregoing, we would submit the following brief resume of the more prominent of the year's activities.

Our two major social events, the Annual Banquet and Annual Dance, may be classed with all confidence as the most successful in our history. The largest bowling league to date, comprising sixteen teams, and embracing ninety individual bowlers,

was piloted through another fine season. The curling league, too, is surpassing its former successes.

For information regarding our Inter-faculty relationships reference is made to the photographs and accompanying comment on the following pages.

We are pleased to avail ourselves of this opportunity to express our appreciation of the assistance rendered us by the U.M.S.U. Athletic Directorate in obtaining the reinstatement of our faculty as participants in inter-provincial collegiate athletics.

We are happy in extending our hearty congratulations to the 1931 graduates. The following are thefortunates who carry with them our sincere wishes for abundant success in the larger sphere in which they find themselves:

Lawrence L. MacPherson, Gold Medallist.
Sidney J. Beaufoy
Oscar Evans
Arthur Green
J. Alexander MacQuaker
Theodore Pavlett
John Gorrie Scott
William Westwood Smith
William Whiteford.

No great measure of success has attended our endeavors in the basketball sphere. Year after year the Accountancy representatives do little more in a tangible sense than provide clean, sportsmanlike opposition for the other faculties. Yet enthusiasm does not flag, the team is always on the floor at the referee's starting whistle, and because of this splendid exhibition of true sportsmanship—sport for its own sake—we hold our team in high regard.

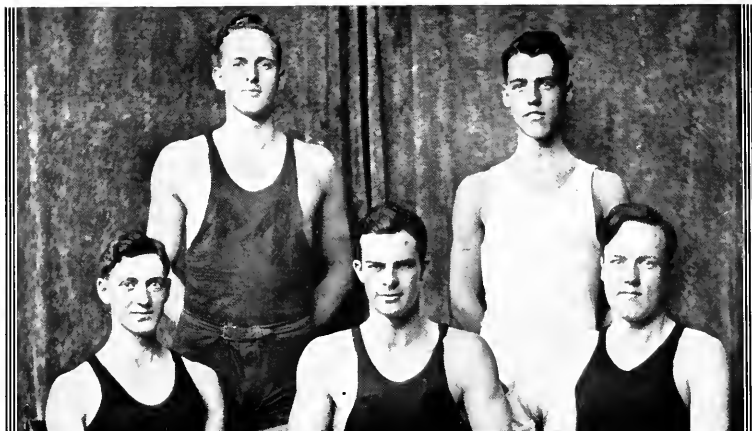

CHAMPIONS! For the first time on record Accountancy has achieved premier honors in one phase of inter-faculty competition. Although we have come within the proverbial ace of capturing the trophy in this realm for the past few years, it was not until this year that our efforts received their just reward. With the exception of Dave McDonald, who was a mountain of strength to the team, it would be useless to attempt to single out any individual players for special mention. It was due to the yeoman service rendered by every member of the team that success was finally attained. Many happy returns!

WITHIN a yard of the finishing tape in the century dash, Dave McDonald was most unfortunate in stumbling as he crossed the line a winner. According to regulations he was disqualified for fouling an opponent into whose lane he had momentarily staggered. As for the remainder of the team, they were out there trying—what more can one ask? Academic shortcomings prevented us from aiding the University in inter-collegiate competition. Coming years will witness a growth in importance in this department of our activities.

IT seemed for some time that the hockey sextette was destined to duplicate the triumph of our football representatives. Although handicapped as usual by playing short-handed, due to out-of-town players, it was not until the final game that Medicine managed to dent the meshes for the lone goal registered against us during the league's play. It was by this narrow margin that the Acc'ntancy puck-chasers were eliminated from the hockey picture. Last year we predicted success for the football eleven. This was fulfilled. This year we nominate the hockey aspirants for 1932-33 honors. Due warning!

You will find Your Friends at "SUCCESS"

Every year, more and more University graduates and under-graduates show their preference for the "Success" College, a direct result of our policy of stressing thoroughness, as well as the necessity of higher education as a foundation for a successful business career.

It is significant that many students who have trained at the "Success" College are now occupying responsible positions as officials and teachers in Business Colleges and Educational Institutions in Manitoba and adjacent Provinces. The following list of University graduates who have received training in our advanced business courses does not include hundreds of under-graduates.

IN OLD ALBUQUERQUE

An Englishman visiting Albuquerque became quite chummy with the clerk in his hotel, and the two frequently regaled each other with jokes and riddles. One day the clerk called the Englishman over and said:

"Here's a good riddle for you. My mother and father had a child, but it wasn't my brother and it wasn't my sister. Who was it?"

"By jove, I don't know. Who was it?"

"It was me."

The Englishman was much amused, and upon his return to England, he immediately tried the joke on one of his friends.

"Look here," he said. "I heard a jolly good riddle when I was in America. I'll spring it on you. My mother and father had a child and it wasn't my brother and it wasn't my sister. Who was it? Give up? Give up?"

"Yes, I give up."

"Ha! ha! It was the bally old hotel clerk in Albuquerque!"—Grinnell Malteaser.

ANSWERS TO QUESTIONS

1. True. Vinegar, like other matter, expands when heated and contracts when cooled. There is actually more vinegar in a quart measure in the winter.
2. True.
3. True.
4. False. Cork is secured from the bark of the cork tree.
5. True.
6. False. Hay fever is usually caused by pollen from the ragweed and other growth.
7. True. The French started to build the Panama Canal in 1860.
8. True.
9. False. Rubber is made of the sap of a number of tropical trees and not the common rubber plant.
10. False. Jonathan Swift wrote "Gulliver's Travels."
11. True.
12. False. Napoleon tried to conquer Russia but failed disastrously.
13. False. The elephant's tusks are not teeth; they are separate members.
14. True.
15. True.
16. True.
17. False. A circle is merely a line; a sphere is a solid.
18. False. Moses did see the Promised Land from Mount Pisgah; he never reached it.
19. True.
20. True.

Byron swam the Hellespont with a club foot, Lindbergh flew the Atlantic with a ham sandwich, but it took Irving Berlin to write *All Alone*.—Pitt Panther.

Girl (to one-armed driver): "For goodness' sake, use two hands."

Driver: "Can't. Gotta drive with one."—
College Humor.

"Do you like Chopin?"

"No, I get tired walking from store to store."
—Western Reserve Red Cat.

"With all due deference, my boy, I really think our English custom at the telephone is better than saying 'Hello,' as you do."

"What do you say in England?"

"We say, 'Are you there?' Then, of course, if you are not there, there is no use going on with the conversation."—Christian Science Monitor.

"Did you get my cheque?"

"Yes, twice. Once from you and once from your bank."—Dublin Opinion.

Dorothy, attending the Episcopal Church for the first time, was surprised to see the people about her kneel suddenly. She asked her mother why, and was told, "Hush, they are going to say their prayer."

"What, with all their clothes on?" said Dorothy.—Boston Transcript.

TOUGH

A Russian was being led off to execution by a squad of Bolshevik soldiers, on a rainy morning.

"What brutes you Bolsheviks are," grumbled the doomed one, "to march me through the rain like this."

"How about us?" retorted one of the squad. "We have to march back."—Iowa Frivol.

BIG BUSINESS

Football now is in big business. Last year Yale went over the top with a million-dollar season—and a net profit from football alone of \$543,084.76.

Harvard, with a much smaller stadium, made \$420,787 from her big-business football.

Princeton's net profit last year was \$298,880.

In the Middle West, Michigan did \$624,407 gross business with a net profit of \$415,328.

By and large it was a great season—with gross gate receipts of \$50,000,000.—Cosmopolitan.

A Scotsman, upon entering a sadler's asked for a single spur.

"What use is one spur?" asked the man.

"Well," replied Sandy, "if I can get one side of the horse to go the other one will hae to come wi' it."—Port Arthur News-Chronicle.

I never saw a fair co-ed
Who started out with good intent
To find what college really meant.
She'd rather fool around instead.

I never saw a fair co-ed
Who wouldn't take a man's last cent
To buy herself a meal. Relent?
She's only waiting to be fed.

I never saw a fair co-ed
Who wouldn't give her whole consent
To leave her books, adventure-bent.
She's only waiting to be led.

I never saw a fair co-ed.

JACK S. MASON.
U. of California '32.

Tenant (paying bill): "Well, I'm square now."

Landlord: "Yes, and I hope you'll soon be round again."—Family Herald.

Girls at college are hanging their pretty heads in shame since a dean told them in chapel that their slang is old stuff. The dean likes slang, because it is pungent and brief. In the good old days, she says, college students originated slang, but now they simply borrow it from other sources, and they're about a hundred years behind the times. As reported in the press, she told the girls that until they can do better than "OK" and "KO" they might as well say "yes." (She didn't tell 'em anything about saying "no.") But after all, trying to invent new slang is a rather hopeless and all too self-conscious business. We read the other day that "Oh, yeah?" is about fifteen hundred years old, going back to the pronunciation of the ancient Anglo-Saxons.

A native co-ed says that not a proposal this month has had a genuine ring to it.—Vanderbilt Masquerader.

Irate Parent: "Didn't I see you kiss my daughter, sir?"

Nervy Youth—"How should I know? Do you think I'd be gawking around when I was doing a thing like that?"—Boston Transcript.

First Eskimo Wife: "Does your husband stay out late during the winter nights?"

Second Eskimo Wife: "Late! Why, last night he didn't get home until half-past January!"—Passing Show (London).

Mr. Wilbur Glenn Voliva predicts that the end of the world will come in 1935.

It seems a long time to wait.—Life.

A certain shopkeeper says that alterations are going on in his shop, and he is considering putting up a sign, "No business as usual."—N.Y. Herald-Tribune.

Food prices are getting so low that maybe, if we wait long enough, this depression will turn into a gorge.—Boston Herald.

Sick woman in bed, to physician: "Oh, doctor, there must be something dreadful the matter with me—you look so pleased."

The polite dinner guest turned to the forbidding female on his left and said: "Tell me, dear lady, have you children, by any — er — chance?"

there is no stoplight
For a talkative cosmopolite.
They are repetitious and prolix
As confirmed alcoholix
And will insist on describing in many badly chosen words to any unfortunate godforsaken hearer
The delights of London and Vienna and Paris and the Rivearier . . .
And a lot of other little points they have picked up in their voyaging.
And altogether they manage to be pretty damned annoying.
Oh Lord:
Why doesn't everybody that goes abroad stay abroad?

—Ogden Nash.

The President of the Bank to his Secretary:
"Go through these old envelopes and see if you can find a stamp—I want to write a letter."

A fellow has to be a contortionist to get by these days. First of all, he's got to keep his back to the wall and his ear to the ground. He's expected to put his shoulder to the wheel, his nose to the grindstone, keep a level head, and both feet on the ground. And, at the same time, look for the silver lining with his head in the clouds.

Then there's the Hollywood producer who was heartbroken because none of his directors knew how to make a movie of the depression.

"There's a decided uniformity in the contents of my mail this morning, Julia."

"How do you mean, dear?"

"About all my letters begin with the same word, 'Unless'."

A depression is a period when people do without things their parents never had.—Minneapolis Star.

Manager: "What we want is a night watchman who will watch, be alert and ready for the slightest indication of burglars. Somebody who can sleep with one eye and both ears open, and is not afraid to tackle anything or anybody."

Applicant: "Ah, I see. I'll send me wife around."

Billie: "My dad is an Elk, a Moose, a Lion and an Eagle."

Bobby: "How much does it cost to see him?"

Did you hear of the lady who visited a trance medium last winter, and asked to have her late husband summoned from the other world for a short conversation?

When the shade of her departed lesser half reported for the interview, the following colloquy took place:

Widow: "Is that you, John, dear?"

Spirit: "Indeed it is, dearest."

Widow: "And John, dear, are you happy?"

Spirit: "Far from it."

Widow: "And where are you, John?"

Spirit: "In hell!"

Widow: "Oh, my poor John! Would you not love to come back, John, to this earth again, and join your dear little wife?"

(Bang — bang — bang. Rap — rap — rap. Table upsets).

Spirit: "Not on your tin-type!"

A five-year-old son awoke at 3 a.m. and said to his mother, "Mother, tell me a story."

"Hush, dear," replied mother, "daddy will be home any hour now, and tell us both one."

Edna—"How did you get that mark on the cheek, Helen?"

Helen—"The boss had his pen behind his ear when he said 'Good morning' to me."

The farmer sat on the porch with a jug of corn likker beside him. The salesman came up the steps:

"How do you do, sir. I have here a monumental work on agriculture which gives all the newest methods in farming."

"What good will it do me?"

"Why, it will teach you how to be a better farmer."

"Don't want it. Ain't half as good a farmer nom as I know how to be."—Saturday Evening Post.

"You must pay your tuition in advance for your stenography, Miss."

"Pay tuition in advance? How do I know you can teach me anything?"

SUGGESTION

Now that they are revising all the history books, why not carry it a little further and get the Horatio Alger series up to date thus:

"True to His Bank Depositors."

"From Riches to Rags."

"Sink or Sell Short."

"From President to Columnist."

"Joe, the Bootlegger."

NEW VERSION

"Mother, may I go out to swim?"

"Yes, but watch your behavior.

Keep away from those cameramen

Or you'll land in the rotogravure."

—W.G., in the Boston Transcript.

SURPRISE

"Jim, darling—I've something important to tell you."

"Yes, Betty?"

"I—I hardly know how to begin—"

"Go ahead, dear. Don't be afraid."

"It—it may seem a little sudden to you, a little too soon, but I know it's going to make you awfully happy, dear."

"Well, anyhow—"

"I should have told you before. But I'm such a silly about some things! And now I've got to tell you—"

"Betty, will you *please* tell me and get it over with!"

"Just a minute then 'til I get it out of my pocketbook. Isn't it an awkward thing in this long brown envelope? Look, darling—our interlocutory decree!"—W.W., in Judge.

Father: "So you want to marry my daughter?"

Suitor—"Yes, but first I want to know if there's any insanity in your family?"

Father: "No, and there's not going to be any."—Washington Cougar's Paw.

She: "And if I sit over in that nice dark corner with you, will you promise not to hug me?"

He: "Yes."

Her: "And will you promise not to kiss me?"

Him: "Yes."

Feminine: "And will you promise not to—"

Masculine: "Yes."

She: "Then, what do you want me to go over there for?"—Ala. Rammer-Jammer.

"How did you like the Empire State Building?"

"I didn't like the aluminum striped tower."

"Why, that's the point of the whole thing!"

—Harvard Lampoon.

Young Suitor: "I would like to marry your daughter."

Business Pappy: "Well—er—you can leave your name and address, and if nothing better turns up we can notify you."

A teacher in a public school asked her class the question: "Who was Nero?"

For a space of time none of the children answered, when suddenly away back on the last bench a little hand was raised and a very diminutive miss piped out: "Teacher, I know."

"Well, Betty, how do you know who Nero was?"

"Cause," chirped the mite, "I heard 'em singing about him in my Sunday school."

"And what did they sing about Nero in your Sunday school?" pursued the teacher.

"Why, they sang 'Nero My God to Thee.'"

Wife: "You don't love me any more."

Husband: "Why, dear, I do."

Wife: "You couldn't love a woman with such old clothes as I have."

For University Dances and Banquets
The Picardy Catering Dept.

is equipped to serve large or small banquets, dinners or lunches, in the Picardy Banquet Hall or in clubrooms or private homes. This service is inexpensive. The success of a dinner or dance depends to a great extent on the excellence of the menu and the efficiency of the service. The Picardy Catering Department will relieve committees of all worry and bother by planning and serving dinners or lunches to suit any occasion.

RIMES WITHOUT REASON

This Jolonel Was Never Diolonel

A distinguished old one-legged colonel
Once started to edit a jolonel;

But soon, quite disgusted,

Gave up — he was busted —

And cried, "The expenses is infolonel."

* * *

Whacht He Gacht

A small boy when asked to spell yacht
Most saucily said, "I will nacht;"

So his teacher in wrath

Took a section of lath

And warmed him up well on the spacht.

* * *

Breaking It Ough

There once was a man who for hiccough
Tried all the cures he could piccough,

And the best without doubt,

As at last he found oubt,

Is warm water and salt in a ticcough.

Maybe He Wanted to Romb

He learned to play tunes on a comb,
And became such a nuisance at homb,

That Ma spanked him and said,

"Shall I put you to baid?"

And he cheerfully answered her, "Nomb."

* * *

She Meted a Pareted of Her Peelings

A lady who deftly crocheted

A terrible temper displeted,

On finding, when through,

That a dropped stitch or twough
Had ruined the garment she'd meted.

* * *

The Go-Gebtor

A merchant addressing a debtor

Remarked in the course of his lebtor

That he chose to suppose

A man knose what he ose;

And the sooner he pays it the bedtor.

—Excerpts from Spelling.

Wife (to neglectful husband): "Do you not notice how nice John our neighbor is to his wife? Why, he embraces her, pats her on the cheek and kisses her every morning before he goes to work. And then when he gets outside the door he throws her a kiss too."

She: "It's a wonder you never do that?"

He: How can I? I don't even know the woman."
